Cole proposes new curriculum

The new requirements are three semesters of math or logic, two semesters of History (specifically World Civilization) two semesters of Biology, Physical Science or Chemistry.

According to the Dean as late as 1969 the school had such strict requirements but the high schools were turning out students well rounded into the basics. Therefore, the requirements were dropped due to the needless duplication. “Now students are capable but not required” in high schools to have a basic well rounded education and Dean Cole feels that High Point College will do it. "The objectives of required courses are not to duplicate what is taught in high schools but to expand the student’s knowledge."

The College Vice President said that now new faculty would be needed and although the requirements might help enrollment decline, the cost of tuition would make a dramatic rise. Some objections were raised by students here who said that it was their money and therefore their choice of an education. Another remark was ‘If students don’t have the capacity to choose the so called ‘right’ courses how can they pass them’. The doing away with area requirements alleviates the discrepancy of being able to choose Finite Math or Organic Chemistry, English Literature or Speech and Introduction to Psychology or Accounting. Dean Cole’s basic required 38 hours leaves very little room for choice. Therefore in less than a decade an AB Degree from High Point will mean the recipient will have mastered more than the first two letters of the alphabet.

Labor Dept. forces hours cutback

When the Department of Labor speaks, people listen! At least that’s what happened this past summer when Labor board officials visited HPC and instituted some major changes.

For one, resident counselors (dorm proctors and dorm mothers), and resident assistants all have reduced hours, in which they are allowed to work.

Resident counselors can now work only a total of 40 hours a week under the labor board changes, while resident assistants are limited to 20 hours a week.

In prior years, residents counselors were on call anytime they were in the dorm and resident assistants worked 7:00-12:00 Monday—Thursday and on weekends.

Dean Hanson, head char-

Dorm students to vote

Patton okays 3 to 9 hours

by Ed Grendpie

Student Legislature’s first meeting, held on September 6, covered topics ranging from the extension of dorm hours to the 1977-78 SGA budget.

Speaker Norris Woody reported that Dr. Patton had decided to veto a bill passed last spring that would have extended the weekday visitation from 3 p.m. to 7 p.m. to 1 p.m. to 10 p.m. The bill, #13-1976-1977, was based on a survey of nearly one third of all dorm students.

The Administration did agree; however, to allow each dorm’s individual Dorm Council to vote on extending weekday visitation to 3 p.m. to 9 p.m. Weekend visitation will remain the same.

Also announced by the Speaker Woody was the administration’s approved version of the 1977-78 budget.

The revised budget totaled only $37,950— a $4,550 cut from what the SGA requested last spring.

Student Union was cut the most with $2,500 being taken away from their Zenith was cut $500.

Intramurals, which would have been given $800, was transferred to the P.E. Department Budget.

The next session of the legislature will be September 20 at 6:30 in meeting room 2 of the campus center.

The opinions herein are not necessarily those of the college or the majority or the student body, rather, those of the writers. The "Editorial We" is the expressed opinion of the Editors of the Hi-Po.

Page 2 High Point College's Hi-Po September 14, 1977

What do you expect?

This being the first issue of the Hi-Po for this college year, we would like to welcome all freshmen to the college campus world and at the same time give a brief orientation as to what to expect from us this year.

We strongly believe that a good newspaper begins with sufficient funds, good organization, and a good staff. Our funds, although less than expected, will hopefully still be ample enough to see us through the year. We are also happy to report that we have a much larger staff this year and if ample enough to see us through the year. We are also happy to report that we have a much larger staff this year and if ample enough to see us through the year. We are also happy to report that we have a much larger staff this year and if ample enough to see us through the year. We are also happy to report that we have a much larger staff this year and if ample enough to see us through the year.

The area of the Arts and Humanities remains virtually the same under the new proposal in that the six basic hours in composition are still required along with six hours in a modern foreign language (or proficiency therein), and a three hour course in the fine arts. The only difference-and it is a major difference-is that three hours have been deleted from this important area.

At the end of last year, the Dean of the College presented the faculty with a new curriculum very closely allied to the present four-area requirements, but with some modifications.

The main difference lies in designating the specific courses required and in lessening the requirements by three hours. In the present curriculum all students have to take the same seventeen basic hours and have to take twenty-four hours from the four areas (six hours from each area-with a choice of what each area's six hours will be). In contrast to these forty-one hours, the new requirement if thirty-eight hours with no options allowed.

The area of the Arts and Humanities remains virtually the same under the new proposal in that the six basic hours in composition are still required along with six hours in a modern foreign language (or proficiency therein), and a three hour course in the fine arts. The only difference-and it is a major difference-is that three hours have been deleted from this important area.

In the process of redefining the curriculum-which does need redefining (almost constantly), I would ask the students, the faculty, and the members of the Educational Policies Committee to make a serious assessment of those courses which lead to the fully developed mind. If the purpose of education, as John Dewey has said, is to put people in possession of all of their powers, then students must be skillfully trained the area of their career (whether a CPA or a laboratory technician), but also in subjects relevant to their total wholeness and fulfillment. With no course in literature included in this so-called new curriculum, something less than total will be achieved.

Statements could be quoted from leading educational journals and from leading college and university academicians proclaiming the serious problems that have accumulated on the college level acquaintance with books and, even more damaging, with no training curriculum would carry on in this same high school tradition, completely unfruitful. The student must gain not solely a microscopic view of his life, but a view of his place in the total heritage of man.

Literature is the reservoir of this heritage-the container for what Matthew Arnold calls "the best that's been known and thought in the world." Northrop Frye's address to the prestigious Modern Language Association is worth reading and re-reading:

"...The goal of freedom in the whole conception of a liberal education. Literacy pertains to reading signs, labels, advertisements...conformity. The real freedom lies behind, the freedom that comes only from articulate ness, the ability to produce as well as respond to, verbal structure...Everything we know is formed out of words and numbers, and literature and mathematics are the only subjects of knowledge that are also a means of knowing."

**Intercom invades privacy**

**by Brent Johnson**

"Big Brother is watching you". No it is not 1984, but conditions are comparable. Many of you live in a dorm that can be bugged at any time by anyone. Others live in dorms where the level of individual privacy is large enough to fill a coffee cup.

To most students these must sound like tremendous claims, but those who were here during summer school know better. Many students have reason to believe that the intercom system in one of the dorms on campus has been used for bugging purposes.

It is not important to some that it has been used in such a manner but the fact that it could be used in this way is cause for alarm among the rest. There is no doubt, that it can be used for bugging the room.

There are no doubt many people who would claim that the system is used in "good faith" ways. One, being the railing of students to the phone at the foot of the stair. Granted, it can be used this way. There are those who would say that it can be used to inform students that they have visitors in the lobby. This is also true. Nearly any device that has been created or good can be used for evil.

It has ever been used in an unjust way, then it is a threat to all.

The question then to the reader is: should the intercom system be removed? As long as all students have equal access then it is still right that it can be used for bugging, but at least everyone is "fair game".

During the summer only a few people had access to the key that controls the machine. The privacy of the students was then depended on the honesty of these few people. Such a state should not be allowed to repeat itself.

It should not be understood that this is just a problem for the students living in this "modern" dorm. Where it is a problem if any student, it is a problem for all. Privacy can only be maintained at any time without any reason. Ask any couple that has been caught in bed or any student that has been caught smoking. So the issue is not just at the intercom system, but every students constitutional right to privacy. It is an issue that should bother everyone that has any respect for freedom, not just students.

Finally, Louis D. Brandeis stated: "The makers of our Constitution undertook to state conditions favorable to the pursuit of happiness. They sought to protect Americans in their beliefs, their thoughts, their emotions, and their sensations. They conferred, as against the Government, the right to be let alone...the most comprehensive of rights and the right most valued by civilized man.

To protect that right, every unjustifiable intrusion of the Government upon the privacy of individuals, whatever the means employed, must be deemed a violation of the Fourth Amendment". Louis Brandeis, Associate Supreme Court Justice. His opinion must surely be worth something.

It is time for freedom at HPC, let it begin with the new year.

**Reflections**

**by Dr. Earl Crow**

**Seeing HPC one day at a time**

Wednesday August 31:

...I attended a freshman forum on Thursday night. I was told that Solzhenitsyn's A Day in the Life of Ivan Denisovich. A new concept! Orient freshmen to academic as well as social and domestic facets of college life. What next?

Ivan developed the willowy-like capacity to bend and sway with necessity - an oak would have splintered yet he retained an untouchable center of self which afforded him an inner freedom uncompromised by the conditions under which he was forced to live. A rare combination of Schopenhauer's inexorable will to survive coupled with an unrelenting determination to preserve was a Supreme Court. For most of us, it's a role of either/or.

Thursday September 1:

The first day of class. It all begins again. What is it be any different this year? Who knows? And yet, the very act of beginning again seems to foster great hope. Time alone will tell.

Monday September 5:

Arrived at school early. Observed high ranking administrator and faculty member on hands and knees weeding grassy area at entrance to snack shop. Dignity is not diminished by willingness to stoop to help doing a job that needs to be done.

Thursday September 8:

Philosophy Class. A discussion on the distinction between teleological ethics and deontological ethics. Had tried in presentation on Ivan Denisovich to distinguish between a sense of duty imposed from without and an inner sense made up of people and I know nothing more unique than people.

You as a person whether you be freshman, sophomore junior, or senior are unique. You as a person whether you be freshman, sophomore junior, or senior are unique. Each person born with your own unique set of characteristics.

**"Take a Look at Your New World"**

**by Malon Baucom**

Welcome! You are invited to take a look into your world. That's a silly statement you may say! I see the world every day. That's true, but now that you're at High Point College you have entered into the halls of higher learning and HPC is a world in itself.

Life seems so gigantic and bigger than we have ever known when we are faced with so many pressing decisions about our daily existence of living. I contend that life is a wonderful adventure and unique world and it is an important time in which we live; it is the time of our lives. Life is unique in that sense of opportunity and I know nothing more unique than people.

You as a person whether you be freshman, sophomore junior, or senior are unique. You as a person whether you be freshman, sophomore junior, or senior are unique. Each person born with your own unique set of characteristics.

Philosophy Class. A discussion on the distinction between teleological ethics and deontological ethics. Had tried in presentation on Ivan Denisovich to distinguish between a sense of duty imposed from without and an inner sense made up of people and I know nothing more unique than people.

You as a person whether you be freshman, sophomore junior, or senior are unique. Each person born with your own unique set of characteristics.

Life as they do so. It would be a lie to say I do understand; but thanks for being brave, for having faith in a person, and for exemplifying the needed quality of courage in giving me encouragement in my daily life.

Some say: "If God is a God of love, He would never allow your experiences of life; I can only speak from my own experience. It is so hard to have your entire life changed abruptly overnight.

No doubt most freshman and transfer students have found this experience to be true. Adjusting to the death of my father which happened a year ago is a continual change in my life which I am eternally grateful.

And in the fact that God loves you, is concerned about your life, and is involved in our lives more than we'll ever know or be able to comprehend. Becoming bitter at life cripples far more lives than paralyz ed or diseased bodies.

You do one of two things in life whether you realize it or not. Every day you build walls of isolation or barriers to communications in your relationships or you build a bridge to every person that you meet. This bridge of communication, love, and concern allows for us as people to have wonderful external experiences and friendships.

The time is right for learning to live together as neighbors and in treating each other the way we want to be treated. Treating people like dirt is not treating people like they should be treated. Can I show genuine concern until you feel hope for your world and your tomorrows? That is my hope and prayer.

Look at life through a new perspective and you'll discover our highest hopes and dreams in our life with a capital L.

Join me this year into a look at your world at HPC.

If you are interested in working the Hi-PO, just come by to the office meetings on Monday mornings at 11:00 in the Hi-PO office. Please note that our new P.O. number is 3510, for campus mail.
N.C. roads wear tread faster

Probably by now, out of state students are getting used to having to pay higher price for such items as college tuition and trips to and from home, than North Carolina residents. However, there is probably one additional expense out of stators are not aware of and that expense is the additional cost of keeping good tread on your tires.

Although North Carolina has prided itself on being a good road state (with the exception of I-85), surveys done over the summer have shown that tires wear out quicker here than almost anywhere else in the nation. The survey done by Uniroyal, showed that the area from Atlanta to North Carolina gets very poor tread wear when compared to New York, Michigan, Indiana.

Humidity and the warm climate are often mentioned reasons for the excessive tread wearing of the tires, but the most popular reason is the composition of the road surface. Many tire manufacturers have laid claim that the granite that the state uses to make our roads is tougher than the stones used by other states in making their roads. The theory set by a British study, related tread wear to the difference between the operating temperature of the tire and the air around the tire. Simply put, a tire that is hotter than the road surface could wear out quicker than the tire that is closer to the temperature of the road surface. Thus, with the state's rough surfaced roads, it could cause tires to heat up.

Other researchers claim that humidity may have an effect on tread wear. They argue that it's easier to cut rubber when it's wet, and perhaps the humidity in the state contributes to the wear.

Whatever the reason, the problem has attracted enough attention to warrant a study by the National Academy of Sciences next year as they will be doing a region by region study of tire wear in the United States in hopes of finding out why tires wear out faster sometimes twice as fast in areas like North Carolina.

Patrolman crackdown on speeders

Fifty five is the speed limit in North Carolina and state highway patrolmen are making sure all motorists abide.

The drive fifty-five crackdown began August 15 and is supposedly part of a nationwide program to slow the leadfeet down and hopefully reduce the number of accidents and traffic deaths on state highways.

N. C. Highway Patrolmen have taken the program quite seriously and the result has been that motorists are slowing down for the most part. The traveling conscientious objects, such as truckers and others who make their livelihood by traveling, are exclaiming; however, with "smokes taking pictures" more often, these conscientious objectors and other motorists have been forced to dip into their wallets more often to pay off the speeding tickets.

Main reasons given for the crackdown have been the added safety and the more efficient consumption of gasoline. Statistics, put out by the Department of Transportation have shown that since the speed limit was reduced to fifty-five, there have been fewer accidents, traffic deaths, and millions of gallons of gasoline saved.

