Art Class Students Go Through Experiments

By MRS. MARTINE BARKER
Art Instructor, High Point College

Many prospective teachers and many home economists are happily accepting the fact that creative art involves the entire thinking process. They seriously grapple with the principles of emphasis, balance, rhythm, contrast, and transition in expressing their original ideas and thoughts that one is compelled to give vent to his ideas in some creative form, whether it be in music, dancing, writing, domestic arts, decorative arts, graphic arts, or what have you.

In the art classes at High Point College the students experiment in papier mache, stencil, block printing, clay, plastics, plaster of Paris, coal, pastels, oils, pen and ink, weaving, and construction. When the favorite media of expression is found, the art student is then encouraged to concentrate on this means of expression until his skill is adequate to forcefully express his creative ideas.

The contributions, methods and drives of art through the various stages of world history are interwoven into the creative arts program. It develops appreciation, but also builds up needed confidence in his ability to meet the demands of his art. Every age has tried to meet the needs of its peoples for Things, Expression of Ideas, and Celebration of Emotions.

In this the atomic age, the art field, like every other field, is searching for new forms, new skills and new materials to meet the needs of present day man.

Court Upholds Law Against Criticism

BUENOS AIRES, Feb.—Argentina's government has won its first conviction under the new law penalizing criticism of public officials.

Reversing a lower court acquittal, a three-judge federal court convicted Jose Maria Cullen, Jr., Buenos Aires lawyer, of insulting President Peron. Cullen's crime is known officially as "desacato." Cullen was charged with using expressions of a personal nature offensive to the dignity and decorum of the President of the nation, in a written brief he prepared for a law case.

Commission To Study Allocation

CHAPEL HILL, Feb.—What percentage of state road funds should be allocated to cities? That question and others will be tackled by the North Carolina municipal roads commission.

The commission recently organized a study group and named Mayor Victor Shaw of Charlotte as chairman. The study group held its first meeting here yesterday and named a steering committee to assist Shaw in preparing the agenda for future meetings.

Appointed to work with Shaw were David Kelly of the North Carolina farm bureau; Mayor J. Ray Smith of Monroe, President of the North Carolina League of Municipalities; Mrs. Harry Callwell, secretary of the North Carolina Highway Engineers Conference, and Mrs. Davetta L. Strode, executive secretary of the League of Municipalities.

Northern Idaho mines are among the major sources in the United States of lead, zinc and silver.
High Point College Survives After Hard Fight

Progress Of 25 Years Phenomenal

By EMMA FRANCES BABER
Assistant Professor of English, High Point College

Although High Point College can boast no "storied urns" nor "animated busts" to reveal its historical past, it can boast the slogan, "Since 1920," for the 25-year-old institution, just boasting no "storied urns" nor "ivy towers" nor "animated busts" to attract the attention of the passers-by coming by transfer from downtown structure could talk, they would naturally have some human interest stories to tell. The building was one of the city's landmarks, and the new headquarters building has everything from swimming pool to ballroom for 1,300 dancing couples.

ECKERD'S
Doffs Their HAT of HATS to
Dr. Dennis H. Cooke
High Point College
3rd President

It is our sincere hope that High Point College will make great strides—along through the years under your leadership.

Library Facilities Today
Include 17,500 Volumes

The chief architectural feature of the room is the memorial fireplace with decorative mantling, making a double frame surrounding a vaulted arch. Inside the frame is a lovely oil portrait of the late Mr. Wrenn. On each side of the fireplace are smaller tables and a collection of "beautiful books.

"The "beautiful book" collection is a project financed with money collected from fines for overdue books. This is a nucleus collection of attractive editions of the classics and other beautifully illustrated books. This serves as a browse list for students.

Furniture in the library was made possible by the bequest of Mr. A. S. Pickard of Lexington. The sturdy oak tables, rectangular and in two sizes are especially designed for library use. Windsor-type arm-chairs are comfortable as well as inductive to study. Steel etchings, olive green in color house that present 17,500 volumes which are all located on the main floor and are open to the students. Five additional sections of shelving were added recently to take care of the rapidly increasing collection.

Another feature of the library is a large glass display case in which creative work of students, faculty and townspeople has been exhibited. These displays never fail to create a great deal of interest, and some of the creative work has been the product of one large leathercraft, old glassware, after-dinner coffee spoons, stamp collection, shellography, art work by students as well as an exhibit of beautiful oil paintings created by Dutch masters.

The library has its social life as well as its intellectual life, and since the arrangement of the building the lending itself as well to social functions, many less are given here for church groups, faculty and administration, and students groups.

If you are one who thinks life is always dull among all these homes you might look over some of the following interesting and stimulating reference questions which are daily asked of librarians and which keep them busy going from the World Almanac to Mother Goose Rhymes:

1. How to dissect a pig; address of company that makes ballet shoes; origin of North Carolina state motto; the pin alley; number of magazines published in the United States in the past year; dimensions for a basketball court; a "mushy" story; military campaigns of Julius Caesar; care of Parent magazine; inscription on the main post office in New York City; leper of the deepwood; canning and preservation of fish; suggestions for making favors for hospital trays; places of interest to see in New York City; address of company where milk - glass may be obtained; color scheme for a bathroom; wonders of the modern world; famous love letters; address...

Two Library Scenes: Pictured is the Wrenn Memorial Library at High Point College, also a view of interior, with students doing research.

Felicitations to Dr. Dennis H. Cooke, President of High Point College.

We wish you a long and successful administration.

Dr. Dennis H. Cooke.
Business Administration Serves Local Concerns

By DR. GEORGE H. HOBART
Head of the Business Administration Dept., High Point College

In the Business Administration classes of High Point College, scores of young men and women are preparing themselves for successful roles in the business life which centers in this thriving section of the state. Here they are meeting the growing requirements of business for more college training. Here they are steadily building a backlog of candidates equipped to fill the present demand of industry for personnel to meet its ranks.

Two important objectives characterize the training which this growing department offers. The first is to supplement the needed cultural background which the other college departments supply. It is not enough to offer specialized business training. The student must be trained in the fundamentals of business, based on English, history, religion, sociology, philosophy, the natural sciences, and the languages, in order to equip himself for a well-rounded life in the business community.

The second objective of the department is to supply a more practical training for entrance into secretarial work, jobs in industries, and in the general business world.

To fulfill these objectives, the curriculum comprises a wide range of background, or introduction courses, followed by more specialized courses which lead to a variety of business fields. The foundations laid by the Open House course, Introduction to Business, Business Math, Business English, Typing, and Secretarial Training, are the special fields of Mr. Daniel W. Braithwaite, whose graduate degree is from Cornell University. Industrial and Personnel Management, Accounting, and Business English are taught by Mr. Gordon E. Beh, who has a B. S. degree from the University of North Carolina at Chapel Hill. Shorthand, and Transcribing machines, and typesetting are available for special machine drill. All courses in the department are maintained through numbers and work in which the student can maintain complete record of the courses taken.

They learn about business at High Point College. Special courses include Advanced Business English, Business Law, and Principles of Accounting, Retailing, Insurance, Cost Accounting, and Business Finance. Such courses facilitate the student in selecting the field of work in which he is most likely to succeed.

A healthy development of the Business Administration Department is apparent since the end of World War II. Veterans, aided by the G. I. Bill, have found High Point College a sympathetic place in which to gain a thorough training for a business career. As more and more of these veterans have been graduated, their ranks are being filled with recent graduates from high schools.

Business men, too, are finding here a full response to their needs for college-trained young people. Their demand for more preparation in accounting has resulted in the offering of advanced courses so that the student now has available courses in income tax accounting, cost accounting, auditing, and governmental accounting during a 4 year course. Business offices have asked for more training in the operation of office machines. Types of calculating, duplicating, and bookkeeping machines most frequently found in offices of today have been provided for special machine drill. Accounting, and Business Law are taught by Mr. George A. H. Coburn.

A PAT ON THE BACK TO HIGH POINT COLLEGE'S THIRD PRESIDENT

Dr. Dennis H. Cooke
Dr. Dennis H. Cooke
And to an ever growing educational institution which is High Point College.

