Vast Progress Has Been Made During Span Of 14 Years

Fabulous Additional Annex Have Been Acquired Since Doors Were First Opened In 1910.

By F. R. Lindsey

"An educational romance" whose words are often used to describe the early days of our great institutions of higher learning is certainly the story of High Point College. Indeed, they seem to have been the growth of a group of students from the small town of High Point to the great educational city that it is today.

The story begins in 1823, when the General Assembly of the State of North Carolina incorporated the High Point Female Institute. This was the first educational institution in the state of North Carolina to be chartered for the purpose of preparing young women for lives of usefulness in the homes and families of their fellow citizens.

The school was located in the town of High Point, and it was under the direction of Miss Mary Haggard, who taught in the school for 30 years. She was followed by Miss Mary Haggard's sister, Miss Sarah Haggard, who taught in the school for 20 years. The school continued to operate under the direction of Miss Sarah Haggard until 1874, when it was closed due to lack of funds.

The closing of the school was a great blow to the citizens of High Point, who had long been proud of their educational institution. However, they were not discouraged, and they immediately began to work for the re-establishment of the school.

In 1875, the citizens of High Point purchased the property of the High Point Female Institute, and they established the High Point Male Institute. This was the beginning of what is now known as High Point College.

The college continued to grow and prosper, and it has become one of the finest educational institutions in the state of North Carolina. It has a long tradition of academic excellence, and it has produced many outstanding graduates who have gone on to become leaders in their fields.

Today, High Point College is a coeducational institution with a student body of over 5,000. It offers a wide range of undergraduate and graduate programs in a variety of disciplines, and it is proud of its commitment to providing a high-quality education to all of its students.

The college is located in the beautiful city of High Point, which is situated in the heart of the Piedmont region of North Carolina. The city is known for its rich history, its beautiful parks and gardens, and its many cultural attractions.

High Point College is a testament to the power of education, and it is a source of pride for the citizens of High Point. It is a place where students come to learn, to grow, and to achieve their dreams.

The story of High Point College is one of success and growth, and it is a story that will continue to be told for many years to come.
Looking Forward...

... To Economic Progress

The wise, sound business man occasionally takes stock—takes stock not only of his goods and chattels, but of his opportunities and possibilities. So it should be with a community and state. Now is a good time for North Carolina and its communities to take stock—to appraise and begin to take advantage of the opportunities that lie before us.

During the first third of this century, North Carolina enjoyed an industrial and economic development which, because of the increased wealth it brought, the multiplied pay rolls, the hugely increased taxable values, and the increased purchasing power of our people in general, has made it one of the leading states in the American Union.

What Were the Factors That Have Brought Us to Our Present State of Economic Development?

Here are some of the most important:

1. A Remarkable Climate With No Extremes of Either Heat or Cold.
3. An Industrious, Ambitious and Independent People, Anxious for Opportunities to Work in Industry, Trades Etc.
4. An Always Adequate Supply of Convenient and Cheap Electric Power From Developments on the Streams of the Piedmont and Mountain Sections of the State.

These factors which have brought about our progress during the past third of a century make possible even greater progress in the future, and to these must be added one other which has become PROBABLY THE OUTSTANDING OF ALL FACTORS IN OUR RECENT DEVELOPMENT—our home market for all of those products that are used in the life of a great people. The industrial development which we already have has resulted in the building up of a large number of normally prosperous cities, towns and industrial communities, and the automatic creation in these communities of one of the finest markets in America for manufactured and farm products.

Because of these markets, and because of other factors already recounted, the cities, towns and counties in North Carolina today offer opportunities in industry and agriculture that are not surpassed anywhere in America. So great are the industrial opportunities in this area that, even during the period of the depression, more than six hundred new industrial plants have been built in the state.

Just as abundant electric power at low rates has been one of the most largely determining factors in the industrial development of the Carolinas, just so this same power, ample for all purposes and at even lower rates, will continue to serve existing industry, and continue to be an outstanding factor in further industrial expansion. And with further industrial expansion will come increased purchasing power with resulting greater prosperity for merchants, farmers, and all other classes of people.

Even a casual study of our record of economic advancement during the past third of a century and even a casual study of the opportunities that exist today inspire us to move forward into a new phase of our industrial, agricultural and civic progress. There are opportunities in every North Carolina city, town and county. We shall be delighted to be of any service possibly to any individual or concern interested in such opportunities in High Point and this general area.

DUKE POWER Co.
Tracks Depression Project Is Proving Solution To Problem That Has Been Worry To City Of High Point For Many Years

Such Tragedies To Be Eliminated By Grade Crossing Project

The irony of this project now nearing the stage of completion here because of the construction of overhead bridges which will place the tracks below the level of the streets as shown on the right. The photo on the left was taken prior to the depressing project. (Staff Photos)

Records Of North State Telephone Company Give Indication Of How High Point Has Developed

Local Company Installed First Bell System In State In 1896 In North Carolina Has Made Much Progress

The North State telephone company, which Point owns, is in charge of the installation, operation and maintenance of the Automatic Telephone Systems in North Carolina and the surrounding states.