Despite the posting of the fifty-five speed limit; however, motorists have been forced to interpret the situation as if it was okay to drive sixty and not over sixty-five.

North Carolinas should know by now that this situation no longer holds true and: whereas, nationwide programs don't always mean nationwide enforce- ment, out of staters should take note.

Washington, D.C. - The minimum wage bill debate will continue in Congress later this month and the Wall Street Journal reports there is growing support for a subminimum provision for teenage workers.

The amendment proposes that the under 19 could be paid 65% of the regular minimum wage. That would be $2.25 if the $2.95 per hour minimum is adopted. The lower rate could be paid to one worker for no longer than six months and it would be illegal for employers to systematically lay off youths after the six months or to replace adults with youths earning the lower wage.

The AFL-CIO opposes the move for fear older people will lose jobs. Similar provisions in the past have also met heavy opposition from national student lobbying groups.

The proposed new bill would presumably leave unchanged the current provision that allows some businesses to obtain exemptions allowing them to pay workers who are full-time students a sub-minimum wage.

Marijuana

Addiction

Gainesville, Ga. -- Marijuana use can lead to an addiction to an even more dangerous substance-tobacco—according to a U. of Florida researcher.

Siegfried Fagerberg, a UF health researcher, conducted a five-year study of 1,500 Florida public school pupils. "A remarkably large percentage of students said they learned how to smoke by smoking grass and then went on the cigarettes," he concluded.

Fagerberg said that students started smoking pot before tobacco because it is the 'in' thing to do.

Street Journal reports there is growing support for a subminimum provision for teenage workers.

Health risks are less than tobacco. "We already have two major abusive drugs-why turn another one loose on society?" he said.

Carter owes students

NEW YORK, N.Y. -- Jimmy Carter just may owe his presidential victory to the college students of New York state.

Figures recently published by the New York Public Interest Research Group (NYPIRG) show that Carter received 360,000 student votes in the state. He won New York with just 50,000 of electoral votes which proved crucial, by less than 250,000. Ford got about 182,000 student votes in the state.

Paul Hudson, an NYPIRG attorney, said "The political apathy of the early seventies appears to be ending...Our best estimate is that three times as many students voted in November of 1976 than have ever voted before in the state."

NYPIRG, a campus-based consumer group co-founded by Ralph Nader, is now working to repeal a state law which requires students to vote by absentee ballot at their parent's place of residence. In the presidential election, approximately half of New York students voted absentee by mail, according to NYPIRG.

Infirmary hours

Continued from p.1 of result of compliance with the Department of Labor is the infirmary.

This year, there will be no weekend infirmary coverage and in-patient facilities are to be used only when deemed absolutely necessary.

The infirmary is open Monday-Friday from 8:00 a.m. to 5:00 p.m. and night coverage is available Monday-Thursday by calling the infirmary at 888-5727.

From 5:00 p.m. on Friday to 6:00 a.m. on Monday, all emergencies must be handled through the emergency room at the High Point Memorial Hospital at the expense of students.
Dream Disco unity to the HPC cafeteria tonight for a bringing their American traveling disco unit will be Case, innovators of the bottom floor of Campos Center. Excellence in the Carolinas

'76 Fall Sports in Review

It's unfortunate that NAIA and Division II schools don't enjoy the same amount of news coverage and national recognition that their NCAA counterparts do. High Point College would certainly grab much of the limelight away from the perennial ACC bigdogs like Carolina, Florida State, Maryland, Wake Forest and State. Though High Point's enrollment is probably around one-thirtieth the size of these mammoth universities, our sports program and its incredible knack for winning, all but puts most of these schools to shame and they supposedly represent the class of the might ACC.

A lot of hot air you say, well let's examine last year's record. Soccer - Second year coach Ken Chartier again piloted the panthers to another winning season by posting a 12-6 record which included a conference title and second place finish in the district. Outstanding performances by Greg Goehle, Doug Challenger, Jeff Potter, and Gary Downing earned them All Conference honors, and Potter and Goehle were also named to the All-district team. Goehle was later named to the All-South squad and proclaimed Conference Player of the Year. Other highlights included Walter Roes' three goals in a 1-4 against conference foe Catawba College and Coach Chartier being voted the Conference Coach of the Year.

Cross Country - It's somewhat odd that one of the school's least publicized sports has continually proved to be one of the district's most successful. Led by team MVP, Mark Hamlett, the cross country team annexed yet another district championship by posting a 24-8 record. All District performers included Matt Rogers, Randy Lacer, Steve Dunham and Mark Hamlett and for his usual fine job of coaching, Bob Davidson was again named District Coach of the Year.

Field Hockey - Here is the kind of success story that most coaches dream about but rarely attain. First year coach Jennifer Alley was heaped upon this talent laden panther squad with Wanda Wilson, Dawn Apparel, Grecia Simmons and Ethel White all being named to both the All Conference and All Division II teams. Both Wilson and Allred gained All-State honors and Ethel White became the first woman in the history of the college to gain All-American status. As expected, Coach Alley was again Conference Coach of the Year and Wanda Wilson, Conference Player of the Year.

Basketball (Women) - This is one act that few will ever be able to follow. Not only did the women's basketball team cop their second consecutive conference and Division II title, but also averaged a 3rd place finish at the hands of Francis Marion College (Florence, S.C.) in the 75-76 Regional Tournament by beating them in the 75-77 Regional Final. Victory was especially sweet since FMC was the tournament host. With conference, division, and regional titles under their belts, the Panthers were ready to tackle the nations small college heavyweights in the AIAW Division II National Tournament in Calif. Apparently the lady Panthers were not beset by jet lag or the change of climate as they demolished opening round opponent Salisbury State (Md.) by over 50 points. Game 2 proved to be their demise as they lost to eventual champion S.E. Louisana in a hotly contested and controversial match. At the tournaments end, High Point ended their 75-76 season with a 29-2 record, and 7th place in the National Tournament. Again, individual honors were heaped upon this talent laden panther squad with Wanda Wilson, Dawn Apparel, Gracie Simmons and Ethel White all being named to both the All Conference and All Division II teams. Both Wilson and Allred gained All-State honors and Ethel White became the first woman in the history of the college to gain All-American status. As expected, Coach Alley was again Conference Coach of the Year, Wanda Wilson, Conference Player of the Year.

Volleyball - Few sports and coaches have enjoyed the immense success that Jennifer Alley's has in literally catapulting her volleyball and basketball teams to national recognition. It was expected by most that this squad would repeat as conference and division II champs, which they did with relative ease, but anything else would have been a little difficult to accept. One thing nice about sports, they allow you to travel, and travel they did. After a brief rest, it was on to Tennessee, where High Point swept thru regional competition, which included teams from 5 surrounding states. By winning the regional title, the High Point Women earned a trip to the AIAW National Small College Tournament in Calif., where they eventually finished 9th in the nation. Their overall record finally rested at 34-9 in the nation. Their over all record in the most wins in a season posted a school record in the most wins in this sport with a 10-4-1 record. Led by team MVP Debra Weber, High Point was eventually named the top seeded North Carolina entry in the AIAW Regional Tourney. Among the pantherettes victims were Duke University, Wake Forest, and East Carolina University.

Radio Station Report

At the last organizational meeting of the radio station, several items were approved: the order of the transmitter, the installation of air conditioning, and the approval of new membership rules. The membership rules are:

1. Fill out and forward to the General Manager an application form.
2. Be approved by a 3/4 vote of officers and advisors.
3. Attend at least two meetings before receiving a membership card which entitles members to a 20% discount at High Point Photo.
4. Perform to the satisfaction of the General Manager any duty accepted.
5. Obey all applicable rules and regulations of the FCC.
6. Use no equipment or materials for personal use or profit.

The High Point College FM Radio Station received its license from the FCC in July. It has a designated frequency of 90.5 Mhz, with call letters WWIH, and a 10 watt operating power.
Excellence in the Carolinas

'77 Spring Sports in Review

Golf - You usually don't see many golfers, and rarely hear about them. Coach Woody Gibson's Golf team has to be one of the schools more consistent winners. It doesn't help when you are competing against nationally ranked teams like Ellen and Garner Webb in district competition, but the HPC golfers managed to stay right in the thick of things with a fine 17-8 record. 

Field Hockey - The start of the intramural season is fast approaching here at HPC. The new director for the '77-78 season is coach Bob Davidson of track and cross country fame. Davidson has to work with the results of a market survey of their readers recently completed.

For the sixth consecutive year, HPC was again a tie for 11th place in the conference. High Point was always at the top of the list. For the sixth consecutive season, HPC, coached by Jim Goff, won the District 26 crown. Though injuries forced Coach Goff to shuffle his top six, HPC's few bright spots as veteran distance runner Jim Goff, won the District 26 crown. Though injuries forced Coach Goff to shuffle his top six, and Coach Davidson's track team was again plagued with a multitude of injuries which surely hampered what could have been a very successful year. Veteran distance runner Randy Prunty and freshman javelin hurler Lance Sor
cnik proved to be one of the conference. In addition to their copping the conference title, HPC fin
ished 3rd in the State in NCAAIAW Tournament. Conference player and coach of the year awards went to Sally Tessier and Mrs. Steele respectively.

All-Conference. Baseball - America's favorite pastime doesn't seem to be hurting at High Point College, that's for sure. Under the watchful eye of veteran coach, Chuck Hartman, HPC completed its eighth consecutive season with 30 or more wins. Spearheaded by team MVP Kevin Keene and All Conference players Billy Sorrell, Tony Waite, and Joel Swepe, the panthers won the conference title but lost in the finals of the district tournament. All District honors were earned by Sorrell, Waite, Swepe and Mugele. In the process of posting a 37-12 record, centerfielder Joe Garbarino set a NAIA record for stealing 44 consecutive bases without being thrown out.

Tennis (Men) - When tennis coaches of district 26 begin their season and attempt to ascertain who the team to beat is, High Point is always at the top of the list. With any sport, the recruiting

**66%** purchased a paperback book

**61%** visited a bar

**71%** took in a movie

Among the moviegoers, the survey projected that in the 37,900-person population area 14,550 went once or twice during the month, 10,380 attended three to five movies, and 1,140 went from six to ten times. The survey projected that the Gainesville market had 785 film fans who took in more than 10 movies during the month.

Students big on leisure

Advertising Salesmen for the U. of Florida Independent Florida Alligator will hit the streets this fall armed with the results of a market survey of their readers recently completed.

Among students, 98.5% were found to be Alligator readers.

Student, faculty and staff purchasing habits during the previous month included the following:

- **55%** bought records
- **51%** attended a concert
- **5%** bought albums or tapes
- **6%** attended a ball game

Come and join the Hi-Po

Providing a service for the college can sometimes be a real drag, but it isn't too bad when you can do it your way, at your leisure, and have a little fun away from HPC, where you'd probably be enduring another one of those boring weekends anyway.

Here at High Point College, varsity sports are not only popular but quite successful. So to keep the student body informed on the progress of our various teams, the Sports Dept. needs a number of students to write and report on the various areas of athletics. No experience whatsoever is necessary, just the desire to do a good job and the responsibility to stay with it, is necessary.

Also photographers and cartoonists are welcomed and greatly needed. With only a staff of 5, any help is appreciated. If you think you'd like to give it a try or have any questions please contact: Steve Biesing

Intramurals

Softball will be held on Monday Sept. 12 at 7:30 in meeting room 2 of the student center. Rosters for the teams, the Sports Dept. will provide.

Come and join the Hi-Po
Announcing

Campus Parking

ANYONE PARKING THEIR AUTOMOBILES ON THE CAMPUS OF HIGH POINT COLLEGE ARE REQUIRED TO HAVE A CURRENT PARKING DECAL DISPLAYED ON THE REAR BUMPER. Parking is not allowed in front of Roberts Hall or in the rear of Roberts Hall where yellow lines are painted.

1. No Parking on roads where curbing is yellow or where No Parking signs are displayed.
2. No Parking by the Dempster Dumpster or in front of the Maintenance Building.
3. No Parking on roads or blocking steps, walkways or driveways.
4. No Parking in Loading Zones, Fire Zones or anywhere to block the free flow of traffic.
5. Any violations of the above parking regulations will result in a $15.00 fine.

Posters in Student Union

The display of posters, flyers, advertisements or any other materials in the Holt McPherson Campus Center will be restricted to existing bulletin boards. Any such items displayed on windows, walls or doors will be removed. Your cooperation is appreciated.

Intramural Softball

Intramural touch football has been replaced for the 1977-78 academic year by fall softball. The following reasons were primary in this decision:
1) The number of injuries associated with this sport and the possible liability to High Point college which might occur.
2) The inability of the intramural office to secure competent game controlling officials.
3) An anticipation of much greater student participation in fall softball and baseball when compared with football participation. A maximum of 8 football teams would be anticipated while 20 softball teams is likely.

London Interim Trip Planned

All students interested in spending the January interim in London, please see Emily Sullivan in room 20, Cooke Hall, on Tuesday, September 20, at 2:30 p.m. If this time is not convenient, drop by Room 24, Cooke Hall, and leave your name and address (or telephone number). The London group leaves on December 30 and returns January 27. This opportunity for a month's stay in a Russell Square hotel (heart of London) for a reasonable price is a never-to-be-repeated bargain. Plane fare is $315.59.

Six new faculty join HPC

by Dan Darden

High Point College would like to extend a warm welcome to six new faculty members for this year.

Earnest Price, Jr. comes to High Point as chairman of the Human Relations department after a 37-year executive career with the YMCA. "I feel fortunate," he said, "after my career with the Y, to be able to prepare young people to work in the same capacity." He looks forward to a long and pleasant association with HPC. Mr. Price is a member of Omicron Delta Kappa, an honorary collegiate leadership fraternity. "In my view," he asserts in a paragraph distributed to all his students, "education is not a commodity...it is a process..."