Recreational Activities
Feature Life In College

By ANTVIA WITHEERS
Student of High Point College

The new student at High Point College will find that, besides having in study and attend classes, he will have many opportunities for important activities of a recreational nature.

There are enough activities offered by High Point College for every student to take an active part; the chief problem seems to be finding time to take in all that is desired. While dormitory students have the advantage, as they are on the campus for a greater length of time each day, many of the activities are planned so that all students can participate.

"The least way to the bookstore," is one heard often around the campus. The building which houses both the bookstore and the student center is a most popular one; the bookstore, especially, is the hub of campus life since it is open in the morning during classes, as well as, at other times. If one has an hour between classes, he is likely to head for the bookstore for a soft drink or to meet his friends. Luckily in one he finds space for dancing or he finds a seat in a booth.

The upper floor of the Student Center houses the student activities center, which is open in the afternoon and early evening, Ping-pong tables take up one side of the large room, while tables for card games and checkers are set up on the other side. The Jakeblum furnishes a place for dancing and comfortable lounges from time to time, informal dances and parties being held for all. Tennis, shuffleboard, and horseshoe pitching courts are located within a small area close by. All of these the students enjoy, whether in an active role or as a spectator. Another favorite pastime is to watch the regular varsity teams make campus live even more exciting. The upper floor of the Student Center is desired. While dormitory students have the advantage of informal gatherings many times during the day and night, and have opportunities for making campus live even more exciting, the fraternity houses have their own organization, and separate parties during the year. The girls have a club room in the main building which is the location of some study and much fun.

While all of the students enjoy "The Zenith," the annual, and "The Hi-Po," the student paper, those publications serve to give interested students a special outlet for energy and ability. Those who continue these publications find they make campus live even more exciting. The student activities center is the center for activities of all classes each sponsor a dance. Each class annually elects a Queen and a May Queen are chosen to combine their dance. On special occasions such as Homecoming, Christmas, and May Day, other dances are held. A Homecoming Queen and a May Queen are chosen to reign at their respective dances. The activities center is the site of all classes. It is annually elected as the representative for the big beauty contest that is held for Miss High Point College.

Lucky is one if he flock space for dancing or finds a seat in a booth. The least way to the bookstore is one heard often around the campus. MOTHER WINS NEW TRIAL IN DEATH OF INFANT DAUGHTER

ATLANTA, Feb. — A 23-year-old mother has won a new trial after serving six months of a life sentence for the murder by starvation of her infant daughter. The Georgia supreme court has set aside the sentence imposed last August in rural Jackson county against Mrs. Myrtle Gee Jackson.

The guilty verdict of second degree murder was charged by the state of going out with her two-year-old daughter "in various stages of undress," leaving her young daughter helpless and dying from neglect. A physician testified that the child, two-year-old Martha Ann, died of starvation and malnutrition.

The supreme court rules that evidence given the jury that the young mother operated a disorderly house was prejudicial without showing it to be a "well planned or scheme to commit the crime."

Hospitality
LONDON, Feb. — The manager of a hotel at the schoolers exhibition in London left his office for a few minutes to save an occasion to speak to a boy. When he returned he found that a 12-year-old boy was using his phone for a long distance call to his home in Scotland. He was talking, . . . , and the facilities for visitors here are extraordinarily good."

Livestock and poultry need water as badly in winter as in summer.
College
Has Strong Faculty

By DR. LINCOLN LORENZ
Head of the English Department

A spirit of breadth, reflecting many influences which range from the local community to the distant parts of the nation, and foreign countries, is the faculty of High Point College and promises well for the growth and importance of the institution.

While the student body is predominantly from High Point and its environs, the many places of local and residence and the diverse college and university training, undergraduate and graduate, of the members of the Faculty reveals an astounding cosmopolitan without loss of a definite characteristic.

Faculty members have lived, studied, and taught in parts of the nation and foreign countries. Geographically, they are from Texas, Pennsylvania, Washington, Massachusetts, California, Texas, Michigan, and many of the South Carolina, Virginia, and Tennessee. All the major universities of administration are North Carolinians.

Of the administration members, Dr. Dennis H. Cooke, the president, is a native of North Carolina and holds his B. A. and M. degrees at Duke University and taught many years in Pennsylvania. Another president, Mrs. Clara L. Whitaker, now matron of Woman's Hall, is a native of High Point, and has taught in High Point College since 1925. Mr. James H. Race, Director of Athletics and Head Coach, has his A. B. degree from Western Maryland.

The only native of Tennessee on the faculty, Dr. Evaline M. Adams, Professor of Modern Languages, has his A. B. degree from the University of Tennessee and Arkansas. It is worthy of note that such institutes from High Point and its environs, the many places of local and residence and the diverse college and university training, undergraduate and graduate, of the members of the Faculty reveals an astounding cosmopolitan without loss of a definite characteristic.

Of the administration members, Dr. Dennis H. Cooke, the president, is a native of North Carolina and holds his B. A. and M. degrees at Duke University and taught many years in Pennsylvania. Another president, Mrs. Clara L. Whitaker, now matron of Woman's Hall, is a native of High Point, and has taught in High Point College since 1925. Mr. James H. Race, Director of Athletics and Head Coach, has his A. B. degree from Western Maryland.

The only native of Tennessee on the faculty, Dr. Evaline M. Adams, Professor of Modern Languages, has his A. B. degree from the University of Tennessee and Arkansas. It is worthy of note that such institutes from High Point and its environs, the many places of local and residence and the diverse college and university training, undergraduate and graduate, of the members of the Faculty reveals an astounding cosmopolitan without loss of a definite characteristic.

Basketball Team Holds Limelight; On Rampage

By BILL HACKNEY
Enterprise Writer, High Point

The big news in High Point college athletics at this point in the school year 1949-50 is primarily from two things, the sensational basketball team that came within one game of tying a modern state record, and the resignation of athletic director and head coach Ralph James along with the subsequent hiring of C.Q. (Tex) Smith from George-town college of Kentucky, although Smith will win his try at the local institution for another two weeks to assume his duties.

On the other hand, the recent season is better forgotten by the Panthers. They missed most of the action in the opinion of most Purple Panther fans and teams. They did win one game of a 10-game slate, and tied two others, finishing eighth in the nine-team conference.

The third of the big sports, football, will be under a new coach next month when a new coach, selected by incoming mentor Smith, is expected to take over. The new head coach is expected to handle football and basketball only during the two sport, and only during the fall.

Last spring the Panther basketball team finished near the center point in the conference standings which has never been its place. This spring, the material on hand makes it probable that the 1950 team will be able to move two or so seasons, though still about the middle of the championship. But no concrete building program has developed about basketball as it has about the top two sports, and fans, if any, scholarships are needed out to promising young stars of the diamond.

Had High Hopes

Things were different last fall when football came along. Fans and alumni held high hopes for the 1949 Panthers, and insisted that they would better the 1948 record of five wins, three defeats, and two ties. Approximately two dozen lettermen were on the scene as the season started.

But Coach James' team got off on the wrong foot. losing to Western Carolina by two touchdowns and the Catawbas went on to take the crown. Newberry, and the Panthers finished out of the win column, 107-0, against a pitifully weak Pope Field Air Base team. Then the turning point came along. At their peak, both mentally and physically, the Panthers staged a terrific struggle before bowing by 6-0 to Catawba on an 86-yard punt return.

The team never fully recovered from that heartbreaking loss. Lemon, Rhyme and Appalachian followed Catawba with wins. Then the Panthers had another good night, rolling to a 14-6 lead over favored Guilford in the third quarter. It wasn't enough however, and the Quakers came back to tie on long passes in the final 33 minutes. A tie with E.C.T.C. and losses to Elon and Wofford finished the year.

In truth, the Panthers owed their record number of setbacks to the terrific improvement of the conference as much as to any deficiency in coaching or playing. While most of the other eight clubs were bickering over rosters, High Point fell behind, depended more and more on older men had been top-flight in the first years, and had no top men to hold their own in the foot race.

No Unbeaten Team

Concerning next year, football prospects look bright for an even better year than this year, with the intersectional foes. One thing is certain, the Panthers can't be expected to climb the unbreakable ladder in 1950.