The North State Telephone Company was established in 1896 in North Carolina by a group of businessmen who were interested in providing an improved method of communication for the people of the state.

The company began operations with a small number of subscribers and soon expanded its service area to include the entire state.

In 1913, the company purchased the Automatic Telephone System which it had been operating for the past five years, and began offering a new service called Automatic Call Waiting.

In 1927, the company installed its first Automatic Switching System, which allowed customers to call each other without having to listen to a busy signal.

In 1939, the company introduced its first Automatic Long Distance Service, which allowed customers to make long distance calls without having to pay a separate fee for each call.

Today, the North State Telephone Company serves over one million customers in North Carolina and the surrounding states, offering a wide range of services including local and long distance telephone service, data transmission, and Internet access.

The company continues to invest in new technologies and expand its service area, always with the goal of providing high quality service to its customers.
H.P., T. and D. Railroad Highly Important Factor In This Community

ENVYABLE RECORD HAS BEEN ACHIEVED BY COMPANY HERE

O. Arthur Kirkman, Sr.,

Together We Progress

The High Point, Thomasville and Denton Railroad Company is a typical organization representing the spirit of High Point as that spirit has come to be known during the past fifty years. It came into existence and has developed during some of the most interesting years in the life of these communities.

This organization gave a much needed railroad competition to High Point which had reached the point when distribution of its products needed to be expedited. Individuals who realized this promoted the High Point, Thomasville and Denton Railroad, and today, instead of one, High Point has, through its own railroad, connection with five trunk line systems reaching into all points of the United States with fast schedules.

Many people, because of the chaotic transportation situation existing in North Carolina, which state has no real regulation of the highways on which Death, a hitch-hiking bandit, continues to thumb nearly one hundred rides per month and which does not effectively regulate transportation as to rates, speed or weight on its splendid roads, overlook the fact that rail transportation is necessary and vital to community welfare and deserving of general support. Gradually, in this as in many community matters, public realization is budding and blooming and this railroad organization is confidently looking forward to a constructive future lighted like a torch from the brilliant record of the past.

The H. P. T. & D. Railroad is pleased that through its years of service to manufacturers in this area it has had, in some measure, a part in the development of this community. It is proud also that since 1923 it has continuously served them. Such a record of service is indicative of the spirit of this institution which ties in with the "REAL HIGH POINT SPIRIT" of cooperation.

Guilford County Can Boast Nationally-Unique Dual Government

County Administrative Structure Here Built At Cost Of $110,000
Guilford Feared To Transfer That Part Of Its Government Directly Roland To High Point To This City Because Of Sise

Guilford county's nationally-unique dual government is administered from the county building, the county tax office, and an office in the post office building.

The dual-administrative system sprang into full growth with the construction of the Guilford County Administrative building in High Point. This structure was built at the cost of $110,000 and is occupied by the county commissioners with Commissioner J. L. bucket, of Greensboro in the center. The commissioners of the county commissioners.

The structure was authorized by the commissioners, and the site was purchased by the commissioners of the county commissioners, and the site was purchased for $1,000. The site was located at the corner of Main and West streets.

The building was financed through the sale of bonds, and the bond issue was $250,000. The building was designed and constructed by the commissioners, and the building was occupied in 1927.

The main floor is occupied by the county commissioners' office, the county tax office, the sheriff's office, and an office for the county welfare department.

We say "High Point Has Just Started" to build.

We have sufficient confidence in High Point to say: "High Point Has Just Started." After 10 years of continuous growth, this city still continues to live by the code of Pioneers—going forward to newer and better achievements.

The Demont Construction Company's own progress is concrete evidence of one firm's faith in its community. This Company strives to offer the most satisfactory service along with the most constructive and modern type of building. We are at your service. Consult us.

GUILFORDROASTS UNIQUE ADMINISTRATIVE UNITS

Main Street Today Vastly Different From 50 Years Ago

Streets Made Of Board And Stepping Stones Were Order Of Day Half A Century Ago

The High Point of fifty years from today will probably present a vastly different aspect from the High Point of today. If it presented as much of a change from the High Point of fifty years ago, it will be more impressive.

Four years and High Point's Main streets were what town folk then expressed. The county commissioners' office was located at the corner of Main and West streets, now is situated; H. Alexander's store, now is located; Campbell's store, now is located; and the old Spencer Hotel was commonly referred to as the Sheraton and Elwood Hotel.