James M. (Mike) Glover is one of three additions to the Physical Education department here at HPC. He is an HPC graduate who states that he "wouldn't have come if I couldn't take fond of the College." He is a member of the Scholastic Honor Society, the Order of the Lighted Lamp, The Fellowship of Christian Athletes and the American Humanities Association. He was also elected to Who's Who Among Students in American Universities and Colleges.

Wanda Briley also comes to us as a Phy. Ed. instructor as well as women's volleyball and basketball coach. She is a South Carolina grad. and was several times all-conference, all-state, and was once MVP for the softball team. She says she likes this year's V-ball squad and hopes everyone comes out to support it.

Dr. Alan H. Patterson comes to HPC as chairman of the Phy. Ed. Department. He was previously director of athletics at Pfeiffer College and was an instructor at Tennessee before that. He invites everyone in an open challenge in any sport as long as he can win.

Larry B. Keese is the new assistant librarian here at HPC. Keese was previously librarian at Greensboro Public Library. Library Assistant at the University of Virginia School of Education, Public Services Librarian at Sweet Briar College, and was archives assistant and technician at the National Archives in Washington, D.C. He looks forward to the new library building.

Richard A. Stimson has been appointed assistant professor of Business Administration and Economics here at HPC. He was previously president and treasurer of Stimson Associates, Inc., a Fort Lauderdale public relations firm. He also taught at Nova College and two other institutions in the Fort Lauderdale area. He has also been PR director for International Woll Secretariat in NYC, and held other executive positions with Price-Waterhouse & Co., American Petroleum Institute, American Textbook Publishers Institute. He is self-described "generalist" rather than a specialist.

Lower SAT scores are among reasons for new curriculum

SAT scores dropping and a general consensus among educators about the inability of students to read and write as well as they have in the past were two main reasons cited by Dean Cole for the move to a "back to basics" curriculum.

"Students are not as prepared to do college work as they used to be, although they are just as bright as they used to be," said Cole, and you "just can't pinpoint this problem on one certain group.

Meanwhile, reports show SAT scores dropped once again for the fourteenth consecutive year.

A 21-member Advisory Panel on Score Decline recently submitted a report of its two-year investigation to the presidents of the College Entrance and Examination Board and the Educational Testing Service, which assigned 50% of the decline to changes in the group of students taking the SAT (more test-takers with lower grades in high school), more test-takers from low income and minority groups, who traditionally score lower; and more women whose mathematical scores tend to be lower than men).

They attributed the re-mainder to problems in schools and test pervasive factors in American society, including watching television and the social disruption of the 1960's and early 1970's.

One pervasive factor in school mentioned was a tendency for elective courses to proliferate in high school at the expense of consecutive studies in English, Mathematics, and other major fields of knowledge.

Many more possible causes for lower scores are given, but these are the basic reasons and they are the catalyst for the suggested curriculum changes.

"The suggested curriculum that is proposed would be minimum," said Cole, and "there are certain courses that one needs to function as a rational person and this is what we will try to base the new curriculum on."

The process which the "back to basic" curriculum will undergo before acceptance will be a long, drawn out one.

Cole said that he expects it will be two years before it reaches the final faculty vote, based on the two year period it took to change the curriculum the last time.
The opinions herein are not necessarily those of the
college or the majority of the student body, rather, those of
the writers. The "Editorial We" is the expressed opinion of
the Editors of the Hi-Po.

Page 2 High Point College's Hi-Po September 21, 1977

Admissions Studied
by survey

A recent survey by the campus newspaper at Michigan State showed that in contrast to student demands of the past era for "open admissions," more than one-third of those surveyed favor an admission policy that would require students to meet higher academic standards.

In fact, 46% said there are too many non-serious students at MSU because the academic standards are not stiff enough.

The point is that these people surveyed, being of college age, may be echoing similar thoughts of HPC students.

The similar thoughts may be that students want tougher grading. However, maybe you're one of the 6% of the 361 seniors surveyed that would admit all regardless of grade point average.

Admissions takes in a long range of studies, but the type of curriculum offered is a definite factor in the decision of which school to attend.

Our pro-con on the issue of the new curriculum is featured this week, but the point is how do you feel and to whom do you express your feeling to.

We would like to suggest to those with strong feelings on the subject to write a letter to the editor if you want Dean Cole or faculty to hear your opinion.

Yet, a more direct approach and a very effective one too, would be to get in contact with the three student representatives on the Educational Policies Committee. They are this year—Jay Gammon, Annette Johnson, and Kathy Kiser.

These three student representatives will be on the spot as each vested interest (courses) is offered up to be included in the new "back to basics" curriculum.

In talking with Dean Cole the other day, he said that there is a need for student input in the series of studies that are now taking place. Also, on the projected long range (five years) need for the addition for new courses, the dropping off ones that have outgrown there usefulness, and the combining of certain courses.

It's true the new curriculum and the studies on course needs will not affect students presently attending. However, those students who will be affected two to five years from now probably won't have the opportunity to voice their opinion on these changes like we have the opportunity now, for the decisions will have been made and the transition period already started.

The opportunity is present. Let the student representatives to the Educational Policies Committee be your direct link and the newspaper your medium.

A note to students & faculty:

Many students and faculty have expressed concern over the large amount of mistakes in the paper last week. We would like to clear the air, especially as for Mrs. Sullivan's letter to the editor on need for literature in our curriculum. The mistakes in the headline and the article were not Mrs. Sullivan's mistakes.

Future issues are usually an orientation time for us as well as for our readers. This fact was complicated by the fact that we must correlate our schedule with our printer's, so that things can run smoothly. Our newspaper is a representative of the college, so rest assured better times are ahead.

Hi-Po
"Working for a better informed campus"

Education Not Popular to some

Education is one of the least interesting topics that can be discussed in a small campus newspaper. To most students education is last on a list of collegiate objectives following such all-time favorites as partying, dating, sporting and getting a degree.

Some people go to school four years, receive a degree and have more education than had they spent those four years as an apprentice ditchdigger. A great many graduates are educated, that is showing evidence of having been instructed. Only a small percentage show evidence of knowledge, material derived by inference or interpretation. The differences is the animal capacity to "know" and the human ability to "think".

One pays the price of 12,000 dollars to be educated. One goes to class and records information in his brain to be educated. Yet for the same 12,000 one could accumulate and then assimilate knowledge that will be useful in overcoming problems that are not taught in classrooms.

The value of a college education is not its practicality but its theory, applicability to all situations. If college taught one how to interpret Beethoven's aret, Goethe's literature and Einstein's physics for his own life then he would have been taught how to think.

Practically, due to its simplicity, defines information that can be applied to restricted situations. Theory, due to its abstractness, defines information that can be applied to all situations.

"The great end of education is to discipline rather than furnish, to train it to use its own powers, rather than fill it with the accumulations of others."

All this brings us to the point that a broad education based on theory rather than the practicality of a degree is what at least part of college is about. If all one wants is to be able to put food on his table, save the 12,000 dollars and be a dirt farmer. If one wants to make the most of himself and understand the significance of his life to himself and others, acquire the knowledge a college education can give.

by Robin Marley

Every student should have all courses by Dave Bobbitt

Every student should have some basic courses in every subject known to man-between grades one and ten. When a student enrolls into a college he should take some courses in fields outside his major department. My point is that it should be left up to the student. If a high school graduate doesn't know what courses are going to benefit him and which aren't, then he should take a couple of years off between high school and college and find out which courses will benefit him in his future career.

Too many students are in college right now who don't even know whether they want to go to college or not. To those I say, "You're wasting your time. If you don't know now, you won't find out in college." And, if you don't know what you want to do with your life how will you know what courses to take?

Now here's the clencher--if I don't know what courses to take because I don't know what I want to do, how, in heaven's sake, how does the college I'm attending pretend to know???

College curriculums could be so very easily be cut back to 2 or at most 3 years if students only know what they wanted to take towards their goal. (And that means a drastic cut in educational cost, too.)

Every student should have some courses in English, Economics, and Sociology but it should be up to the student to decide in what quantity and when. And furthermore no student, professor, educator, or housewife should ever stop studying those courses after they've gotten the "coveted degree."

As Mark Twain said, no man is ignorant, we're all geniuses, just in different subjects. To that I say, thank God! Life will always be a challenge, an interesting challenge, to every one of us. I can never hope to be a mathematician, nor a scientist, but I know some science majors that will never be able to balance their own check books, should be well rounded in all subjects but college is no time to regress to general math when one should be writing like Thurber, or thinking like Gailbraith.

Literature is vital to liberal arts ed.

by Earl Crow

The Hi Po (Sept. 14, 1977) printed a letter from Prof. Emily Sullivan regarding the omission of literature from the list of required subjects in Dean Cole’s proposed curriculum revisions. It seems appropriate that other members of the faculty, as well as students, should voice their opinions on this subject.

Many academicians are convinced that the once popular trend toward fewer required courses was a mistake and that we need to return to a curriculum which includes a higher percentage of basic required courses. Dean Cole’s proposed curriculum revisions are in line with current trends. He is to be commended for taking the initiative in recommending revision of our curriculum requirements.

Curriculum revision is always a difficult task. Each department has its own special interests and is usually convinced that its own particular discipline is indispensable to a complete education. The Dean, working with the Educational Policies Committee, must attempt to make the judgment regarding which courses to recommend as required courses. It is redundant to say that they will not please everyone.

There are certain courses; however, which seem self-evidently indispensable to a good liberal arts education. The study of literature head this list. The great literature of the ages embodies the collective wisdom of mankind communicated through story, myth, symbol, and poetry. No other discipline or art form so effectively confronts students with the truly ultimate questions of life. This was aptly illustrated by Dr. Stuart Henry in his Finch Lectures on our campus last year.

The failure to include the study of literature as a requirement in any proposed revision of our curriculum would be a mistake. Education without familiarity with the great literature of the world, whatever it may be, certainly is not liberal arts education.

Small Visions Short-Sights Life

by Malon Baucom

Vision is very important in our daily lives. With our physical sense of sight, we perceive life and all of its phenomena. Without the sense of sight, we would not be reading this edition of the Hi-Po.

To live without realizing the blessings we encounter in life is to have a short-sight of life. Human hearts are amazingly alike. They desire a deep sense of satisfaction, of fulfillment, of love, of acceptance, and mostly purpose in one’s existence. To live without purpose is the unhappiest experience of life.

Unfortunately, even though we have eyes, we often fail to see the beauty of life and to realize that life is wonderful, and, despite the suffering and hardships of life, there is still hope.

How can one have hope? Phyllis Diller says: “Though it may seem naive to some, there are persons who are optimistic simply because they choose to be that way.” The cynic may ask: “Why should I be optimistic? What is there to be optimistic about?” A good answer is that we must choose to be optimistic because any other path leads to quiet desperation.

It is possible to be aware of the seriousness of personal or world problems, but at the same time express optimism about the ultimate outcome. Good, solid answers come with the marriage of awareness and optimism!

“Helen Keller, known for the desirable attribute of courage, was once asked ‘Isn’t it terrible not to be able to see?’ She replied, ‘Not so terrible as to have two eyes and never see!’”

Many years ago the German philosopher Nietzsche announced that “God is dead.” Many people in our day feel that God, if not dead or absent, is at least silent. Dietrich Bonhoeffer, a German theologian of our century, says God is teaching us that we can get along very well without him.

This line of thought suggests that the secular world in which we live has a life of its own, with freedom and independence. God does not tamper with things, nor interfere with our work. One may respect this daring kind of thinking, but I think we must beware.

This thinking seems to be saying that human beings are no longer aware of God. Therefore, God is dead...just because God is not as obvious as a billboard is no proof he is only a mirage.

Perhaps God does not speak in shouting voice and we do not hear him in thunder or conscience. However, that does not write us out of the picture. It is possible to be aware of the seriousness of personal or world problems, but at the same time express optimism about the ultimate outcome. Good, solid answers come with the marriage of awareness and optimism!

“Helen Keller, known for the desirable attribute of courage, was once asked ‘Isn’t it terrible not to be able to see?’ She replied, ‘Not so terrible as to have two eyes and never see!’”
House raises min. wage

Good news for teen-agers came from Capitol Hill in Washington this past week as the House passed what labor lobbyists claim to be the single largest increase in the minimum wage ever to pass Congress.

The legislation upped the minimum wage to $3.05 by 1980—a 75 percent increase over the current $2.30 hourly minimum.

The bill passed by a 309 to 90 vote, sending it to the Senate where a similar bill has been approved in committee.

Under the House measure, the $2.30 hourly minimum wage would go to $2.65 an hour in January, $2.85 in January 1979, and $3.05 in 1980.

About 3.1 million of the nation's 14 million minimum wage workers are paid the current minimum wage.

Other minimum wage proposals were also acted on:

Special Postal Rates for Individuals

A special postal rate for individuals—not businesses—may be going into effect soon. The proposal, envisioned by U.S. Postmaster General Bailor, calls for a rise in cost on first class mail rates used for business purposes, while the rate for individual postage would remain at 1 cent.

The postal rate plan has caused a great deal of debate on capital Hill, and some critiques of the proposal have come to call the postmaster's "vision" the "citizen rate" plan.

To become eligible for the 3 cent postal relief a letter would have to have a hand-written address or return address on the envelope.

The proposal was subminimum wage amendment which would pay youths only 85 percent of the minimum wage for the first six months on the job.

This proposal was defeated by a vote of 211 to 210 in the House with Speaker Tip O'Neill casting the deciding vote.

Two other key labor proposals were also defeated by the House. One was a proposal to automatically increase the minimum wage annually by 53 cent of the average factor worker's wage and the other proposal was to scale down the so-called tip credit which allows employers to pay tipped workers only half the minimum wage.

The vote against automatic increases in the minimum wage was 223 to 190. In taking that vote, the House agreed to a proposal by Rep. John Erlenborn, R-Ill., to limit scheduled increases to $2.85 in 1979 and to $3.05 in 1980 instead of $2.85 and $3.15 as favored by organized labor and the Carter administration.

The House accepted by a 204-101 margin the Republican admenment to continue minimum wage for employees who receive tips. Labor had wanted to scale down the so-called tip credit that employers can take out of the hourly minimum wage to no more than $1 by 1980.