Coach James started the basketball season with a group of players, few of whom were considered stars in their own right. The first five was made up of a third string front center in 1949, another hustling Jayvee, a four-to-five guard, a flashy push shooter, a former football guard, a flashy push shooter, a former football guard, and a flashy push shooter, a former football guard, and a flashy push shooter. The remainder of the squad had no seriously good men excepting the stars.

But the first five blended into a miracle team, a cohesive band of well-conditioned athletes who played together as though they could read the other fellow's moves and the map. The help must be allowed him by college officials and the support by students and alumni. And miracles, even improvements, will take time. With all that, athletic prospects at High Point should reach a new high within the next few years.

Eggs are such a nutritious and plentiful food these days that they should be used often. Serve them in an omelet with a tomato sauce for lunch, or in a cheese souffle for supper.

**Distinguished Writer Heads English Division**

As a scholar, an author, a poet, a teacher, and a脲ureau-dela writer, Dr. Lincoln Lorenz, the head of the English department of High Point College, has brought distinction and prestige to High Point college in the field of English. He has a rich cultural heritage as one of a family of Harvard men. The son of a manufacturer, he spent his early life in a suburbian home in Philadelphia and later moved with the family to New York City. As a scholar, he completed the work of his high school in three years, was the class day orator, and achieved distinction in debating. From Harvard he received the A. B. degree magna cum laude in English, writing his thesis for honors on the subject Comedy in Shakespeare. From the same institution he received the A. M. degree, and later from Stanford University the Ph. D. degree in English. During his scholastic career he has been recognized for his ability as a teacher, scholar, orator, and an aggressive writer. For his dissertation for the Ph. D. degree he chose the subject The Technique and Spirit of the English Historical Novel from its Origins to Scott. As an author, besides his A. Th. thesis and his Ph. D. dissertation, he has published many books, poems, magazine articles, news clippings, and personal manuscripts. In volume form, his work has been published by the University of Wisconsin. His poetry has appeared in literary magazines, college yearbooks, and various periodicals.

**Cotton Spinning Industry Shows Gain Over 1949**

**WASHINGTON, Feb. 15—** The Census Bureau reported the cotton spinning industry operated during January at 130.3 per cent of capacity on a two-shift, 80-hour work week. This compared with 124.7 per cent during December last year, and 112.0 per cent during January last year.

Spinning spindles in place Jan. 31 totaled 23,286,000, of which 20,270,000 were active consuming cotton on the last working day of the month, compared with 23,314,000 and 20,521,000 for December last year, and 23,754,000 and 29,927,000 a year ago.

Active spindle hours for spindles consuming cotton for January totaled 9,951,000 compared with 9,206,000 for December last year and 8,560,000 for January last year.

**GO TO SCHOOL?**

**PEARL HARBOR—H. J. Education** has arrived in the U. S. Trust Islands of the Pacific—and everything went to go to school. Over 440,000 schools and 1,247,000 teachers. Why, they want to learn English, but no, they can't teach in English. They want to learn arithmetic, so they can tell they're making money.

The heads of school districts in the Marshall, Trust, the Palau Islands, and the Carolinas, have all set up an educational conference sponsored by the New York Times. The U. S. has taken over the islands from Japan.
Many Ministers Go Out From High Point College

By DR. P. E. LINDLEY
Professor of Religious Education
High Point College

Since its very beginning, High Point College has maintained a regular department of religious education and ministerial training. More than a hundred ministers have gone out from the local institution, and there are now enrolled for the same purpose.

Ministerial training, therefore, occupies a large place in the program of study at High Point College. Courses are offered in Old and New Testament, psychology of religion, ethics, Christian thought, church history, and other related subjects. And while no effort is made to take the place of the theological seminary, the department of religious education does lay stress on a broad cultural and academic program designed to aid the student as he enters the profession.

The young men who are studying for the Christian ministry have organized themselves into a student ministerial association. This group is the oldest organized student movement on the campus. It meets each week for worship, inspiration, and fellowship. Leading churchmen of the city are invited from time to time to visit these meetings and bring messages of practical instruction to the men.

Many Ministers

But the religious training is by no means confined to the young men. Many young women, looking toward a full-time career in church work, also receive special instruction at High Point College. In recent years the demand for directors of religious education in local churches has outrun the supply, and our institution is helping to meet this demand. Already we have supplied qualified workers for churches in various parts of the state. These girls, while in preparation at the local college, have themselves together into an organization, somewhat like the ministerial students. They are known on the campus as the Religious Education Girls; and again like the young theologians, they meet regularly each week for their own programs of inspiration and professional interests.

It may now be said that the department of religious education at High Point College operates to serve four objectives. First, the training of young men for the Christian ministry. Second, to prepare young women to assume the role of directors of religious education in local churches. Third, the department gives general courses of a broad cultural interest at least one year in this department before graduating. So the studies are designed to meet the needs of any and all young men and women who are seeking a more adequate appreciation of our religious culture and heritage.

Then the fourth objective is to assist young people to become better lay leaders in their own churches and communities, irrespective of vocation and professional work. All men and women find need for a better understanding of their own religious background and a more efficient skill in carrying on church work. Our courses are designed to help these persons.

Dr. Dennis H. Cooke

Dr. Dennis H. Cooke, the third president of High Point College, is shown in a scene in the club room of Woman’s Hall, as some of the girls relax.
Chemistry Department

**Enjoys Excellent Growth**

- J. HARLEY MOURANE
  - Professor of Chemistry and Physics

By contrast with today's facilities High Point College's chemistry department in 1924 was primitive in its beginning, consisting of one lecture room and one laboratory. There were no laboratory tables, no demonstration table in the lecture room, no chemicals or apparatus available for immediate use. Thus the chemical department started from scratch. The department has grown and expanded with the passing years and now occupies two completely equipped laboratories, one of which can serve as an additional classroom, a laboratory used by research students, located in the basement of McCulloch Hall, a lecture room, and a well-stocked and arranged stockroom. Recently the department has had a face lift, in a coat of paint and the installation of fluorescent lights.

The college opened offering work towards a major in chemistry and also pre-medical training. Of the graduates prior to 1930, ten have become dentists. From 1930 to 1943 about thirty-four students were graduated, with the hope to operate on the cooperative system. The time was wrong so in 1939 the cooperative plan was abandoned in favor of the straight Chemical Engineering course. In 1943, in an attempt to unify and to continue the work of the college, the course in Chemical Engineering was dropped, offering in its place a major in Chemistry. In 1949 it was considered best for the interest of the college to offer only two degrees, and AB and a BSc therefore the major in chemistry was dropped.

From 1930 to 1943 about thirty-four students were graduated with either engineering degrees or with majors in chemistry. This group scattered well over the United States, and represent placements in such organizations as Proctor and Gamble, Du Pont, Hercules, Sargent, and the Atomic energy projects of Oak Ridge, Chicago, and Washington, D.C. During this same period, twelve pre-medical and pre-dental students were placed in dental schools. One third of these have located in High Point.

From 1943 to date twenty-two chemistry degrees have been awarded. Many of this group are working in the chemical laboratories of the industries of High Point. During this same period twenty-eight received their pre-medical or pre-dental training, and of this number, ten have become doctors and four have become dentists.

The courses in chemistry are difficult, stress being laid upon the fundamentals and thorough grounding in the basic principles. An opportunity is given the student in the senior year for elementary research. Problems dealing with dyes, paints, bleaches and waterproof coatings for cinder blocks have been studied and worked upon in the past. The result of all this training is that the chemical students have been able to compete successfully with students from other schools and have been able to advance rapidly in their chosen fields of work. The pre-medical and pre-dental students who have completed their professional training have all proved to be a credit to both their professional school and to High Point College. The chemistry department always has a place for the ambitious, scientifically minded, serious student who would like to follow chemistry as a profession, or who is interested in pre-medical or pre-dental training.

**EXPERIMENT COMING UP:** Pictured is a scene from the chemistry stockroom, where Professor J. Harley Mourane, foreground, and William Queen, chemistry major, are picking out material to be used in a chemistry experiment.