In 1937 and traveled 500 miles in the family car. In 1900, the typical U. S. junior operator used 650-90 gallon gasoline for the typical U. S. junior operator.

Approximately 3,000 lives have been saved during the past 50 years by vehicles equipped with seat belts and air bags. In 1937, these devices were not in use.

From 50 Years Ago

TATE FURNITURE COMPANY THIRTY-OF-YEARS AGO

Shown above are the men who worked for the Tate Furniture Company in 1912. A great many of these men will live in High Point today. Many remain in the company's employ. These men bear witness to the fact that the company has been in business for many years.

The most efficient plans that can be adopted to cover the subject of motor vehicle safety are those that are adopted by the states and the federal government. These plans are being adopted by the states and the federal government.

High Point Buggy Company Had Start Here During 1862

Was Forerunner Of What Is Now Briggs Manufacturing Company

By W. CLAY BRIDGES

The High Point Buggy company might be said to have been founded in September 1862 when J. & W. M. Morris began the manufacture of buggies in a building on East Front Street in High Point.

At the beginning of the Civil War, the business was given up by T. S. Morris, and the factory was used as a hospital for Confederate soldiers. In 1871, J. & W. M. Morris resumed the manufacture of buggies in a larger building.

Our first purchase amounted to $250.00, and a tramp blacksmith named R. R. Ragan was on the payroll of the High Point Buggy company in 1872.

In 1876, Elwood Cox, E. Cox, E. A. Snow, J. J. Welch, R. R. Ragan, H. A. White and R. P. Ragsdale were working in the factory, and our directors were J. S. Howard, foreman, and a man named R. H. Davis.

The building was destroyed by fire in 1883, but the company continued to operate in a new building which was erected in the same year.

Our directors in 1883 were R. H. Davis, E. G. Field of an acre lot, and a man named R. H. Davis.

Our directors in 1883 were R. H. Davis, E. G. Field of an acre lot, and a man named R. H. Davis.

In 1883, Elwood Cox, E. Cox, E. A. Snow, J. J. Welch, R. R. Ragan, H. A. White and R. P. Ragsdale were working in the factory, and our directors were J. S. Howard, foreman, and a man named R. H. Davis.

Vast Change Wrought in Enterprise Since Early Beginnings Here

Enterprise Installs Large Modern Press To Meet Needs Of Today

Modern Enterprise Press Contains Many New And Outstanding Features

Has Followed Pace Of Progress Made In This Community

In Far Cry From Today Back To The Days Of The Small Job Press

Fifty-four years ago an editor of the High Point Enterprise, building on West Broad street, had an office a small one, perhaps a room, with a desk and a quill, and a press, a huge, slow, hand-fed one, that would print 1,000 pages an hour. On the walls were a few pictures and a huge Bibles, for the paper was religious, and a Bible was always on hand for a moment's reading. The editor would stand at the desk and hunch over the quill, careful of every stroke; the typesetter, with skill and speed, would set the lines in the typeset for the typewriter. The automatic telegraph printers, the job presses, and each paper was set in type cases and set into lines.

Today the news, gathered from all parts of the community, is printed at a mammoth press on a mammoth press. The Enterprise has just installed such a press. To meet the needs of today, the Enterprise has installed the modern Hoe Standard Pattern "Unit Type" press which print 17,000 12-page papers or 36,000 24-page papers an hour. The press has a capacity of 33,000 12-page papers an hour, and 66,000 24-page papers an hour. This replaces the older Goss rotary press which had been in service at The Enterprise for many years. Several weeks were necessary for the installation of the big press. The new building is equipped with a large, modern press has been used. The new building is equipped with a large, modern press.

The Ellison Mantle company, shown above In a photograph taken in May 1909, reveals five distinctive features. The press was printed in the business of Colonel Wescott Kotter. It was In 1916, too, that Mr. Rawley was on the staff and he became the editor of The Enterprise. Mr. Rawley who previously had been associated with the firm, was appointed editor of the paper.

The Elliston Mantle company, shown above, was in the business of Colonel Wescott Kotter. It was In 1916, too, that Mr. Rawley was on the staff and he became the editor of The Enterprise. Mr. Rawley who previously had been associated with the firm, was appointed editor of the paper. The press has a capacity of 12,000 12-page papers an hour, and 24,000 24-page papers an hour. The press has a capacity of 12,000 12-page papers an hour, and 24,000 24-page papers an hour.

This Is Positive Evidence that
HIGH POINT PEOPLE PREFER THE
HIGH POINT ENTERPRISE
They Pay For It ---
They Demand It
They Read It

MR. ADVERTISER:
The Advertising Columns of This Newspaper Offer An Excellent Medium For You To Sell Your Commodities To This Vast Audience of Possible Prospective Buyers.