Work-study funds up 500%

Financial aid may be for you

Believe it or not, what you don't know, can hurt you. At least this statement has proven true when it comes to financial aid.

"I've had several students who applied and were not on financial aid, but found they did qualify for need based funds," said Louise Nowicki, Financial Aid Director for the college.

It is available at HPC to any student that can show financial need, which is as simple as contacting Mr. Nowicki at the financial aid office in Robert's Hall and filling out some forms.

"No one knows if you've made an application," said Mr. Nowicki. "For it's a very private thing which is handled through the college and there is no list published."

The money is available. For example, this year college has received a 500% increase in work-study funds.

Also available are National Direct Student Loans, N.C. Grants (for N.C. residents), Basic Equal Opportunity Grants, Supplemental Educational Grants, Christian education grants, ministerial concessions, Veteran's Administration programs, minimum wage and scholarships have "shown an embarrassing ability to undercut Postal Service charges while providing the same or better service."

What most critics are saying amount to this: because the postal service is the most utilities they are forced to depend on big-volume customers to help pay costs. Critics contend the escalating rate increases may drive away too many business users, rates will have to be raised or heavily subsidized for the remaining-individual-customers. For this reason many critics feel the "citizen rate won't last long."

If you are interested in working the Hi-Po, just come by to the staff meetings on Monday mornings at 11:00 in the Hi-Po office. Please note that our new P.O. number is 3510, for campus mail.

Freshmen elections

Petitions are due next week

by Ed Grandpre

Ellen Carmine, Elections Chairperson for Student Legislative, announced plans for the upcoming Freshman class elections on Tues., Oct. 11.

Petitions for office, explained Ms. Carmine may be picked up in the Student Personnel Office, and must be returned, with between fifty and sixty signatures, by Sept. 27.

The petition must also be approved by the Bursar's office and the Registrar's office before it can be filed in Student Personnel.

Freshman may sign only one petition for each office, and the offices are: President, Vice-President, Secretary, Treasurer, three legislative representatives, and one judicial representative.

Copies of the SGA election procedures, which govern all SGA and class elections, may be found in the current student, handbook, under Article X of the SGA constitution, or copies can be found in Student Personnel.
Kahle to perform at coffeehouse

Nina Kahle, performing on piano and dulcimer and singing everything from beautiful ballads to gutsy gin-soaked blues, will be the main attraction at the Student Union’s coffeehouse next Monday night.

The coffeehouse will be held in the old student center, beginning at 8:30 through 10:00. Admission is free to students with ID.

The following is a review of Nina Kahle written by Richard Gutsche for the Bugle American after one of her performances last year.

Nina is a composer/performer writing songs for piano, dulcimer and people. Her voice is clear, powerful, and exact, combining the range of Joni Mitchell or Laura Nyro, with the strength and “Gypsy” sound of Linda Ronstadt. This is not to say that Nina is a good copy of some of the better female artists of our time, but, that she is a very talented woman who uses these attributes to further enhance her own style.

As for her writing, Nina likes to write about love. She apparently has played the games we all say we don’t play, and through her lyrics she lets the listener know that she doesn’t really care for those games. Songs like “To Love A Man,” “Chameleon,” “Take Me To Town,” and “Caroline,” let us see a bit more of Nina Kahle than just a nice looking lady singing songs.

Along with the sad moments of love, there are also the happy. Nina lets us experience these happier moments with a really nice song called “Gypsy.” It’s a song about her grandmother, who I gather was quite the spirited old lady.

The piano on this selection is quite spirited also. Nina incorporates the music of an old Hungarian dance called the Csardas (char-dash). Other songs such as “Navy Man” or “Hayride” show another lighter side of Nina Kahle. Then there is the song, “I’m Wearin’ My Red Dress Tonight,” which is usually done on the spur of the moment and without accompaniment. It is definitely a song of seduction.

We could go on and on about the talent Nina quite obviously has. But, I think the best thing to do would be for people to get out to see and hear Nina Kahle for themselves. It’s safe to say that this lady with her dark flashy eyes and infectious smile will leave you with a nice warm glow for the ride home.

Buchwald to Speak at UNC-G

Art Buchwald, political humorist and nationally syndicated newspaper columnist will appear this Saturday, Sept. 24, at the University of North Carolina at Greensboro.

A mainstay of the lighter side of Washington politics and the author of nine satirical books, Buchwald will appear in Aycock Auditorium at 8:15 p.m. as part of the university’s Concert and Lecture Series.

Tickets for Buchwald’s lecture are available at the Aycock box office, 379-5546 on the UNC-G campus between 1 p.m. and 5:30 p.m. the rest of the week and one hour before performance time.

As a performer, Buchwald is heard on records and is seen on television. His column is syndicated in more than 400 newspapers worldwide and he regularly lectures to audiences across the country.

Buchwald got his start in newspapering, as a columnist with the European edition of the New York Herald Tribune in 1949. By 1962, his column was syndicated to the American press under the title, “Europe’s Lighter Side.”

During 1968, he tried his hand at playwriting and his play, “Sheep On The Runway,” opened in 1970 in Broadway and in Washington to fine reviews from leading critics.

Hooks to speak next week

Judge Benjamin L. Hooks, executive director of the National Association for the Advancement of Colored People, will be speaking here on September 27. His address, at 8 p.m. in the auditorium, is open to the public.

Hooks came to his post the NAACP on August 1 after serving five years as a member of the Federal Communication Commission.

He has successfully combined careers as lawyer, minister, businessman, and civic leader. He practiced law in Memphis, Tennessee, from 1949 until 1966 and was then appointed a judge by the governor of the state.

He was ordained a Baptist minister and has served churches in Memphis and Detroit, Michigan. In addition, he has been the producer and host of his own television program on Memphis station.

Hooks was co-founder of the Mutual Federal Savings & Loan Association in Memphis, and served as vice president for 15 years. He was also a director of the Association, and of the Tri-State Bank in Memphis.

He received his law degree from DePaul University after attending LeMoyne College and Howard University.

He was with the 92nd Infantry Division in Italy during the Second World War.

He is a life member of the NAACP and has been a director of the Southern Christian Leadership Conference, the Tennessee Council on Human Relations, and Shelby County Human Relations Committee, and other community affairs organizations. He is a member of the American Bar Association and other professional groups.

Her sister, Nancy Wilson, sings harmony behind Ann on several numbers, but contributes mostly by the classical quality of her guitar work.

Other members of the band are bassist, Steve Fosse, drummer Michael Desorci, keyboardist Howard Lees, and lead guitarist Roger Fisher.

Heart was recently named the Top New Vocal Combination in the singles category by the international trade magazine, Record World, as a result of their albums “Dreamboat Annie,” which has sold over 2½ million copies, and their current album, “Little Queen.”
Using the mythical monster from Lewis Carroll's nonsense poem "Jabberwocky," Monty Python has released a new film set in the medieval period with the basic theme that most of our nonsensical and ridiculous rules of civilization can destroy and ravage us as quickly and efficiently as any live monster.

Fast of the heels of Monty's last release, "The Holy Grail," "Jabberwocky" presents a medieval town besiged by a bloodthirsty monster which forces everyone to flee to the city for protection. The King (always presented in heavily quilted and tattered robes surrounded by dust and miasmic fog) decrees that anyone who can kill the monster will marry the Princess and receive half the kingdom. Stripped of its wit and satire, the film usually hits long after the situation of the joke. Blended with satire and wit, the events and characters vividly illustrate that beneath the veneer of our own civilization, there lurk not one but several Jabberwockies: poverty, welfare, ghettos, war, abortion, crime. The recent blackout in New York with its rioting, looting and crime unleashed its own Jabberwocky when the small reins of civil order broke. Stripped of its jive and satire, "Jabberwocky" could easily be a quite accurate depiction of the cruelties of the medieval period if not our very own.

by William L. De Leneu

"Star Wars" depicts future

by Bill Haight, Publisher N.O.C.R.

The phenomenal blast-off of the science fiction movie Star Wars has left Hollywood executives scratching their heads and grooping for explanations for the film's appeal. But actually what is surprising is that there are so many clues that "the future" is a hot contemporary subject, with student campuses-those places from which so many trends in American life originating and which the bulk of the movie-going public resides-the subject has been undersupplied. With the conspicuous success of Star Wars, however, "the future" and that certainly includes science fiction-is not likely to be left unexplored by the creative ranks of the entertainment, literary and merchandising communities.

Back in October, 1976, we reported in National On-Campus Review that "The Future: Fantasy and Fact" brought in historians, sociologists and scientists to give their view on the future-science fiction. The topic has been called. The sci-fi classic "The War of the Worlds" was screened.

The U. of Florida Daily Alligator recently concluded a three-part series surveying the future and followed it up with a request for readers to submit their ideas about the future. At Clemson U., sociology students researched the future and came up with a set of predictions (Sample: In 2028 the U.S. will elect its president by computer, sociologists will be the Miranda of the future.)

Maps during performance this past Monday.

( Photo By Debbie Johnson )

Bridgeport, Conn. - A student who sued her university in 1974 claiming she had wasted time and money attending a "worthless" course, lost her case earlier this month.

Back in the fall of 1974, some observers thought Ianniello was going to become the Miranda of the educational consumerism movement. Ianniello, in a widely publicized action, sued the University of Bridgeport claiming a course she took there was "worthless." She wanted her tuition money back, she said, along with lost wages and travel expenses.

It wasn't just a simple personality clash between teacher and student; Ianniello got an "A" in the course. The court didn't mean anything," she had said at the time. "One girl only showed up for four classes and she got an 'A' too."

But the judge ruled in favor of the university, saying courts should not second guess scholars on matters of curriculum. Ianniello did not produce any expert witnesses during the 4-day trial while the university had several former students testify that the course had been valuable to them.

Ianniello indicated she may appeal the verdict.

"I think not," he answers, then goes into his theories about the future of the human race, which include space migration and life extensions.

Future Shock author Alvin Toffler was the featured speaker at the U. of Tennessee's "Futuristics Exposition" last winter. At Sweet Briar College in Virginia a group of students held a "The Future: Fantasy and Fact" brought in historians, sociologists and scientists to give their view on the future-science fiction. The topic has been called. The sci-fi classic "The War of the Worlds" was screened.
Soccer team wins one lose one.

by Jay Gammon

The High Point College Soccer team opened its 77-78 season this week with a win over UNC-G and a loss to Duke.

In the UNC-G game, both teams had a hard time getting started. Although HPC dominated the first half they just couldn't put one in the net. The score at half time was 0 and 0.

In the second half, HPC again dominated the play. The first score of the game came on a direct kick by Doug Challenger with a little over 4 minutes to play. With about two minutes left in the game, Walter Rowe scored to make it 2-0 and an opening game victory for the Panthers.

On Friday the Panthers met their second opponent on home grounds. The conditions were very bad with the field wet and traction absent. High Point led the first half coding 1-0 by a John Goebel score. Duke scored two quick goals in the second half to make the final score 2-1. This was the first defeat of the season for the Panthers.

Letter to the Editor

Runners given no choice

Dear Editor:

I address this letter to the student body. WAKE UP YOU CONEHEADS! Did you know?

* The cross country team has been district champions for 9 of the last 10 years.
* Last year, 4 of the 5 all-district selections were from HPC.
* Beginning this year, there will be no cross country team.

Some interesting, well there's more.

1. At least two members of the team were not told of this fact until the first day of school. Quite a disappointment to an athlete who has trained all summer. An oversight or loss in communications...maybe, but to a person who has trained 20 or 3 hours a day for 3 straight months, it just doesn't seem fair or too responsible.

2. No alternatives were offered to the team in any way. I've been told that the reason for canceling the cross country program was because its budget was too large in relation to the number of students participating in it. Why couldn't the budget simply have been reduced thus allowing a successful sport to survive or why not just limit the team to initiate meets? Another option would have been to let the athletes raise the necessary money themselves, which we would have done to save our sport but

About the cross country program, the fact that another team (track) was going to be cut doesn't make much sense, especially if you're going to kill himself without a sprinter or jumper is necessary for these events.

* Without the distance or weight events to support the sprint and field events, it would be extremely hard to recruit these people. Besides no sprinter or jumper is going to kill himself without the support from the other areas of the track team. Therefore, it is inevitable that another winner (track team) is sure to follow the same fate as that of the cross country team.

Which leads me and hopefully all of you to ponder two things:

1. Since High Point college appears determined to abolish the two running sports, regardless of their winning merits, why did they invest so much money, approximately $13,000, in a new track only two years ago? Not for the night jogger, I hope!

2. First cross country, then probably track—who's next? In a talk with Dr. Murphy Osborne, it was mentioned that other teams on this campus would soon follow the same demise of as that of the cross country team.

Doesn't that make you wonder? As everyone knows, this is an athletic school and if the school won't support its athletes, why should we as athletics support the school? Students and athletes, I urge you to at least support yourself because this involves us all. Shouldn't we, as students, have a say in the survival of a championship team.

Just last year, Dr. Osborne gave a speech saying how every action an athlete makes reflects on this school and negative actions could cost this school hundreds of dollars in alumni and outside donations, gifts and support. "Dr. Osborne, you may never know how much this school has lost in future donations and support due to the negative action of the athletic department.

Regards,
Randy Larzelere

Run For Fun

New Club is being planned

A Run For Fun Club is being planned for High Point College for the Fall Semester, 1977-78 academic year. A proposed charter has been submitted to the Student Personnel Committee for its consideration of approving the group of runners as a club. Both male and female students who simply want to "run for fun" are invited to join with the group in its fun runs. If the club is approved, it hopes to serve as a medium in providing for healthy competition for club members by having both "fun runs" and also competing in meet races. We hope to promote running as a sport and to stress the many benefits that it provides to its participants. For those who wish to run with the group, see either Perry Macheras, Richard Hearn or Ed Plowman. The schedule below is a list of some of those meet races that some of our runners shall be participating in.

WWIH radio station

Will be on the air soon

It's been approximately twelve years, since a major effort was first begun to get a radio station on the HPC campus.