HIGH POINT COLLEGE

upon the inauguration of

DR. DENNIS H. COOKE

AS PRESIDENT

Few events occur during the life of a college which are as important to the college or the community in which it is located, as the installation of their President.

Even fewer opportunities arise for a business firm to express their appreciation for the close association which has existed over a period of years.

Therefore, we wish to take this opportunity to express our most heartfelt congratulations to both High Point College and Dr. Dennis H. Cooke and wish them many years of mutual success and prosperity.

Dr. Dennis Cooke Spends Entire Life In Education

**Dr. Dennis Hargrove Cooke**
President, High Point College

At precisely the hour of 3:30 p.m. on February 23, 1950, High Point College will officially have a new president. For at that moment Dr. Dennis Hargrove Cooke will have received the "Charge from the Board of Trustees" at the hand of the chairman, L. F. Ross, and will have then made his pledge of loyalty to its cause and purposes.

From that moment, also, the destinies of the 75-year-old Methodist institution will lie for an unnumbered period of years in the hands of Dr. Dennis Hargrove Cooke. In general it is the consensus that the future of the college can be in no more capable hands; for Dr. Cooke has spent his entire life in the field of education, and few men have accomplished as much in so brief a span of life as he has the 46-year-old newly inaugurated president of High Point College.

Cooke is a native North Carolinian, and before coming to High Point, the present home of his father, Avery L. Cooke, to receive one of the highest honors the city could bestow upon him, the presidency of its greatest cultural center, he has had a varied and useful career in the educations. His home town of Maiden, North Carolina, is the home town of "his wife, Alice Keener Cooke, has two administrative problems.

**Series of Arithmetics for the Eight Year Olds**

In an advisory capacity he has prepared and administered south-wide educational administrators' conferences at Peabody College for 10 years, involving approximately 5,600 people each year.

He holds membership in the professional and honorary organizations of Kappa Delta Pi, Phi Delta Kappa, Southern Society for Philosophy, Psychology, and Education, American Psychological Association, American Educational Research Association, National Education Association, American Association of School Administrators, and North Carolina Education Association.

Dr. Cooke is a member of many state and national educational committees including the research committee of the North Carolina College Conference and in the General Editor of the Educational Trends Series of Books in Education. He has made educational speeches in 34 states and has prepared and administered south-wide educational administrators' conferences at Peabody College for 10 years, involving approximately 5,600 people each year.

He holds membership in the professional and honorary organizations of Kappa Delta Pi, Phi Delta Kappa, Southern Society for Philosophy, Psychology, and Education, American Psychological Association, American Educational Research Association, National Education Association, American Association of School Administrators, and North Carolina Education Association.

He is listed in Leaders in Education, Psychological Register, The Who's Who in the Negro Schools in North Carolina, President of the Teaching Personnel, Undergraduate.

The best known of his publications are: The White Supremacy, The Negro Schools in North Carolina, President of the Teaching Personnel, Work in Problems of the Teaching Personnel, Practical Problems in Managing Teachers, Minimum Essential Statistics, As Applied to Psychology and Education, Principles of School Administration, Administering the Teaching Personnel, Undergraduate.

The cultivation of good faith and good will is of monumental importance and I know of no other organization but the Red Cross which has the power to spread the good faith and the good which are essential to peace. Fund collections begin officially March 1.

Angel Falls, in Venezuela, drops 3,212 feet, 15 times farther than Niagara Falls.

**JUST LOADING! That's what the students pictured here are doing in the High Point College Book store, a popular rendezvous.**
Modern Language Dept. Means Much to High Point

By J. HOBART ALLED Professor of Modern Languages

At first thought it might not be realized that the High Point College Modern Languages department fills more than an academic responsibility as part of the college curriculum. On the contrary it has been one reward of the department that it has been able to assist High Point business men and citizens in a variety of ways. Many times, both business and personal, are translated for local residents. We are often asked for the correct pronunciation of words in the various languages. Furthermore, our teaching has not been confined to the college. We have found time to offer extension courses and adult education classes; it has been possible to tutor individual students and at times teach languages during the summer term at the local high school. These opportunities arise because at the present time the language field of the three departmental professors embraces not only Spanish, French, Italian, German and Portuguese but also Greek and Latin.

Already growth of the college has brought one challenge after another to the staff, small in number, and it is with gratitude that we have been able to serve the college, and then extend our efforts into the community for as long and energy would permit.

The High Point College Visual Department opened in 1948 with the teaching of Professor N. P. Varborough joined the faculty the next year to teach languages. It has brought one challenge after another to the staff, small in number, and it is with genuine pride that we look back over the record. Professor of Modern Languages Dr. David M. Driver was added for another full-time professor, and it is with genuine pride that we look back over the record.

Video Cameras Perform Tricks

NEW YORK—(AP)—The television camera, heart of which is an electron tube, is beginning to do the dirty. In the latest film, the pro-French and anti-Spanish atmosphere and love for fine teaching and hard work brought more strength to the department.

For several years Spanish has been the most popular language at the college. This is perhaps because of our nearness to Latin-American countries. The literature of both Spain and Latin-America is taught in Spanish classes, and conversation and commercial Spanish emphasizes the living language. To foster interest in Spanish-American countries, we have a Spanish club that meets twice a month.

Infirmary Able to Take Care Of Numerous Ill Students

Located in the west end of Women's Hall is the Infirmary of High Point College. It consists of one room, with two single beds, one small room for the dispensary and a bedroom for the nurse. With the admission of the pre-vocational supervision of Miss Myrtle Braithwaite at Penny Hall, the infirmary serves the 300 students on the college campus. The infirmary serves the 300 students on the college campus. The infirmary serves the 300 students on the college campus.

For the 211 men on the campus both at Penny Hall and McCulloch Hall, Nurse Myrtle is there whenever she is needed and is asked by the pre-medical students in the boys’ dormitory and by Mr. David Braithwaite at Penny Hall. All in all, she has a run-of-size job and meets it admirably.

Says Marriage Ideas Spoiling American Women

GAINESVILLE, Fla. — (AP)—American women are spoiled, says Dr. Perihan Cambel, Turkish-born associate professor at the University of Florida. "In America," she says, "a woman thinks only of getting married." In Europe, a woman thinks first of her career. Dr. Cambel says Turkish women who attend the Universities take military training in summer, learning marching, shooting, radar, nursing and food service, and many have entered the navy. "But wrong ideas you have about Turkey do not compare with ideas we have about America. You have no conception of the warp and weft picture of American life one gets from seeing only Hollywood movies. Everyone lives in skyscrapers, wears fur coats and there is gold in the streets."

Congratulation! High Point College

High Point College Laundry

High Point’s first laundry — also growing with High Point. We are in our thirty-first year.
Speakers for Inauguration Hold Top Positions In Religious and Educational Worlds of the Nation

Six individuals who rank near the top in the cultural and spiritual world of this nation will be present at the inauguration of Dr. Dennis H. Cooke as the third president of High Point College next Thursday afternoon. At 2:30, when the college authorities hold one of the most impressive ceremonies in the history of the school.

Two of the speakers, Dr. Arthur Holli Edens, and Dr. Goodrich Cook White, are presidents of two of the leading Methodist Institutions of the country, Duke and Emory universities, respectively.

Dr. John Owen Gross, another speaker, is a former college president, University of Kentucky, and at the present time is executive secretary of the Division of Educational Institutions Board of Education of the Methodist Church. Outstanding churchman as far as this section is concerned, to speak at the inauguration will be Bishop Costen Jordan Harrell, of the Western North Carolina Methodist Conference.

J. Benjamin Schmoker, prominent Presbyterian churchman, a native of Iowa, and Levien Preyer, of Athens, chairman of the High Point College Board of Trustees, who will deliver the charge from the board of trustees round out the list of speakers.