*
The growth of Scouting in High Point was very significant. In 1915, the first Scout troop was organized in the city. Mr. Marr, who was an active leader in Scouting, was unable to attend the troop meetings during that time. However, he kept in touch with the activities and was very supportive of Scouting. In 1916, the troop was transferred to an executive. Mr. Hunt served as acting executive.

The second troop was organized in 1917. The troop was led by Executive Soldier, a member of the troop. Other members of the troop included Moreland Lynch, Iwlon Dutton, Thur Kirkman, and Carlton Kirkman. The troop was known as the Wesley Memorial Church, and it was organized as a socialist church. This church was located in the same building as the Washington Street Methodist Church.

The growth of Scouting in High Point was significant. In 1917, the troop was transferred to a junior executive. Mr. Marr served as the executive. Mr. Marr was unable to attend the meetings during that time. However, he kept in touch with the activities and was very supportive of Scouting.

The troop grew rapidly, and by 1922, the troop had reached a membership of 100 men and women. The troop was active in various community events and was known for its leadership in the city. The troop was active in various activities such as camping, hiking, and community service.

Today, the troop continues to be active in the community. The troop is known for its leadership and is an important part of the community. The troop has continued to grow, and it is an important part of the city's history.
Vast Strides Have Been Made In Recent Years Solution Of Recreation Problem For High Point

Among City's Recreational Facilities

The city lake remaining post at Jamestown, shown above, and the Negro Recreational park, the latter of which is shown below, serve to make High Point's park system comparable with the finest in the entire South. The recreational parks of High Point is in the direction of W. F. Bailey and the Parks and Juvenile movement.

At one of the busiest corners in the city of High Point—the intersection of South Main and West Main streets—once stood the home of W. H. Snow, above. It is a long way from this peaceful, green streets—once the home of W. H. Snow, above. It is a long way from this peaceful, city it is. Surrounded by the wholehearted spirit of energy that it is known throughout the nation.

Many words of praise for the City that is High Point will be spoken on her "Pagant of Progress" of the past 50 years and well does she deserve all the honors that shall be heaped upon her. Here has been an eventful and picturesque career; proudly has she grown and prospered in the heart of the Piedmont section. Youthful in years as compared with many other American cities, nevertheless High Point possesses a reputation for progressive energy and that is known throughout the nation.

For ten years the Thomas Mills, Inc., have worked and grown with the progressive industries of High Point. Year after year, during this period, we have constantly striven to keep a step ahead, in our particular field, as to quality and dependability, with the results that today hundreds of dealers look to us for the beautifully knit, correctly styled, wonderfully patterned, "RETRIEVER" and "CONQUEST" Horse. They are winners in the popular price field. There's quality, beauty, style and profit in every pair. The Thomas Mills offer no other kind of merchandise to the trade.

Our Compliments —

To High Point — A Progressive City With A Proud History —

Many words of praise for the City that is High Point will be spoken on her "Pagant of Progress" of the past 50 years and well does she deserve all the honors that shall be heaped upon her. Here has been an eventful and picturesque career; proudly has she grown and prospered in the heart of the Piedmont section. Youthful in years as compared with many other American cities, nevertheless High Point possesses a reputation for progressive energy and that is known throughout the nation.

PROGRESS
We Are Proud Of The Small Part We Have Had In The Upbuilding Of This Wonderful City!

Though we've only been a part of High Point's industrial life for six years, it has been our fortune to grow and keep pace with our beginning. When our organization was founded, we quickly realized that in order to keep abreast with others in such a progressive community, we must be everlastingly "on our toes." We attribute our growth largely to the fact that we were operating in a city that was constantly going forward and realized that we must put forth our every effort in order to stay in front with those of you who have helped make High Point the city it is. Surrounded by the wholehearted spirit of progressiveness and situated in a city that knows not what standstill meant ... we could hardly help but go forward.

To those who've had their shoulders to the wheel for many years—we say "A Good Job Well Done" and assure you of our earnest desire to do our part in the march onward.

Furniture City Upholstering Co.

THOMAS MILLS, INC.
HIGH POINT, N.C.
50 YEARS
And A Pageant of Progress

50 years ago — after blazing the Pioneers' trail, the first furniture factory was established in High Point — THE HIGH POINT FURNITURE CO. Founded in 1888 and having passed through successive and successful stages of interesting and intense development until it has become a real factor in making this community known far outside of its own environs.

In commemorating 50 years of progress we introduced 20 groupings in modern and traditional designs that attracted considerable interest at the New York Furniture Exchange, American Furniture Market, Chicago, and the Southern Furniture Market in High Point.

As the industries of High Point progress, so progresses High Point and it is a combination of reverence for a glorious tradition, plus a vigorous spirit of Modernity that keeps the Pioneers of yesterday still in the vanguard today.