Now, with the FCC license in hand and the expected arrival of the transmitter this week, HPC's educational radio station WWH (where it's happening) has the authority and the power to go on the air.

However, eager listeners will still have to wait a little while longer, so the station can be wired up and students trained to broadcast.

Jeff Nesbitt, general manager of the radio station and a senior at HPC, said at the organizational meeting last Tuesday that the station can be wired in two weeks, but that the major holdup will be training students to broadcast.

Until then, officers of the radio station will be busy getting the control room, located at the top of Robert's Hall in the tower, into shape to broadcast.

A $2,000 air conditioning unit, which was just bought, has to be put in, and there is some carpentry work that needs to be done.

For any students interested in being members, there is a staff meeting each Tuesday night at 7:00 p.m. in the campus center.
Announcing

Part-time jobs

From Student Personnel:

There are several part-time job listings in the Placement files which are located in the Student Personnel Office in the campus center. If anyone is interested in part-time work, check these files frequently.

Dean Hanson

Marine Corps Rep.

On Wednesday, September 28 and Thursday, September 29, a Marine Corps representative will be here on campus to talk with students interested in career opportunities. These interviews will be held in the Coffee Shop from 9:00 to 12:00 and 1:00 to 3:00 P.M. If interested, please notify the Placement Office or Student Personnel to sign up for an interview.

Wednesday, October 12, Jerry Franklin of Food Town Stores, Inc. will be talking with students concerning positions in management. Interviews will be possible within the hours of 9:00 to 12:00 and 1:00 to 4:00 P.M. in the Placement Office.

More information is available in the Placement Office. Please notify the Placement Office or Student Personnel if interested in signing up for an interview. Please bring a resume when going for the interview.

Grad school exam

If any student is considering going to graduate school next year, now is the time to apply to take the GRE (Graduate Record Examinations). The dates are as follows:

- Nov. 9, 1977 for exam on Dec. 10, 1977
- Jun. 10, 1978

The aptitude test fee is $13 and the advanced test fee is also $13.

Information bulletins are available in the Student Personnel Office.

Dean Hanson

Jobs

APPLICATION

Jack A. Burzell of Cone Mills Corporation will be here on campus Tuesday, October 18 from 9:00 to 12:00 and 1:00 to 4:00 P.M. in the Placement Office.

Persons in Business Administration, Chemistry and Liberal Arts are of particular interest for management positions. Each applicant should have a prime interest in manufacturing or production. If interested, notify the Placement Office or Student Personnel to sign up for an interview. More information is available in the Placement Office. A resume should be brought when going for an interview.

Classified Ads

Anyone who plays folk music or related instruments such as banjo or guitar, harmonica or string harp please see Kevin Wilson at 820 Montlieu, for possible chance to play before groups.

Seniors need to apply for graduation

Registrar Holt has announced that the deadline for seniors to apply for graduation is September 30.

This year all seniors are also required to make an appointment and have a personal conference with the registrar to go over course hours and other requirements needed to graduate.

Holt said that it is imperative that all seniors make an appointment, for it could mean the difference between graduating next May or the following August.

Zenith staff meeting tonight in the Campus Center at 7:00 PM.

Enrollment is down;
HPC faces big decision

It's beginning to look as though the days when colleges were swamped with applicants and overloaded with students is about over. The trend seems to be reversing towards lower enrollment for colleges during the past couple of years; therefore, putting many colleges in a sticky situation.

At HPC, there are 81 fewer students on campus this year as compared to last year. The year before enrollment decreased 44 students.

The statistics speak for themselves: out of a base of 1,088 students last year, 212 graduated and 675 returned. There were 229 freshmen, 55 transfers, and 22 no shows this year.

The total adds up to 1,007 students on campus this year, as compared to the 1,088 last year.

To throw in some more figures; in 1976-77 there were 664 students returning and 82 transfers as part of a base of 1,152 students.

President Patton said that although its still in the process of analysis, the figures indicate the college is doing a better job of retention but lesser on enrollment.

He went on to say that HPC's is of national average but still poor.

Tuition money from students comprise approximately 80% of the income for HPC and it is based each year on 1,000 students. Patton said an effort is being made to overshoot 1,000 because the college expects to lose 60-70 students at the end of the first semester.

With 1,007 students on campus this semester, Patton said the college should finish with 950 students this year, which would bring the college under the 1,000 student base income mark.

The college has enough in reserve (money) to make up the difference,” said Patton, “but we do have to be concerned with the decreasing enrollment trend and take steps to bring it back up in the future.”

The ultimate decision as to what those steps might be to bring enrollment back up over the 1,000 level rests on the Board of Trustees of the college. The board’s next meeting is Oct. 12. Once the decision is made it will be in the hands of the President to carry out the plan.

Whatever the solution, the Board seeks out, it will no doubt compound the fact that researchers say the projected number of students will top out this year, followed by a general decline in the years ahead.

NCSL is working on a new bill

Despite financial obstacles, the High Point College North Carolina Student legislature (NCSL) is getting organized and rolling.

Pete Miglorini, the delegate chairman, reported to the Student Legislature that his current delegation attended the September NCSL meeting, held in Greenville, N.C. The meeting was to start laying plans for the Spring NCSL convention and to begin the needed research for the different bills to be presented to the convention.

The NCSL is an educational organization, designed to allow college students to learn about and experiment with politics and government.

Each delegation is permitted to present bills at the monthly meetings and at the spring convention, where they are then placed in committee for discussion. If the committee approves, the bill is brought up in either the Senate or the House at the Spring convention. The procedure is based on the one used at the state legislature in Raleigh, N.C.

Miglorini also explained the proposed bill for the HPC Delegation, which deals with Health and Safety regulations for non-profit summer camps, and other non-profit institutions.

A number of NCSL approved bills, said Miglorini, go on to be introduced in Raleigh, with some being enacted into law for the state.

The NCSL Delegation has, however, its funds frozen by the SGA Executive Council, so it has no money as of now to work with this year.

The delegation hopes that by working hard on their bill and by getting a lot of student participation, the executive Council will agree to grant funds for the remainder of the year, especially for the Spring Convention.

Any one interested in becoming a member of delegation, or just helping research HPC’s bill, should contact Pete Miglorini at 889-7128 or by sending him a note in care of the SGA student legislature.
Is Cross Country Drop Justified?

Dear Editor,

The athletic department and administration recently cut the Cross Country team from Intercollegiate Competition in order to allow for expansion of the Intramural Program. However, I, along with many other students, feel that the athletic dept. and administration could have expanded the Intramural Program without abolishing a very successful Cross Country Team (successful because the team has captured district honors for nine of the past ten years).

For this reason, I would like to pose a few questions:
1. As the faculty and administration, in the hopes that their responses will be published in a forthcoming issue of the Hi-Po.
2. How would you feel if the sport in which you participated was dropped over the summer, and you were not notified until you returned to school? Some students were limping dolefully about the “change” until they arrived on campus. Since the decision was reached on
3. As the intramural program

Although I understand that the Intramural Program will benefit over 500 people this year, and the Cross Country team consisted of only 10-12 athletes, I feel that the Intramural Program could have been expanded in a less damaging way.

In the future, athletes should be given ample notification of the abolishment of a sport. Furthermore, the reasons for its abolishment should satisfy those involved. As mentioned in Randy Larralde’s letter (Hi-Po, Sept. 21, 1977), the athletes were not even given the opportunity to save the team. I hope that the next time something like this is dropped from the Intercollegiate Program is notified beforehand, mainly to allow the athletes to transfer to a school where they will be able to participate intercollegiately.

Sincerely,
Ceryn Marie Reinhardt

Osborne named Carolina Commissioner

By Jan Dunkelberger
Dr. Murphy Osborne, Vice President of Student Affairs, has been elected by the members of the Carolina Conference as their commissioner for the ensuing year.

Prior to his election, Dr. Osborne has represented High Point College on numerous occasions from the Administrative viewpoint. The voting membership of the conference consists of a faculty member, the president, and an athletic director from each of the following member schools: Guilford College, Elon, Catawba, Atlantic Christian, Pembroke State University, Pfeiffer, and of course High Point College.

Cheerleader Squad Set

Left to right: Sharon Mann, Peggy Pesce, Mitzi Vestal, Maryann Phillips, Johnita Maynor and Captain Cindy Briggs.

By Cindy Briggs
Cheerleading tryouts are over, and the new squad looks forward to the coming year.

This year the squad has two new sponsors. They are Elizabeth Wilhoit and Mrs. Judy Patterson. The squad has three returning cheerleaders: Cindy Briggs, a sophomore from Dover, DE, Natalie Harris, a sophomore from Hopewell, VA, and Sharon Mann, a sophomore from Baltimore, Md.

The following freshmen are the new cheerleaders: Tina Lynch from Durham, N.C., Betty Maynor from Lumberton, N.C., Peggy Pesce from Bowie, Md., and Mitzi Vestal from Boonville, N.C. The alternate on the squad, Marianne Phillips, is a junior transfer from Bradenton, Florida.

The newly elected captain for the squad is Cindy Briggs, and the co-captain is Betty Maynor.

The cheerleaders hope to be getting new uniforms before basketball season begins. Pom pom routines, pep rallies, and bon fires are being planned for this year.

Volleyball team winning

A return visit to the west coast for the small College Volleyball National Tournaments seems inevitable if the Lady Panthers continue to down their opposition with the ease and manner displayed in their first 3 matches.

In the season's opener with Pembroke State University, the Panthers took three straight: 15-9, 15-8 and 15-6. Standout performers for the purple and white were veterans Ethel White and Vicki McLean and freshman Anna Marie Gonzalez. On the 22nd (September), the Panthers traveled to Elon to take on both Elon and Catawba College. The home fans had little to cheer about as the ladies of HPC stopped Elon in the opener 15-6 and 15-4. Catawba had even less luck as they were bombed 15-3 and 15-4. Coach Wanda Briley stated the Elon win was especially sweet since the team (HPC) and the Christians (Elon) are bitter rivals and therefore "we just love beating them." Outstanding players in the Catawba route were Gracie Simmons, Robin Cooper, and Marie Riley while Simmons, Roberta Riley and Karen Kristoffer- son drew praise from coach Briley for the Elon match. Thus far, this year coach Wanda Briley is quite pleased with the team's performance, stating they are "jumping higher and hitting harder" than last year. Coach Briley, formerly of Appalachian State, is in the process of implementing a new defensive and offensive strategy in hopes of remaining undefeated and achieving national status.

Plan to see the pride of High Point on the 18th of October against Lenoir-Rhyne and at 5 o'clock in Alumni gymnasium.

High Point College Hi-Lo - September 27, 1977 - Page 3

Field Hockey is 1 & 2

By Colleen Blackey
The High Point College field hockey team lost their season opener to Pfeiffer College (3-1) but returned to home turf to defeat Winthrop College (2-1) and Wake Forest University (4-0).

The girls opened their season on Saturday, Sept. 17th with a 9-3 loss to Pfeiffer College. The game came after only seven days of official practice because of a delay in physicals. But despite this lack of practice time, the team still made a good showing. They dominated the entire first half and lead 1-0 at halftime on a goal by junior, center forward Marianne Phillips. In the second half, Pfeiffer came out strong and scored three goals, one of which was on a penalty stroke.

On Wednesday, Sept. 21st, the girls defeated Winthrop College by a score of 2-1. The game remained scoreless until early in the second half when Patti Wooten scored on a beautiful assist from junior, Linda Ensey. Midway through, Patti Wooten scored again making the score 2-0 until Winthrop scored with just minutes remaining in the game.

The girls also beat Wake Forest University by a score of 4-0 with two goals from Patti Wooten and one each from Debbie Weber and Alyson Wilkes.

The next home hockey game is Oct. 4th at 4:00 against Clemson University. Come out and give the girls your support.

"New Commissioner"

Dr. Osborne's responsibilities as the new commissioner of the Carolina Conference are to act as treasurer; carry out the policies of the conference; acquire contractual agreements, such as officials and game sites, as representative of the conference in business matters; and to make decisions concerning player eligibility and other related topics.

During Dr. Osborne's tenure as commissioner, he would like to see four main objectives implemented. First, he hopes to enlarge the conference in the number of sports offered. Secondly, to increase and enhance the activity in women's sports. Third, to obtain more publicity about the conference. And lastly, to look into getting more schools in the conference.
Admissions begins recruiting

One of the primary purposes of the college’s admission office is to attend the various college day programs of the high school across the country in an attempt to find and recruit potential college students. At HPC, the admissions office, headed by Butch VonCannon, is in the process of beginning another recruiting year and would like to have some student input as they visit the various high schools and college day programs.

The schedule for the areas and dates in which admissions personnel will be visiting high schools and will be printed in the Hi-Po each week.

When they visit your high school area, VonCannon has requested that students come by the admission office if they have brothers, sisters, cousins, relatives, or friends that might be interested in coming to HPC and would like for the admission office to pay special attention to these students.

Admissions personnel at HPC cover the east coast from Connecticut to Florida and will visit every high school in North Carolina except three.

The following is the area and dates scheduled admissions will be covering: Oct. 3-7 Dotty Deaton will be visiting high schools in the High Point, Greensboro Guilford County, Asheboro, Randolph County area.

Larry McCauley will be at the Wilmington and other eastern NC areas. Oct. 10-14 Elizabeth Wilhoit will be in the Baltimore area.

Butch VonCannon in the New York area.

Wilhoit visiting western NC and Asheville area.

McCauley in Orlando, Florida area.

Desoto in Western NC and Boone areas.

Wilhoit in New Jersey area.

Oct. 31-Nov. 4 Wilhoit in New Jersey area.

Nov. 7-11 VonCannon in Washington DC area.

McCauley in Charlotte area.

Wilhoit in Raleigh area.

Nov. 14-18 VonCannon in Baltimore area.

Ken Chartier in New York area.

McCauley in Richmond area.

Wilhoit in Wilson NC area.

Nov. 21-23 Wilhoit in Rocky Mount NC area.

Nov. 26-Dec. 2 VonCannon in Miami area.