J. BENJAMIN SCHMOKER — A native of the state of Iowa, he completed his undergraduate work at the University of Minnesota, followed by graduate work, first in the field of history and later in psychology. He served as a special lecturer at Harvard University, St. Paul, Minnesota, a co-educational college affiliated with the Methodist Church. In 1932 he became the executive director of the YMCA of the University of Minnesota and was responsible for formulating a guidance program affiliated with the personnel department of the university. In 1935 he was appointed co-director of religious activities of the University of Minnesota. During the war years he served with the Emergency College War commission and was responsible for a manual on guidance and group activities used widely by military trainers on college campuses. In 1942 he became the Program Executive of the Metropolitan Board of the YMCA of Minneapolis. In 1946 he accepted the executive di

College Plays Big Role
In City’s Economic Life

To the credit of High Point citizens who envisioned and worked in 1924 for the establishment of a college here, it may be said that only minor emphasis was placed on the prospective institutions as an economic asset.

The original handbill of zealous townspeople looked on a college as an educational opportunity, a cultural center, an aesthetic asset with beautiful buildings, an expansive campus and attractive landscaping, all of which has come true.

But the financial dividend which High Point College has paid is too obvious to be overlooked. While generous local well-wishers subscribed almost a quarter of a million dollars in cash, in four financial campaigns between 1924 and 1945, college operations and student expenditures are estimated at twenty times the cash subscriptions. Thus between four and five million dollars have flowed through local commercial and banking channels as a result of locating the college in this city.

In an actual calculation made in the mid-forties it was disclosed that the college itself was an immeasurable customer of local suppliers, retailers and wholesalers. Pur- chases for cafeteria operation run into a substantial figure. Supplies for classrooms, departmental and building use represent a consider- able sum. Salaries for college principals and compensation for employees increase the total until all or all is calculated that the institution itself is a source of more than $225,000 annually.

Another economic value of High Point college is particularly emphasized for local families whose sons and daughters find both convenience and economy in attending the college here at home. Presumably their expenditures at an out of town institution of the kind would be at least $175 for personal pur- poses. With 212 registered in the first semester of the 1949-1950 college year from High Point alone, the saving to local families is obviously substantial and the student purchasing power has been enganged in local business circles.

Considering that in excess of 600 High Point young people have graduated at the college, it is estimated that well in excess of $100,000 has remained in this city which otherwise would have been distributed in other college towns. As a value within itself High Point college has advanced materially since those days when it was launched with the gift of real estate for a site, and $150,000 in cash.

Our Heartiest Congratulations to Dr. Dennis H. Cooke, 3rd President of High Point College

We Wish to Extend
VERY BEST WISHES
and
CONGRATULATIONS
to
High Point College
and
Dr. Dennis H. Cooke
as he is inaugurated as Third President of High Point College

McCrary
Hosiery Mills, Inc.
Asheboro, North Carolina
Manufacturers of Famous McCrary Seam-Reminder Stockings
In Appreciation

To all the citizens of High Point, who, by their financial aid have supported High Point College from the initial gift of a tract of land and $100,000 to bring the college here twenty-five years ago, through campaigns for funds, and for many individual gifts of large and small amounts. To the even larger number of citizens who have given evidence of their faith in The College by enrolling their sons and daughters as students, and to all others, who have, by words and acts, supported the institution.

To the churches of the city for their prayers and spiritual help and guidance. Especially, to the "Mother-Church," the First Methodist, formerly the First Methodist Protestant Church, whose members and pastors, from the beginning, have loyally and faithfully supported the college in every way. To all the Methodist churches, which, since the union of Methodism, have been even more zealous in their periodical and systematic financial aid, as well as in their assistance in other ways.

To the loyal and devoted alumni, who, though young and relatively small in number, have given to The College both a visible and a moral support which could be coveted by many an older institution.

To every agency and individual in High Point, which has helped High Point College to grow from a small, struggling college with not a tradition except the faith of its founders into an institution of importance, a center of the education and culture of High Point, to which every citizen of High Point may look with justifiable pride.

To you all our sincere and enthusiastic appreciation.

HIGH POINT COLLEGE
EXECUTIVE COMMITTEE, High Point College Board of Trustees: From left to right: Horace S. Haworth, H. F. Hunsucker, Arnold J. Koontz, L. F. Ross, chairman; Dr. Dennis H. Cooke, president High Point College; F. Logan Porter, G. H. Keen, Dr. C. L. Gray, Charles L. Amos.

Program of Inauguration

OF

DR. DENNIS HARGROVE COOKE

as President of High Point College

HIGH POINT, NORTH CAROLINA — FEBRUARY 23d, 1950

Home Economics Is More Than Science of Cooking

By MISS ADA R. JOHNSON
Head of the Home Economics Department
High Point College

Home Economics at High Point College is one unit of the very great Home Economics movement, which has begun over fifty years ago and is now international in its scope. This movement in Home Economics began at the request of the homemakers themselves and receives its great strength and support from today's home makers, who are looking toward "New Horizons for the Family."

As college authorities view it, the science of Home Economics is far more than just cooking and sewing classes. There are over one hundred positions open to home economics trained people. Developments are taking place constantly in all the different phases of Home Economics.

Control of Foods

There is study of the food and temperature conditions in modern foods. We know how to cook to save vitamins; to plan layouts for rooms, for schools, kitchens; to save time and fatigue in steps while at work; and to install electrical equipment in rooms for efficiency.

High Point college uses the Five-Year-Board-Plan in obtaining electric equipment for the Home Economics department. This plan gives up-to-date models each year.

High Point College gives the basic courses in Home Economics which are taught by Miss Ada R. Johnson at High Point College, North Carolina for the "A" State Teacher's examination. Graduates receive from the State Department of Education at Raleigh, the certificate for teaching home economics.

High Point College Home Economics courses are taught on the basis of giving girls training for homemaking. These courses cover the fields of foods, clothing, house-planning, interior-decoration, and management; child development, new horizons for the family, economics of the home, nutrition, and methods for teaching homemaking in the regular school. "Practical Home Economics" is a required course in the major programs of all girls. There are two departments in the department of Home Economics. The Home Management Department teaches homemaking classes and the Child Development Department teaches child development classes.

Home Economics at High Point College makes an average for the past ten years of five graduates per teacher per year. This number of graduates is higher than the average per teacher per year in the large institutions. In fact, it is higher than the average number of graduates of all the home economics departments.

Over a period of nine years, High Point College has had an average of five home economics graduates per teacher, per year. In the last nine years, to date, the home economics majors number nearly 35 per cent of the women enrolled. High Point College makes this requirement of 10 per cent of girls enrolled and some home departments have exceeded this ten per cent.

High Point college uses the "Jack and Jill Nursery" in High Point for the child development classes. In a practice house for its senior girls, called "Hill Hall," the Home Economics Department at High Point College is equal to, and sometimes exceeds, the accomplishments of larger and more established Home Economics programs in institutions.

Hearty Congratulations TO BOTH

DR. DENNIS H. COOKE

And Your New President

Speakers Are Leading Educators

(PRIMARY PAGE FOURTEEN)

In the Presbyterian church U.S.A. He is a frequent platform speaker at summer conferences of church groups and related agencies. He is author of many articles, largely dealing with the problems and needs of youth. He serves as a member of the Board of the National Association of Foreign Student Advisers.

— A survey disclosed that nearly one out of every five Kansas University coeds is self-supporting. It was at the World Sunday School Convention in Washington, D. C. He is a frequent platform speaker for over 25 years ago. This is the way it looks today, four days before the inauguration, Thursday, of Dr. Dennis Cooke as the third president of the college.

President Cooke Maps Course Of College for Next 10 Years

By DR. DENNIS H. COOKE

President, High Point College

In this rapidly changing world, with its atomic and hydrogen problems, one is held if not foolish to try to pull aside the veil and see very far into the future. But if we must choose between becoming "bigger or better," our friends give the College enough money to expand and to improve our program, we shall improve our academic structure and" get better" before we have a right to "get bigger." If we must get better before we have a right to "get bigger," and as many instructors with advanced graduate degrees should be added as we can afford.

Heartiest Congratulations

Dr. Dennis H. Cooke
HIGH POINT COLLEGE
THIRD PRESIDENT
who will be installed
Feb. 23, 1950
At the Inaugural Celebration
at HIGH POINT COLLEGE
ROSE FURNITURE CO.
Owned and Operated by Kester Bros.
HIGH POINT ASHEBRO
THOMASVILLE

Self-Support

LAWRENCE, Kas., Feb. 14—(INS)—A survey disclosed that nearly one out of every five Kansas University coeds is self-supporting. It was at the World Sunday School Convention in Washington, D. C. He is a frequent platform speaker for over 25 years ago. This is the way it looks today, four days before the inauguration, Thursday, of Dr. Dennis Cooke as the third president of the college.

We are not allergic to becoming a larger institution, but we must "get better" before we have a right to "get bigger." If our friends give the College enough money to expand and to improve our program, we shall improve our academic structure and as many instructors with advanced graduate degrees should be added as we can afford.

SUN IN LONDON

LONDON, Feb. 17.—The sun finally broke through to London today. It was the first rainless forenoon in the last 17 days.

Luther Burbank experimented with popping sorghum like corn.
Music Plays Major Role
In H. P. College Life

By ALBERT WOOD,
Head of the Music Department,
High Point College

It is 10:20 a.m. any Tuesday morning at High Point College. The whole school is assembled in the large Harrison Gymnasium. Little by little the "crowd" noises subside to a hush of anticipation. Then, almost imperceptibly, you are aware of voices, soft and sweet, raised in a chorus of lovely harmonies. It is the College Choir engaged in one of their principal duties, opening the weekly all-college Assembly. Thus, music touches, and affects the lives of the entire High Point College family.

By Albert Wood

COMMITTEE CHAIRMEN: Pictured are the chairman of the three major committees arranging the inauguration of Dr. Dennis Cooke as third president of High Point College.

In spite of the fact that the full-time teaching staff numbers only two, there is a wide selection of courses to choose from. Should a student want to compass courses in this field are offered, - all the way from elementary harmony to counterpoint and free composition. If he aspires to be a choral, band or orchestra director he may register for conducting, and, along with practical instruction in this interesting art, receive actual practice in handling instrumental and choral ensembles. Private instruction in piano and voice is available to anyone whose talent warrants the intensive effort it takes to develop a first-rate soloist.

If there is any study so fascinating, and so rewarding, as music? Considering the great "kick" that musical performers so obviously get from the exercise of their art, is there any voice, soft and sweet, that the general public is hardly to be blamed for imagining that music is a progressive institution. In the opinion of a member of the college faculty and visiting artist, prominent in the campus. In addition to proof studios and practice rooms there will be several rehearsal halls large enough to accommodate the personnel necessary for any theatrical production. There will be a fine concert organ, with a movable console. The stage will be spacious, and will have all the modern devices of stage craft needed for the presentation of concerts, plays, operas, and operettas. The faculty will consist of six or more competent musicians, each expert in his field. Concerts by faculty members and visiting artists will be a regular feature of the campus. In addition to music, the college will not only be a center for the training of music teachers, but will be the focal point for serious musical activity in this part of the state. A dream? Perhaps, - but all that man has built started as a dream, or a mental concept, if you will. Already the first steps have been taken toward making this dream reality. Some time this spring work will begin in a temporary Music Building. Ten years from now, - who knows?

MUSIC MAJOR: Pictured is Miss Frances Dearman, a music major student.

We congratulate High Point College and Dr. Dennis H. Cooke.

Best wishes from

Mathematics Department Keeps Pace With Times

By LOUISE ADAMS
Assistant-Professor of Mathematics, High Point College

When High Point College first opened its doors to students in September 1924, Dr. McCulloch was head of the Mathematics Department. Dr. McCulloch was a native of Guilford County, North Carolina, and a graduate of Adrian College, Michigan. Dr. McCulloch was a very versatile person; a minister, a teacher, the editor of a church paper, and a mathematician of exceptional ability.

Dr. McCulloch offered a variety of mathematics courses for the 122 students enrolled at High Point College during the first year of operation, but he taught only one year, returning, to Greensboro to devote all his time to editing The Methodist Protestant Herald.

Mr. Walter F. McDonald came to High Point College in 1925, and was head of the mathematics department for several years. The first graduating class in 1927 had one mathematics major, Clio Harwick who is now Mrs. Jennifer Harrison. During the next five or six years several students majored in mathematics and went directly into the teaching profession. Others majored in mathematics went into business fields while others went to graduate schools to take further work in mathematics.

When High Point College opened its doors to 200 students in 1933 and during the next few years the department was reorganized to provide both a major in mathematics and the necessary general education for those planning careers in the chemical industry. The following mathematics courses were offered to meet these needs: College Algebra, Trigonometry, Differential Calculus, Integral Calculus, Advanced Calculus, Advanced College Algebra, Introduction to Modern Geometry, Theory of Equations, Differential Equations, and Engineering Drawing.

A unit of the Air Corp College Training Detachment was sent to High Point College in the spring of 1943. Each cadet, in this frame, received 20 class hours of air navigation courses. During the next five years the mathematics department gave approximately 200 individual cadets 100 class hours of mathematics. Also for 12 months 40 cadets were given 20 class hours of air navigation courses each month.

The following is a list of courses taught by the mathematics department during the years 1939 to 1948. Each course is followed by the number of class hours: College Algebra, 10; Trigonometry, 10; Analytic Geometry, 10; Differential Calculus, 10; Integral Calculus, 10; Advanced College Algebra, 10; Modern Geometry, 10; History of Mathematics, 10; Differential Equations, 10; Geometry, 10; Algebra, 10; Calculus, 10; and Engineering Drawing, 10.

Each cadet in the college received 100 class hours of mathematics training. This meant that approximately 175 people were involved in these Air Navigation courses.

High Point College, R. L. Weaver Foundation, is the group of students who major in mathematics and those who get their teacher's certificate in mathematics. During the college years 1948-1949, High Point College graduated ten with majors in mathematics. Six of these graduates are now teaching in the public schools of North Carolina. The other four have responsible positions in business concerns.

EDUCATIONAL CONFERENCE: Here the mathematics department of High Point college are shown at one of their conferences.

Congratulations Dr. Dennis H. Cooke

The High Point (N. C.) Enterprise, Sunday, Feb. 19, 1950—21
3 Full-Time Professors In History Department

By DR. STUART C. DESKINS
Head of the History Department of High Point College

From a small beginning with one professor, Paul S. Kendall, and with only a few students, the history department of High Point college has grown until it now has three full-time professors, Dr. Helen H. Bartlett, Dr. Richard C. Todd and Dr. B. C. Delk, in addition to the four hundred students in their classes. This increase in both faculty and students has enabled the department to perform a vital role in the college and in the surrounding communities.

In their wider service to the community, the history teachers frequently deliver lectures and speeches to various civic groups, churches, educational and historical groups; they often contribute articles to historical journals, magazines, and newspapers; and they all belong to different historical associations whose meetings they represent the college and participate in the programs.

Research, Surveys

The history professors also serve the college and the profession in general through research and surveys. A survey in Sociology, for Vanderbilt University is now in progress and since the holidays, the department was invited by Dr. Benjamin F. Educational Editor of The New York Times, to take part in a nationwide survey on the significance of the teaching of history. Dr. F. Edward will soon appear in The New York Times, and will probably provoke as much discussion as did his similar article in 1942.

Instruction and sympathy guide the teaching of the history department, its lectures, writings and research projects. The role of the history department, its rearing of America's future leaders, its instruction and sympathetic guidance to the large number of students enrolled in its courses. To this end, the department offers courses in the various phases of the teaching of history, including the English heritage, in Sociology, in Federal government, and in the heritage, in Sociology, in Federal government, and in the surrounding communities.

Sound Scholarship

Sound Scholarship

Training of Teachers

Objective of College

By DR. C. B. BISHIRSH
Dean of Instruction, High Point College

One of the primary objectives of High Point College from its very beginning has been the training of teachers for the public schools of the state and nation. Eleven of the thirteen graduates in the first class of 1927 received teachers' certificates from that small class in 1927 to the 270 graduates in the 1959 class, approximately 60 per cent of the 116 graduates have received their teacher's certificates. Until the close of World War II, 64 per cent of the graduates prepared to teach, but the large number of G. I.'s who entered after their discharge, many of whom are planning for a business career, caused a reduction in the percentage of prospective teachers. However, not only is there a very noticeable tendency for preparing all students, but there are increasing opportunities to business for more and more men as well as women to prepare to enter the teaching profession.