Deaton in Concord and Kannapolis area.

Dec. 5-9 McCauley in Hickory and Statesville area.

Dec. 12-16 Wilhoit in Shelby NC area.

Young Democrats meeting tomorrow

There will be a dinner meeting of all Young Democrats from Guilford County on tomorrow at Holiday Inn-West on Green Drive in High Point.

The meal begins at 6:30 at a cost of $3.25 per person. Those who wish to skip dinner should be advised that the meeting starts at 7:30 and is free and open to the public.

Carl Stewart, speaker of the North Carolina House of Representatives will be the guest speaker. Other various state and local candidates as well as incumbent officers will be present.

All interested High Point College students are cordially invited to attend. This meeting will count as one of the outside reading assignments for any of Dr. Wheelless’ political science students.

Hi-Po to go biweekly

From the editors

This week’s Hi-Po will be the last issue published on a weekly basis, at least for this semester.

The Hi-Po will now move to a bi-weekly publication schedule and a new format will be experimented with.

The new format will be more magazine oriented including more in depth stories about the college, interviews, and opinion. Also plans have been made to include a national news page which, we feel, college students should be concerned with.

But, if his truth is to rebel against fate, his error lies in negating what binds him to mankind. One cannot destroy everything without destroying oneself. This is why Caligula depopulates the world around him and, faithful to his logic, does what is necessary to arm himself and the destructive fury to which his passion for the life leads him.

Play begins Oct. 12

Wednesday, October 12 kicks off “Caligula” and the 1977-78 dramatic performance season at High Point College. Sponsored by the Tower Players, “Caligula” will be presented at 8:15 p.m. on Wednesday through Saturday, October 12-15. Admission into Memorial Auditorium for the event will be $2.50 for adults and $1.50 for students.

Written by Albert Camus, the play is set in an ancient Roman background and is a segment in the life of Roman emperor Caesar Caligula.

Featuring 20 HPC students, “Caligula” boasts the largest cast of any performance to be given this year.

“Caligula’s” director, Mr. Lynn Lockrow, Professor of Theatre Arts says he expects this play to be the highlight of the dramatic season here at HPC. He and the Tower Players urge students to come and bring cultural credit cards.

Caligula entered in contest

by Robin Henson

Speaking of the Theatre Arts department……...

The Tower Players fall production of “Caligula” is more than just an on-campus play now. It has been entered for judging in the American College Theatre Festival and will compete for regional honors therein.

“There are thirteen regions in the U.S.,” says Mr. Lynn Lockrow, the play’s director. “Out of all the plays entered in these regions, ten will be selected to go to national competition at Kennedy Center in Washington.”

American college Theatre Festival is a national organization under the auspices of Kennedy Center, the American Theatre Association and Amoco Oil Company.

“The whole point of ACTF,” says Mr. Lockrow, “is to urge quality performance, to get more people interested in theatre through exposure to live plays and to present plays that are not often seen.”

“Caligula” definitely falls into the category of “plays not often seen.” It is a very unusual show and as such is not produced very often. The play, although slightly altered in some points, is basically the story of Caesar Caligula’s reign as a Roman emperor and his subsequent death at the hands of his trusted followers.

One synopsis of the play states that: “Caligula, a relatively powerful prince up to then, becomes aware, on the death of Drusilla, his sister and mistress that this world is not satisfactory. Thence forth, obsessed with the impossible and poisoned with scorn and horror he tries through murder and the systematic perversion of all values, to practice a liberty that he will eventually discover not to be the right one. He challenges friendship and love, common human solidarity, good and evil. He takes those about him at their word and forces them to be logical; he levels everything about him by the strength of his rejection and the destructive fury to which his passion for the life leads him.

But, if his truth is to rebel against fate, his error lies in negating what binds him to mankind. One cannot destroy everything without destroying oneself. This is why Caligula depopulates the world around him and, faithful to his logic, does what is necessary to arm himself and the destructive fury to which his passion for the life leads him.

Two students, convicted on Sept. 22 of violating Ethics Code of the Student Government Association, have now filed an appeal to President Patton. Section I states the punishments for anyone convicted of “giving or receiving information on current examinations or of misrepresented work produced by another person as his own.”

A hearing for the two students occurred on Sept. 30. The hearing was held in grand jury style with members of the student court acting as the jury. The attorney general’s office presented evidence, and the court ruled there was sufficient evidence to constitute a trial.

The trial began at 3:00 p.m. on Thurs., Sept. 22, and lasted until 7:30 p.m. (This included the jury’s deliberation of 1 hr. 20 min.). Matt Dunton, junior class rep., served as chief justice for the trial. Other court members were Steve Bishing, senior class rep.; Chip Aldridge, sophomore; and the professor of the class in which the alleged event occurred.

The jury, following deliberation, found the defendants guilty of exchanging information during the exam. However, due to the circumstances and the con-
Blessing in disguise

With enrollment down in colleges across the nation, many will be facing the task of providing good, complete educational courses as well as balanced departments and major degrees.

Possibly it was a good idea for HPC to delete the interim courses since this did put all the United Methodist Colleges on the same calendar schedule. With high schools and grade schools enrollments dropping steadily it may be necessary for the Methodist Church to close one of it's schools and dissipate those students to one of the other four. This closing could be only temporary but would mean a loss in jobs to many (as in grade schools now).

It is unreal to think that lowering standards, costs, or increasing public relations will help alleviate the problem entirely. These might be means but not ends.

There is one simple fact that we must deal with; there are fewer people under 18 than in a long time, and it's going to be with us until around the year 2000. Experts say there is another "Baby Boom" going on right now but...the colleges won't feel this effect for at least 18 years.

On the economic level this means a period of inflation of wages, but recession on retail and wholesale goods. In the vision circle of economics, the end result can be expected to be a decrease in unemployment with the average wage down and a trend to lower prices on the shelf.

On the national job market this is a fantastic opportunity to college graduates because there will be fewer people to fill an ever increasing number of jobs.

The solution to all this? There is none, this is the solution:

Life With A Capital L

Time for student emotional reform

It seems that there are as many subjects talked about in columns as there are people.

In the last few weeks while reading the Hi-Po, I have learned that the protest over "Intercom Invading Privacy" is one individual interpretation of the so-called lack of privacy on this campus. Is the plea for more privacy a call for students to become monks and enter a monastic order, shutting out the world and cutting off communication between resident counselors and dorm residents?

Education and curriculum are being discussed like "wildfire". Getting back to the "basic" of education and teacher reform are emphasized. What about student reforms or another religious Reformation concerned about ecumenism?

One student reform would be to require students to live the life of a professor for a day. I'm sure we as students would be humbled to know that professors are people too even though they are in higher positions of authority.

One student reform would be to require students to live the life of a professor for a day. I'm sure we as students would be humbled to know that professors are people too, even though they are in higher positions of authority!

We would then appreciate the professor's task of leading students in the search for truth and develop more respect for human personality.

You've heard of "What's My Line?" Now let me speak "What's On My Mind." It is possible to be aware of the seriousness of personal or world problems, but at the same time express optimism about the ultimate outcome.

I believe education should not merely stick to teaching the facts, but should encourage each person to discover themselves, learn to live with one another, and obtain insight as to our relationship with that something greater than ourselves we term as God.

One cannot make all important lessons that one can learn in life is that of relating to another person in a relationship. It takes effort from both persons in the relationship to live in harmony. One cannot dominate as an individual in a relationship and expect the other person to cease to exist.

How about hungry children? One person commented to me that we should be doing in the world is saving souls. My questions are: "Doesn't God have control of the soul?" and "Shall we pretend to go out and save souls and let the poor souls on this planet starve their bodies to death?"

This same person had the daring audacity to say to me that I should not get emotional over hungry children. If one cannot get emotional over hungry children, what can one get emotional about in this world?

I wonder if the world wouldn't be a better place for all time if people cared more than they do. Try caring more for people in this world. You may not see the results tomorrow of your act of kindness, but the world will be a better place because you acted upon your convictions.

Horses, Horses, Horses

by Ed Grandpre

A former HPC student, Pat Jobe, wrote an article for the Hi-Po called the Gadfly's "Horses, Horses, Horses". There's a horse mania on campus now and it's called ZERO BASED POPULATION. Replacing one for another really isn't even a government, it's more of a worker's union board. It bargains for the students with the administration. It makes deals and fights for better working conditions. It also spends around $38 out of every student's tuition (a total of about $38,000 this year).

The "patient's" track record doesn't look too bad so far. This horse has been ridden to victory, winning such prizes as open dorm hours, which the SGA just got extended for us. It won reduced penalties for drinking alcohol on campus (did you know that if you got caught, the penalties used to be as low as a two week's suspension); the current penalty is a $25 fine, or ten hours of work for the SGA.)

Our horse will, next semester, start broadcasting over HPC's own SGA-owned radio station and a branch of the SGA, the Student Union, keeps us busy and entertain-

(Here comes the point.)

The horse might live, but only and I do mean only, if we help out the doctors. Freshmen can help out on Oct. 11, by voting in the Freshmen class elections. We can all help by voting in the Spring elections.

We can also improve our horse's chances by checking up on our legislatures (every class has four), and making sure that they do their job. The same goes for all SGA officers, as well as the Student Union chairpersons. Remember all SGA and class officers can be impeached for not fulfilling the duties of their office.

Go to the legislature, see what's going down. Give your ideas to your legislators. We can still aid this horses, and we ride it to victory.

(Get the point?)
Lit. needed for rest of life

"Oh, my God— it's Huckleberry Finn for the Thirteenth Time!"

This title statement was uttered to me in dismay some years back by a freshman co-ed who had just learned that one of the required readings for freshman composition was Huckleberry Finn. My answer to her concern over having to read this novel again could also be an answer to a current question—why require a literature course for all High Point College students? In view of the recent proposal by Dean Cole to require a selected core of basic liberal arts courses, it is paramount to remember and investigate the nature of literature and the purpose of a liberal arts education.

First of all, there is little justification for requiring a course in literature on the assumption that literature is the best area of academic study. Any serious study of any area and curriculum should be able to challenge a student's intellectual potential. But a study of literature does provide perhaps the best opportunity to study the most valid subject of history—man himself. Over 6,000 years of recorded history, man certainly has changed in his habitat (Crest toothpaste, man on the moon, the bionic man and woman). But the age-old questions of individuality, personal integrity, the awesome power of technology to dehumanize, the interwoven mesh of evil even within the best of institutions, and the hopeless annihilation of poverty and suffering have remained basically the same, primarily because man ultimately refuses to look at himself honestly and truthfully. As George Orwell once said quite bitingly, "Men learn from history that men never learn from history that men never learn from 'history.' As a mirror of ourselves and our past, literature is agogless in the sense that it dramatically tricks us into looking at ourselves through the eyes of other writers. For this reason, one piece of literature—no matter what age, history, genre, or writer—can be read many times by many ages and never yield its full meaning. In its richness of symbolism, language, culture, and art, it can be approached from many angles, Huckleberry Finn could be read every year for the rest one's life, and still be that eternal Mississippi River of life's experiences. Each student brings with him his own experiences to relate to this timeless up-all. Like all art, literature is timeless yet timely.

But another more important justification for studying literature is that it offers the most comprehensive method of integrating all learning. While the new proposal of required courses covers most areas of liberal arts, there is no single course that attempts to integrate the learning in others. Somehow, through a magic want attitude, we trust that students taking so many hours from each area will miraculously be endowed with a unified view of learning and life at graduation. All areas can easily be integrated into a course of literature. Religion and philosophy can apply their moral systems of evaluation. History (whose records usually only reveal a minimal truth in what actually happened) can link a world of disparate instances to present age in its reconstruction of historical milieu. Even science and math have played a great role in the development of mass media, computers, and language translation systems that have made literature readily accessible. But to find the essence of the human spirit we need, perhaps, less an expert test tube, a historical newspaper one hundred years old, or in a codified religion. One looks to literature, itself born from the foul rag and bone shop of man's heart but immortalized in symbolic language, a language so powerful that the poet Yeats once said, "I have words that can burn."

Yes, it was Huckleberry Finn for the thirteenth time and I hope for the rest of the student's life. I do not believe that education should be a series of high and low roads of area study. The goal must rather be a concerted search for truth. It is literature that integrates and unifies because it stems from the basic source of man's hopes—the human heart and imagination.

College life is made up of many opportunities and challenges. Many young people today are finding their individuality in his personal growth and development. Within the religious activities on campus, there are formal organizations where others are invited to group gatherings. All students are invited to consider these possibilities should they have interests in these areas. Note that these groups are listed in the order of the days on which they meet.

On Monday, there is a Bible study gathering at 8:45 p.m. in Belk Dorm Lounge. Contact Dick Brown in G-8 McCulloch Dorm. Alphas Delta Theta is a non-denominational Christian service sorority for girls which seeks to serve the campus as well as the High Point community at large. Alphas meet second and fourth Monday nights in the Campus Center, Meeting Room #1. Contact Beth King in 402-D Belk Dorm.

On Tuesday, there is an informal Bible study for women students. This provides an opportunity for study and sharing and meets at 7 p.m. in the basement of the chapel. Contact Lynn McCulloh in 403-C Belk. MUG or "Men Under God" is an informal gathering for men students and has as its purpose: fellowship and sharing. MUG meets at 10 p.m. on Tuesday nights. Contact Don Everhart in 104-D Belk. This organization is for men interested in getting to know each other and planning and leading. All students are invited to attend. If interested in getting involved in Campus activities or wanting to attend, (Chaplain and Assistant Dean of Students, FCA or Fellowship of Christian Athletes meets at 7 p.m. on Campus nights in the gym. You don't have to be an athlete to show an interest and take part in this organization. Contact Dee Reisenweaver in 104-D Belk.

On Wednesday, Campus worship is at 11:30 a.m. Varied types of worship, with Holy Communion celebrated the first Sunday of each month, highlight this campus challenge. Students assist in planning and leading. All students are invited to attend. If interested in getting involved in Chapel activities or wanting to attend, (Chaplain and Assistant Dean of Students, FCA or Fellowship of Christian athletes meets at 7 p.m. on Campus nights in the gym. You don't have to be an athlete to show an interest and take part in this organization. Contact Dee Reisenweaver in 104-D Belk.