The department of Education and Psychology offers all the professional courses required by the state for the primary, grammar grades and high school teachers certificates. In addition to the required courses in the school, the pupil and teaching and practical, a large number of elective courses are offered in education. A variety of topics is presented in psychology. General psychology is the beginning course. It is followed by abnormal psychology, social psychology, adolescent psychology, child psychology, educational psychology, psychology of personality, psychology of the exceptional child, and mental hygiene.

The college is able to offer such variety of courses in education and psychology because it has a well trained and an adequate teaching staff. For the first year, or two after the opening of the college only one person was employed in the department. Now there are six.

The training of teachers is by no means restricted to the Department of Education and Psychology. It offers the professional training courses and gives professional advice as to the proper training in the various subject matter fields. At the present time the college is training high school teachers in the following subject matter fields: Biology or religion, commerce, English, French, home economics, mathematics, music, physical and health education, and social science. It also gives excellent preparation for the primary and grammar grade certificates.

Of the more than 1000 graduates who have received teachers certificates, some are teaching in colleges, some are school superintendents, some are high school or elementary school principals, but most of the more than 1000 graduates are classroom teachers located throughout the state and in many other states.

TRACES OF EARLY MAN

TUENNSBURG, Germany — A large cave which may reveal traces of human beings who lived 100,000 to 500,000 years ago has been discovered here. Experts found the bones of giant bears and other bones which may have been the remains of early man. The cave is being explored.

Los Angeles Plans Heliport

Now the post office is building a helicopter landing strip, which will become part of the nation's first heliport, strictle
Fraud Is Found In Jobless Pay

SALT LAKE CITY — A department head has led a department head to conclude that “a lot people don’t think it’s a crime to cheat their government.” The three-man unit is a part of the state department of employment security. Its job is to find any illegal claims for unemployment compensation.

One young man was receiving unemployment compensation payments in a small town while working in Salt Lake City. The boy’s mother forged his name to papers in connection with the case and three officers of the town government swore that the handwriting was that of the boy himself.

Two carpenters continued receiving unemployment compensation after they went to work. “When we filed charges we got a letter from the defendants’ attorney calling us ‘Russian commissars’ and so forth and informing us it was none of our damn business what his clients were doing,” said Curtis P. Harding, department administrator.

Fraud Is Found At College Is Major One

BY ARTHUR PASCAL, Director of Physical Education

The High Point (N. C) Enterprise, Sunday, Feb. 19, 1950 —

The High Point College Department of Physical Education has been doing a well planned program of both physical and mental preparation activities. For those with specific interests, a program that meets the needs of the department is present to form the fundamental principles of teaching and directing group activities and competitions. The activities that are taught in the gym classes include team games and individual sports of square dancing, folk dancing, modern dancing, basketball, volleyball, archery, weight lifting, soccer, golf, tennis, wrestling, tumbling, swimming and boxing.

In addition to the activities theory courses that are offered include:

1. Corrective Physical Education
2. Principles of Physical Education
3. Organization and Administration of Secondary School Athletics
4. Materials and Methods, Intramural and Extra-mural Activities
5. Health Education, Community Education
6. History of Physical Education
7. First Aid, and Theory of Coaching
8. University Athletics

Dorothy Arnette working with Mr. Paschal is the director of physical education activities for the girls of High Point College.

College Has Strong Faculty

(WORK ON PAGE 26)

for Paschal, Director of Physics
Education for Men, whose B. S. and M. S. degrees are from insti-
tutions in Oklahoma.

Influences from several Middle
Atlantic states, New York, Mary-
land, and Pennsylvanias, are prob-
able greater than is at first evi-
dent. Eight members of the fac-
ulty, as already indicated, purs-
ued graduate studies at ColumbiA.
Dr. Clowes, Dr. Driver, Dr. Hin-
show, Mrs. Godd, Miss Johnson,
Mrs. White, Mr. WiIlhers, and Mr.
Wood, all received advanced degrees from New York University.

Mr. Berry and Miss
Johnson. Mr. Stouarge is a native of
New York State.

It is from Western Maryland
College that Dean Hinshaw and
Dean Lindsey received their B.
S. degrees. Miss Helen H. Bart-
lett, Professor of History, a Mary-
lander, but her undergraduate
work was at Western Maryland
College. Although Mr. Albert J. Wood, Assoc.
ate Professor and Head of the
Department of Music, took his
B. S. and M. A. degrees at Col-
mibia, his home is Baltimore.

Dr. Richard C. Todd of the His-
tory Department is a Pennsyl-
vania native, and from the M. A. and
M. Ed degrees was in his na-
tive state and for the Ph. D. at
Duke University.

Several members of the faculty be-
ong to the Eastern colleges and
universities in the other section. Dr. Edmund O.
Comstock, Professor of Chemis-
try and Head of the Department, a
mother of two, has her B. S. degree from the University of North
Carolina. She taught at the Georgia Institute of Tech-
nology, took her Ph. D. degree at
the Massachusetts Institute of
Technology. Dr. E. Louis Dower,
Professor of English and Head of the
Department of English, who ta-
ught in Marylanlad and formerly
resident in the states of New York
and Maryland, received a B. A. and
M. A. degrees at Johns Hopkins
University; he taught in several
colleges and universities, including
Western Maryland. Mrs. White,
previously mentioned, is a New
Englander who received her
first degree at Western Mary-
land.

The Chemistry Department at High Point College is in good spot.

By DR. B. O. CUMMINGS
Professor of Chemistry

Location of High Point College in such an important industrial area and as a city of such industrial leadership, gives exceptional opportunity for the department of chemistry to prove of very practical service in research and performance.

Virtually every industry in both High Point and North Carolina is dependent in some measure on the principles of chemistry. Hence the standards of this department at High Point College are higher than those of many other colleges, and equal to those of the larger southern colleges. The academic requirements of the American Chemical Society for the training of professional chemists are fully met.

Furthermore, the chemistry student at High Point College is enabled to obtain practical experience in the plants located here, while attending college. This is an opportunity no other college in North Carolina offers.

Due to the need for industrial chemists of high calibre in this area, the chemistry department places considerable emphasis on the courses in industrial chemistry, paint and industrial finishes, and industrial research. A large part of the laboratory work in the courses in paint and industrial finishes consists of actual research carried on in local plants under actual plant conditions.

The course in paint and industrial finishes consists of a study of house paints, industrial maintenance paints, varnishes, lacquers, and stains. It is the only course of its kind in this section.

In this course students study the chemistry of the different constituents of finishes. Then for labor and manufacturing, they formulate and manufacture the respective finishes using regular factory equipment. Then finishes are applied and thoroughly tested. It would be impossible to give this course unless the college was located close to the industries and unless the industries cooperated to the fullest extent.

The course in industrial research is open to seniors. The student may work upon any industrial problem that appears to him. During the last year students worked upon problems in house paints, lacquers, maintenance paints, textile detergents, dairy detergents and bleaches. In all the problems the students worked both in the laboratories at the college and in the laboratories and plants of the industries located in High Point and Greensboro.

It has been found that information and experience thus obtained makes the theoretical material far more interesting for the student. Furthermore, after graduation it has been found that the students obtain better paying positions due to the fact that they have obtained practical experience along with the theoretical.

These courses are taught by DR. E. O. CUMMINGS, head of the Chemistry Department at High Point College. He received his degree of B.S. in Chemistry from the University of N. C., and a Ph. D. in Chemistry from The Massachusetts Institute of Technology. Numerous patents in the field of pigments and paints have been obtained by him, and during the war he directed research for the Marietta Paint & Color Co. He is a member of the American Chemical Society, and recently was elected Counselor of the Central Section of the American Chemical Society of North Carolina. He is also president of The Carolina Paint & Chemical Co.

Kiddie Cooler

EAST Springfield, Mass., Feb. 19—(INS)—You won't have to boost Junior any more when he wants a drink at an electric water cooler. Now he can help himself at a "small fry fountain" which Westinghouse has just started to supply. Mounted halfway down the side of a standard water cooler, the small-fry water bubbler may be operated at the same time as the adult height bubbler.

Almost one fourth of Holland is below sea level.
Contribution During War
Stands Out In History

By ARTHUR S. WITHERS
Professor of English, High Point College

When war came, High Point College quickly offered her facilities and her services to the government. A detachment of aviation students was assigned to the college and on April 3, 1943, the boys arrived on the campus, singing heartily their "Roll Out the Barrel" and other favorites. For over a year—until late June of 1944—the 326th C.T.D. maintained a quota of approximately 200 trainees. Records show that during this period 700 men were put through their prescribed program—or "pro- cessed."

The military features of the program were handled by the detachment officers, but the various academic courses were in the hands of the regular High Point College faculty members. Young men from all over the country assembled in "squadrons" and marched into the classrooms for instruction in English, history, mathematics, physics, geography, and other practical subjects.

Potential Officers

Thus the College helped prepare and held as a reserve a goodly number of potential officers for the Air Corps. The work done was, so far as possible, on a college level, and thus, in addition to serving its immediate purpose, offered material for later transfer towards a regular college degree. Without known exception, the aviation students as they went through their more advanced training looked back with gratitude and pleasant memory to their stay at High Point College.

To serve is not necessarily to sacrifice. There is little doubt that a broader outlook to all; and the men who hid come from many sections of the country gave diversified talents and experiences. The College gained from the experience fully as much as it lost. The intensive military program were frequently necessitated during the war. A detachment of aviation officers, but the various academic courses were given themselves in service and sacrifice for God and Country.

In Memoriam

In addition to those who gave "the last full measure of devotion" there were others who were willing to do so much. No doubt they would have answered the call wherever they were, but the High Point College stamp was upon them, and the College proudly claims them—Wacs and Waves, chaplains and doctors, soldiers and sailors, all who in any capacity served their country.

May the day never come when the College proudly claims them—Wacs and Waves, chaplains and doctors, soldiers and sailors, all who in any capacity served their country.

May the day never come when there will be need of a new memorial—another roll of honor. But it is safe to predict from what has already been achieved that neither High Point College nor any of her sons and daughters will ever be found wanting in time of national emergency.

WE WISH TO EXTEND OUR

Congratulations

to

High Point College

Upon the Inauguration of Their Third President—

Dr. Dennis H. Cooke

WE WISH HIGH POINT COLLEGE AND
Dr. Cooke Continued Success

Salute To:

AN ADVANCING INSTITUTION

A DISTINGUISHED LEADER

AGAIN High Point College erects a milestone on its highway of steady advancement.

Since the days when the college was but a hope, and through these twenty-five years of progress, High Point industry has held unwavering trust in the ideals and purposes on which the college was founded. We feel pride in having joined with so many other persons and groups in helping make the original home a dynamic reality.

On this inaugural occasion High Point manufacturers extend the hand of congratulation to college authorities, and of fellowship and confidence to the new president, Dr. Dennis Hargrove Cooke, able educator and experienced administrator.

President Cooke’s genius and vision point unerringly to uninterrupted progress on the part of High Point College. We have full faith in its increasing stature in higher educational service, and ever-broadening importance to High Point, state and nation, under his talented leadership.

Says Broken Home Caused Her To Give Up Children

LOS ANGELES, Feb. 19.—Rather than see her children grow up in a broken home — as her husband, Bert P. Hanford, 23, and divorce pending, had told her — Mrs. Hanford, 26, gave them up before getting a divorce.

She obtained a divorce from Rupert P. Hanford, 23, yesterday and told the court that she had given up their children, Lauren, two, and Daryl, nine months, for adoption several months ago.

"My own mother and father were divorced when I was nine," Mrs. Hanford said Superior Judge Samuel H. Blake. "It is in the best interest of the children, 13. 10 women and 3 men, in 1927; not since 1945 the number of men graduates by approximately 3 to 1,

In the field of service there are approximately 1500 more men serving in 184 towns and communities of North Carolina and the remaining number are found in 33 states, the District of Columbia, Canada, Puerto Rico, Venezuela, Germany and Japan. High Point claims 395, Winston-Salem 366, Greensboro 63, Asheville 43, Durham 25, Charlotte 21, Durham 21, and Chapel Hill, 16.

Among the 33 states the greatest number are found in Virginia, New York, New Jersey, Pennsylvania, Florida, South Carolina, Maryland, Georgia, West Virginia, and the District of Columbia. From the other states and the foreign countries the numbers range from 1 to 2.

In the early years of the College the number of women graduates exceeded the number of men graduates by approximately 2 to 1, but since 1945 the number of men graduates have exceeded the number of women graduates by 4 to 1.

In the field of service there are approximately 3000 teachers, representing the various fields of English, history, science, biology, chemistry, mathematics, music, physical education, speech and drama subjects. Approximately 1000 ministers fill the pulpits to the Methodists and other churches. Many scientists, research workers, noted doctors, dentists and lawyers began their work at High Point college. Many are now located in High Point.

During the World War II approximately 21 of the College training 216 detachments of the Army Air Forces from April 1943, to June, 1944. Under the GI bill approximately 252 have been enrolled at High Point College. How many of these may be counted as enrolled alumni is yet to be determined.

Of the 39 students of the College which we may call alumni, 24 responded to the colors and paid the supreme sacrifice.

Oh Yeah

Hillcrest Manor Apartments

HILLCREST MANOR, High Point's newest apartment project just recently completed has made available sixty colorful apartments of two bedrooms each and sixteen apartments consisting of one bedroom each. The most modern and comfortable living which can be provided. This one project at alone, situated where housing was most needed has proved to us we are supplying housing for future High Point College expansion.
Congratulations

TO

HIGH POINT COLLEGE

AND THEIR THIRD PRESIDENT

Dr. Dennis H. Cooke

WE WISH HIGH POINT COLLEGE AND DR. COOKE
CONTINUED SUCCESS

We are indeed happy to serve High Point College with Clover Brand Products and hope the future will bring even closer business relations.

Biology Course Balanced To Keep Pace With Times

By DR. BEN H. HILL, Head of Biology Department

NICHOLAS ANTONAKOS, Instructor of Biology, HPC

The Department of Biology at High Point College offers a well-rounded training in modern biology to students of the college. The course in General Biology has grown from a single section in several years an elective course to round out the training of those students who have as their major field of Biology. In the past only one course was offered—that being a general survey of the scope of Bacteriology involving the microbiology of the air, soil, water, and foods and incidentally into the pathogenicity of the disease producers. The laboratory work entails the proper techniques in the isolation, classification and cultivation of microorganisms. This year a new course has been introduced which deals entirely with the pathogens. Because of lack of space the bacteriology classes have been limited primarily to Science and Home Economics majors. It is hoped that in the future a complete course covering the bacteriology of water, milk and foods may be offered. Courses in ecology, field botany and fungous ecology can be given when there is sufficient demand.

The laboratory work has as its aims not only to present certain materials to be studied and learned but also to develop in each student the ability to observe critically and to think in them the feeling of self-sufficiency. Standard equipment is provided for each student in the laboratory, including several new microscopes. Abundant specimens are provided for study and display.

Starting with the beginning of the college, premedical work has been emphasized in the biology department. Premedical students take the course in general biology. The principal advanced courses for this group are Comparative Vertebrate Anatomy and Vertebrate Embryology, both being taught by Dr. Hill. The anatomy course is intended for the embryology course, students prepare their own specimens and mount embryo embryos. A Spencer microtome is good for students majoring in other departments. Courses in Human Anatomy and Human Physiology are excellent preparation for students of Physical Education,

A SPENCER MIcroTOME is good for student of Physical Education, and Biology. A Spencer mikrotome is good for students majoring in other departments. Courses in Human Anatomy and Human Physiology are excellent preparation for students of Physical Education,

used for histology and pathology, no students get training which fits them for work in those fields.

The study of hemolysis is covered in the course in Genetics, also given by Dr. Hill. This is a study of interest not only to biology majors and premedical students, but also to many students majoring in other fields. For this reason it is offered as an elective course to any student of the college above the Freshman level. It deals not only with the inheritance which is of general interest, but also includes mathematical and statistical methods used in the study of commercially important pests, flowers, fish, food and beasts.

Bacteriology has been for several years an elective course to round out the training of those students who have as their major field of Biology.