On Thursday, Fellowship Teams meet at 7 p.m. in the George Cooper Conference Room. This organization is devoted to serving youth in local churches and meets weekly for fellowship and sharing of new ideas in Christ. Contact Bill Reisenweaver in 104-D Belk.

On Friday, BASIC or "Brothers and Sisters in Christ" meets at 7 p.m. in the basement of the chapel. This is an informal time for fellowship through varied activities. Some activities which BASIC is making possible plans for include roller-skating, coffeehouses, showing movies, and other activities which are designed for sharing, fellowship, and getting to know each other as person. Contact Don Everhart for more information.

On Sunday, Chapel worship is at 11:30 a.m. Varied types of worship, with Holy Communion celebrated the first Sunday of each month, highlight this campus challenge. Students assist in planning and leading. All students are invited to attend. If interested in getting involved in Chapel activities or wanting to attend, (Chaplain and Assistant Dean of Students, FCA or Fellowship of Christian Athletes meets at 7 p.m. on Campus nights in the gym. You don't have to be an athlete to show an interest and take part in this organization. Contact Dee Reisenweaver in 104-D Belk.

Survey says hiring to stay healthy

The U.S. hiring outlook is optimistic for the final three months of 1977 with no slowdown anticipated, according to the final Manpower quarterly survey of 5,000 U.S. employers released Monday by Manpower, Inc., the world's largest temporary help service.

According to Mitchell S. Fromstein, President of Manpower, Inc., "The survey results indicate businessmen expect hiring activity to continue at a healthy pace during the final quarter of the year (October, November and December). Thirty-three of the employers surveyed anticipate additional hiring which is equal to the hiring projections reported in a similar Manpower survey taken last June."

As expected in anticipation of the upcoming holiday season, the strongest hiring projection came in the Wholesale and Retail Trade sector where 41 percent of the respondents indicated they would increase hiring levels. This is up from a projected 30 percent last June projecting an increase in hiring projected for the Wholesale-Retail category in Manpower's June survey. The Wholesale and Retail sector accounts for 22 percent of the country's non-agricultural employment. Nine percent of those surveyed in the Wholesale and Retail Trade sector anticipate increases in employment while 48 percent see no change for the next three months.

The Southern region of the country continues to lead the nation in hiring expectation as it has for the last two consecutive Manpower surveys with 37 percent of the region's employers expecting additional hiring. All 10 industry sectors for the South exceed those of the national sample in hiring plans. Six percent of the Southern employers anticipate decreased in staff with 55 percent expecting no change.

The West, although down from last quarter's Manpower survey, is significantly higher in hiring expectations (32 percent) than one year ago. The Northeast continues to lag national figures with 29 percent of those interviewed forecasting an increased hiring pace. Behind the South in the hiring outlook is the Midwest where 31 percent of those surveyed expect an increased pace. However, the Midwest also leads the country in anticipated-reductions in employment with 10 percent of the sample forecasting declines in employment.

The hiring pace remains strong for Durable Good Manufacturers with 34 percent, the same as in the June Manpower survey, expecting to increase their employment levels during the next three months. Although the rate of hiring growth has remained the same, the fraction of the sample showing decreases in this sector has grown from six to nine percent since the last Manpower survey was taken last June. Similar to the dip is registered in the Manpower survey one year ago, 29 percent of the Nondurable Good Manufacturers interviewed said they will hire more workers with nine percent calling for staff reductions.

Three different industry sectors dipped noticeably in the survey. Strong Public Administration hiring observed in June dropped significantly from 39 percent to 28 percent in the current Manpower survey. Of these more than 400 offices are located in the U.S.

Legislature buys ten new refrigerators

By Ed Grandpre
The Student Legislature meeting of Sept. 20 was highlighted by decisions to by new refrigerators, and approval of offices for the Judicial Committee, as well as other minor items of business.

Upon the recommendation of the SGA Executive Council, student legislature voted to spend $1,100 out of the contingency fund. The money, according to Sherry Jones, SGA treasurer, will be used to buy ten new refrigerators. They will be rented to students at the regular rate.

Also upon the Executive Council's recommendation, Matt Dunton, Junior Class representative was appointed as Chief Justice. Dave Bobbitt was appointed Pro- secutur for the court and Ed Grandpre to the defense.

Other business items included making further arrangements for the Oct. 11 Freshman class elections. Speaker Norris Woody also announced that the HPC Alumni Association has decided to return the SGA's offer of $500 to start a faculty enrichment program. Had the Alumni Association taken the money they would have been obligated to raise $100,000 by 1983.

Student-legislature meets again at 6:30 pm on Tues., Oct.18 in Meeting room #2 in the Campus Center.

Zenith pictures to be taken

Smith Studio (Raleigh, N.C.) will be on campus Oct. 10-14 to photograph undergraduates for the 1977 Zenith; Seniors will be photographed outdoors in an on-campus environmental setting. Four poses will be taken of each student, and proofs will be submitted to each. The Zenith staff will choose the print to be published in the annual.

The schedule for Seniors is as follows: From 8:30 a.m. until 12:00 p.m. a photographer will be in the wooded area outside the Campus Center; from 1:00 p.m. until 4:00 p.m. a photographer will be on the front campus, in front of Robert's, near the fountain by the entrance gates, and on the lawn. Prior to being photographed, all students must register in Room 2 of the Campus Center.

Underclassmen will be photographed from 8:30 a.m. until 12:00 p.m., and from 1:00 p.m. until 4:00 p.m. Photographs will be taken in Room 5 of the Campus Center.

New ministerial scholarship

A scholarship honoring The Rev. and Mrs. Robert M. Hardee, Greensboro, has been established at High Point College by his sister, Mrs. Lucy H. Olsen, Durham.

The scholarship honors the occasion of Mr. Hardee's retirement from the active ministry of the United Methodist Church. From 1933 until his retirement in 1973 he served churches in Greensboro, High Point, Climax, Troutman, Stone- ville, Gastonia, China Grove, Granite Falls, and Mocks- ville.

When completely funded, the scholarship will award awardees of approximately $1,000 per year. First preference will go to a student or students, planning to serve the Western North Carolina Conference of the United Methodist Church.
Nina Kahle Performs

Lisa Mickey

"Your body is a vehicle. Say something you express yourself with," said Nina Kahle. That was the music critic last Monday night as she both amused and amazed High Point College students with her self-deprecating humor. Ms. Kahle entered the Old Student Center for the show sound check quietly carrying two instruments as if, in a matter of minutes, she was breaking out the stage whistling, singing about her own sakes, and scolding a fanatic for stifling his voice.

Her opening number was of her own compositions, each for the Sky. She exploded into a lovely breath of voice and so that seemed to add to her own musical psyche, including the song, she moved her shoes and shedded for an afternoon of music expression. Ms. Kahle, a twenty-four year old, self-taught musician, demonstrated to students that her climb to the top is a determined one. She had been performing before stage and university audiences for two years and had at concerts around the country with the experience of a professional. Ms. Kahle's superior voice quality with the voice qualities of Joni Mitchell, Laura Nyro, and an along with her own style is a jellyrole of vocally singing melody, while showcasing amazing voicings in a song by "O-O".

The pace of the music varied throughout the concert, sometimes falling into the category of acoustical rock, then mellowing back out into perhaps a song on the dulcimer. Ms. Kahle related many of her past memories between songs, sharing wit and general experiences. This served to both explain and introduce the significance of the song to follow. She stated, "Every song says something else. For every song I always feel something different. It's a personal thing with the give and take between the audiences and me."

Ms. Kahle speaks of Stevie Wonder and Laura Nyro favorably, saying, "both of them are original and expressive. Most singers these days don't have a lot of feel. They do and that's important."

"My mother and father are both pianists. We always had a piano and I always played it. One thing led to another. I'd like to learn how to play the harp, but I never really make plans. I get too disappointed sometimes, so I just let it happen."

Despite what Nina Kahle says about making plans, she has very big things coming up soon. In November, she will record her first album under the Windsong label with MIT Okun as her producer. The album is due on the market in January. Following that, Ms. Kahle, will go on national tour.

In casual conversation, Ms. Kahle stated that "success in an attitude." Whatever is her true ideal of success is still undetermined, but Nina Kahle has laid out a foundation for a bright musical future. I feel sure that her theme song Monday night was her latest composition, "Every Man was once a child."

Radio Station is Ready

With the arrival of the transmission two weeks ago for the radio station, WWIH now has all the basic equipment needed to go into operation.

However, it has now been decided that WWIH will not go on the air until next semester due to the decision to write the FCC for reduced broadcasting hours of operation and some loose ends that need to be tied up.

WWIH is now licensed by the Federal Communications Commission to broadcast daily from 7:00 a.m. to 9:00 a.m. and 5:00 p.m. to 1:00 a.m.; on Saturdays from 12:00 noon to 5:00 p.m.; to 7:30 p.m.; to 2:00 a.m.; and on Sundays from 12:00 noon to 5:00 p.m. and 7:30 p.m. to 1:00 a.m.

Yet, the matter was discussed at the last radio station meeting and the decision was that the hours would be too hard to keep up with on a weekly basis, especially on the late night hours on the weekend days. Instead, hours will probably be moved back to 10:00 p.m. each night.

Also, some loose ends need to be tied up such as wiring up the transmitter, installing the air conditioner, and finishing some carpentry work that needs to be completed.

Dr. Deleeuw, one of the three advisors for the radio station, said that at the beginning of operation, all programming will be pre-recorded on tape to avoid making mistakes.

By pre-recording all programming, any mistake that is made can be simply ran back and erased.

Deleeuw said that there will probably be no live broadcasting done until we find someone affluent enough to do live broadcasting.

Also, in the meantime, a master schedule of programming for all the organizations on campus is being made up and will be completed in the next few weeks.

Scandinavian seminar

All Seminar students participate in the Introductory, Midyear and Final Sessions, where matters related to their studies, experiences and individual progress are reviewed and discussed. The focus of the Scandinavian Seminar program is an Independent Study Project in the student's own field of interest. An increasing number of American colleges and universities are giving full or partial credit for the Seminar year.

The fee, covering tuition, room, board, one-way group transportation from New York and all course-connected travels in Scandinavia is $3,800. A limited number of scholarship loans are available.

For further information please write to: SCANDINAVIAN SEMINAR, 100 East 86th Street, New York, N.Y. 10028.
Cross Country Cut

by Jan Dunkelberger and Steve Bising

In an interview with Dr. Murphy Osborne, Vice-President of Student Affairs, some significant light was shed on the controversial discontinuance of the very successful cross country program here at High Point College. In an attempt to provide a more qualitative intramural program to the students of this institution, the money used to maintain the cross-country program was cut off and reallocated to the expanding intramural sports department. In the past, the intramural sports program was managed and administered solely by students and done quite successfully also. But with the increase of student participation in the various intramural events and the loss of student director Mike Ludwigson, via graduation, it was felt by the administration that the continuance and maintenance of this service was more important than a perennial district championship team. Dr. Osborne states that the decision to drop cross-country and strengthen the intramural program with additional funds and a full-time staff led by Coach Bob Davidson (ex-cross-country mentor) was not a last minute one, but had been going on for almost 5 years. Osborne went on to say that with over 500 or so people involved in intramurals, it was more feasible to spend the money on it instead of 6-7 runners so they could travel and compete in cross-country.

When asked about the consequences to the runners concerning their cross-country scholarships, Dr. Osborne stated, “there was only one athlete who was strictly cross-country and he planned not to return, also there was no one with an actual cross-country scholarship, though there were runners with scholarships that ran cross-country.”

Dr. Osborne did go on to say that the runners should have been contacted over the summer instead of finding out about their misfortune after they got here. “If I was a cross-country runner, I’d feel the same way,” Dr. Osborne assures that the rumor concerning the possible dropping of the track program is only a rumor, because “of the number of participants involved.”

An alternative to the defunct cross-country program is the newly organized “Run for Fun” club lead by Dr. Ed Pilowman. This club is open to any student or faculty member who likes to run either competitively or for leisure.

Wilkes Paces Pantherettes

By Colleen Blackney

This past week the hockey team defeated Catawba College (2-1) and Averett College (5-2) to raise their overall record to 4-1.

On Wednesday, Sept. 27th, the Pantherettes took on a very much improved Catawba team at home in a very close game. The first goal was credited to High Point even though there was a discrepancy on who actually scored the goal. Catawba then came back to tie the score 1-1 at halftime. The game remained a tie until late in the second half when Patti Wooten scored, giving High Point a 2-1 victory.

On Thursday, Sept. 29th, the team traveled to Averett College in Virginia and brought home a 5-2 victory. Although the field conditions were slow, the team’s high spirit and morale allowed them to overpower their opponent. Freshman Link Sharon Kaler scored on a break away early in the game.

Then, after Averett tied the score, sophomore Alyson Wilkes scored twice before the half was out. The second half began with High Point ahead 3-1. Alyson Wilkes scored once again to start off the second half. Averett College immediately came back, making the score 4-2. Junior Patti Wooten then scored the final goal of the game, which gave High Point a 5-2 victory.

The hockey team will take on Salem College at home on Oct. 16 at 4 p.m. Go out and support them in their effort to bring home a conference championship.

Need Equipment?

The Student Union has available camping equipment for rental purposes. Anyone desiring to rent any of the equipment listed below should reserve the desired equipment in the Student Activities office during scheduled office hours Monday-Friday.

EQUIPMENT AVAILABLE

<table>
<thead>
<tr>
<th>Rental Fee</th>
<th>Deposit</th>

HEAD COACH: Wanda Briley (First year at High Point College)
Volleyball team is undefeated

by Linda Thompson

First year coach, Wanda Briley is definitely taking time in continuing one of High Point College’s most recent success stories. Last year’s volleyball squad ended the season with a 34-9 record, 3 championships, and a 9th place finish at Nationals. Coach Briley expects much of the same this year and from the way the lady Panthers have performed in their first 7 matches, it looks like they could very well repeat last year’s feat.

By playing a new offensive strategy which employs a 3 hitter attack, the team is having no difficulty generating their usual explosive type of offense, but defensive aspects of the game need to be worked on. Briley is mainly concerned with the occasional lapses the girls have after jumping to a large lead.

When asked about any personnel weaknesses, the Panthers may have Coach Briley stated that “though some players may lack playing experience, there are no weak links and that the High Point College bench is as strong as some team’s first string.” “It is difficult to pick out an outstanding player at this time, especially with this team since they all are good athletes, but Roberta Riley has consistently played well in all of the matches thus far.”

Though Coach Briley expects to sweep the conference title again for the third straight year, she looks to Elon to provide the stiffest competition in the conference, and Wake Forest in division II play. (Editor’s note: High Point college has already defeated Elon twice.) State honors look like a 4 way race between High Point, Chapel Hill, N.C. State, and Duke.

Overall, Briley and assistant coach Wendy Suessing are fairly pleased with the lady Panthers thus far, but then again the season is still young and they don’t wish to get overconfident.

Nevertheless, High Point College Volleyball has again established itself as one of North Carolina’s powerhouse programs and a repeat of last year’s record or better is definitely a good possibility.

Fall Golf Swings

By Mike Wallace

Tryouts for the 1977-78 High Point College golf team are now completed revealing some familiar as well as new faces. Returning lettermen for High Point include last years MVP, French Bolen, along with Bill Wall, Perry Skeen, Paul Rapley, and Jeff Hall. The fall schedule, small as it may seem, will provide a good indication of how the team will perform in the tough season that lies ahead. The fall season opens October 10-11 at Wilson Country Club in a tournament hosted by Atlantic Christian College. Then comes the Elon Invitational, October 17-18; followed by the Methodist College Invitational, November 3-4.

Coach Woody Gibson anticipates a banner year for the Panthers, and for the first time, there will be no set varsity six; keeping the team members battling year-round for the top spots. All in all, it seems that the Panthers are well prepared and are looking forward to another winning season.

Soccer team loses two

Sky Gammon

The HPC soccer team was defeated against two tough opponents this week, but they are not out on the short end just yet. Last Wednesday’s match at home against a strong, inexperienced WCU provided HPC with an 11-5 win scoring seven goals on the spot. They couldn’t stop the purple and white hitters with Western’s fans echoing in the gym, High Point quickly scored one goal. Later in the first half, the Panthers cruised to a 15-6 win scoring seven goals at their feet, the fans got their wish of a high scoring game. The Tar Heels of North Carolina defeated Atlantic Christian fared even worse as they were clawed 15-6 and 15-2.

Although Wake is the strongest team the Panthers will face in Division II, Briley feels that the squad didn’t face the Panthers was. They fell to defeat by the scores of 15-2 and 15-12. Atlantic Christian faced even worse as they were clawed 15-0 and 15-2.

Coach Briley said the team was playing much better, and an improvement on defense was evident as the girls blocked or covered most of the attempted strikes by their opponents. She said the girls tended to play “down” to the other teams’ level and “pitter-pat” volleyball replaced the explosive power game that High Point normally employs. Marie Riley and Karen Kristofferson were cited by Briley for their potent serving and Gracie Simmons was singled out for her fine defense which rejected a lot of the opposition’s spikes. In the second round of both matches, the court was turned over to High Point’s second string of Ana Gonzales, Robyn Cooper, Paula Pernet, Jeannie Harrison, Vicky McLean, and Sylvia Chambers.

Students enjoy lazy days at the Point.

by Linda Thompson

First year coach, Wanda Briley is definitely taking time in continuing one of High Point College’s most recent success stories. Last year’s volleyball squad ended the season with a 34-9 record, 3 championships, and a 9th place finish at Nationals. Coach Briley expects much of the same this year and from the way the lady Panthers have performed in their first 7 matches, it looks like they could very well repeat last year’s feat.

By playing a new offensive strategy which employs a 3 hitter attack, the team is having no difficulty generating their usual explosive type of offense, but defensive aspects of the game need to be worked on. Briley is mainly concerned with the occasional lapses the girls have after jumping to a large lead.

When asked about any personnel weaknesses, the Panthers may have Coach Briley stated that “though some players may lack playing experience, there are no weak links and that the High Point College bench is as strong as some team’s first string.” “It is difficult to pick out an outstanding player at this time, especially with this team since they all are good athletes, but Roberta Riley has consistently played well in all of the matches thus far.”

Though Coach Briley expects to sweep the conference title again for the third straight year, she looks to Elon to provide the stiffest competition in the conference, and Wake Forest in division II play. (Editor’s note: High Point college has already defeated Elon twice.) State honors look like a 4 way race between High Point, Chapel Hill, N.C. State, and Duke.

Overall, Briley and assistant coach Wendy Suessing are fairly pleased with the lady Panthers thus far, but then again the season is still young and they don’t wish to get overconfident.

Nevertheless, High Point College Volleyball has again established itself as one of North Carolina’s powerhouse programs and a repeat of last year’s record or better is definitely a good possibility.

Ann Nowsome and H. Stanley Hackney senior art majors, are exhibiting their works in the main foyer of the Holt McPherson Campus Center.

The exhibit includes pencil drawings, paintings, charcoal drawings, pastel drawings, weaving, coil pots, sculpture, etchings, silk screens, ink and charcoal drawings, ceramics, and woodcuts.

Ann will do her student teaching soon. She expects to teach at the high school level following graduation. She is a member of the SNEA and has worked in the library during college.

Sandy, an intern at Reynolda House, Museum of American Art, Winston-Salem, is planning a career in museum education or in design. She is vice president of the senior class.

**Crafts fair at High Point Mall**

The Westchester Academy Parents Association will sponsor a Crafts Fair and Attic Treasures Sale on October 8 at High Point Mall, 8 a.m. to 5:00 p.m.

Eighteen artists and Craftsmen from the Triad area will offer wide variety of items for sale. The Attic Treasures area will provide old and new furniture, accessories, baked goods, and plants for purchase.

All money received from the sale will go toward the purchase of educational equipment and materials for the school.

**Ward receives appointment**

Dr. Herbert Speece, Chairman of the North Carolina Student Academy of Science Advisory Board, has announced the appointment of Dr. John E. Ward, Jr.

Ward will also serve as a co-director of one of the seven districts in the state.

The NC SAS has as its major objective the promotion of the sciences at the secondary school level. The Spring 1978, district meeting will be held on the High Point College campus.

---

**Day Students Meet**

The Day Student Organization met last Wednesday with President Rhonda Banther presiding over the meeting.

The most important issue discussed at the meeting was the very poor turnout. Out of nearly 400 day students there were only about 25 at the meeting. Letters are being mailed to all day students urging them to attend the meetings as well as informing them of upcoming events.

The day students are planning many social events, including a haunted house at Halloween, a yard sale, and a picnic. Pictures will be taken on October 12 at the day student meeting. All day students are urged to attend.

8 High Point College's Hi-Po - October 5, 1977
Liberal Arts declining: remain strong at HPC

In recent weeks there has been considerable concern over the decline of the liberal arts curriculum on several college campuses today. Most of the discussion has centered around the fact that colleges with provisions in their charter aimed at establishing liberal arts are now finding the curriculum has become more like those of vocational and technical institutes.

According to Dean Cole; however, the liberal arts curriculum has not dropped at High Point College as he said, "the college is committed to a liberal arts program and will continue to be in the future."

Cole said that the basic liberal arts majors that the college started off with such as philosophy, religion, history, literature, the languages, sciences, and humanities are still going strong at HPC today.

In fact, the only liberal arts major that has been dropped according to recollection has been the major offered in French that was because "there simply wasn't enough interest in the major to justify itself."

Yet, in talking with President Patton, there is some merit to the idea of colleges moving over to a more vocational-practical-job finding curriculum. Patton said that he thinks the trend for colleges is to move to the more interdisciplinary majors such as the present Communications major, to give students more of what they want and to attempt to increase the floundering enrollment levels at most colleges.

An example would be two of the possible majors Patton would like to look into-furniture marketing, and management of retirement homes, both of which have very promising career outlooks in the city of High Point.

Courses such as these potential majors and the Communications major on campus now are interdisciplinary, meaning that they are set up within the framework of existing majors and courses, where there are no new courses added or faculty hired to teach them.

Patton has said that the potential for these interdisciplinary courses are great and because of their uniqueness, they would add much to the college's character as has the major in Humanity.

However, despite the trend on the curriculum of HPC, as Dean Cole said, the liberal arts base will still remain a part of the basic curriculum. Cole said that no matter what the major is, the college would not have the program which did not have English and other basic liberal arts courses.

Test to make thinkers out of students

by Robert Gillis

College students of years to come may enter one up on those of us already here. The reason for this is a heretofore top-secret Functional Literacy Test. Thousands of Florida high school juniors are facing this test over the next two weeks.

This exam was authorized by the 1976 state legislature in response to complaints that kids were graduating without being able to read road signs or do simple math problems. This marks the first time a state is requiring students to demonstrate basic skills such as balancing a checkbook before being given a high school diploma.

The 117-question exam will require students to demonstrate ability to read and do math on a seventh grade level. If they cannot score at least seventy percent on each section they will not be given a diploma. As horrible as it may seem, education officials predict that up to thirty percent of the high school juniors will fail the first time they take the test.

Thomas Fisher, the man in charge of developing the Functional Literacy Test, says there is no doubt what Florida is doing is terribly attractive to the rest of the nation. Much of this interest is due to a swing away from educational experimentation back to basics.

Lee Andrews, the principal of High Point Central High School, states that trends are moving toward more competency testing before diplomas are awarded. 'High school students should be able to read before being given a high school diploma.'

High Point College has an Educational Policies Committee composed of several students and faculty members, with Dr. E. Roy Epperison serving a chairman. The committee met recently and decided to conduct a study on the general education requirements and to recommend any changes it feels are necessary.

The members of this committee are aware of the present trends in education in high school and colleges. If the Functional Literacy Test is a success in Florida and other states follow suit, the number of "functional illiterates" to be found on college campuses will likely decrease.

Trustees approve 14 new assumptions

The Board of Trustees of High Point College met last week in an effort to overhaul its own organization. Also the Board set up 14 basic Assumptions, guidelines from which President Patton will operate the college in the future.

Our college's Board of Trustee's function is to operate the college in any way it sees fit considering it has the legal responsibility to plan, organize, direct and control HPC's functions. The Board, composed of 28 members, holds the college in trust for the N.C. Methodist Church. The Board is not in evidence directly to the students, but its broad powers establish the overall goals and objectives of this college, which is no easy job for men of even Continued on page 5.
Class Officers Key to SGA Potential

Undoubtedly, the Student legislature has the potential to achieve the most of any organization on campus because it’s set up as representatives of the student body and it’s direct link with administration and faculty.

Just try and name any other organization on campus that can attempt to reduce the penalty of intentional destruction of college property from a two week suspension to a mere fine—so scarce in doing so.

This doesn’t mean that we think the legislature is getting away with murder or even that we are opposed to that bill. The point was just an illustration of the bargaining power with the administration and faculty that the legislature has in getting students away from murder.

Bargaining is a service the legislature provides for students as the representatives of students just as is the sale of refrigerators and subsidizing of publications and other campus organizations.

Yet, is the legislature capable of reaching its full potential? Upon attending, the last meeting, we heard numerous pleas for more help on the four standing committees of the legislature—which are legislation review, elections, steering and budget, and public relations. To compound things, this general purpose of “unifying the class” just doesn’t always cut it because of the general apathy of students—meaning no one attends class meetings; thus, making class officers find out they are in do nothing positions, then lose interest.

The recent freshmen class elections showed a good amount of interest. It seems to indicate they care. If the administration and faculty that the legislature has in getting students away from murder.

The result is that the elected class officers lose interest soon it may reflect on the whole freshmen class.

We all know, of the natural tendency for class officers to become nothing more than resume fillers. One of the reasons is undoubtedly that class officers are not given any specific duties. The phrases “it’s what you make of it towards the general purpose of “unifying the class” just doesn’t always cut it because of the general apathy of students—meaning no one attends class meetings; thus, making class officers powerless and useless.

The result is that the elected class officers lose interest and prettiness soon everybody suffers because of the potential loss.

We believe is presently losing a good amount of potential.

The college degree is a status symbol worth only what one pays for it. Personality, adaptiveness, ingenuity, and versatility are much more important than the coveted college degree.

Admittedly, one cannot get the desired job, or advancement without the college degree. The knowledge acquired during the educational process of college is most important, and the learning experience at college is unsurpassed in value.

The degree is an ideal achievement of successful organization and planning to attain a predestined level at a faster rate.

In other words the higher the degree, the faster the rate of promotion within the company/organization. One wanting to “rise high” in the organization needs the degree. One without motivation to “rise” need not have the degree.

Seif fulfillment of educational knowledge can be attained without the expense of a college degree, and at a much more enjoyable time period than the early adulthood stage.

So what does the college degree do for one? It forces one to buy an expensive frame to hang a piece of paper in (the degree); spend four years of life in limbo; spend up to $13,000 for “professional instruction”; buy up to $3,000 worth of non-understandable, intellectual, unenjoyable books; makes one fill out endless forms, and other official intellectual, unenjoyable books; and, other official paperwork and office filing; spend hundreds and thousands of new people while preparing for a job interview.

The college degree holder must pray that the man who started looking for the job 4 years ago (right after high school) hasn’t flooded the market with employees and nulled the chances of him getting a job.

The actual value of the college degree is understandable in mathematical logic. The degree is directly proportional to the value of ones previous total worth plus 4 years of experience in the game called Life.
Behind the Scenes

Another wrinkle around the eyes should do it as Zack Dunn applies the finishing touches to complete his role, while Rick Hines pauses for a cigarette to calm stage butterflies and reflect on his important lines. Both are part of the Caligula cast.

Caligula Review

Caligula commended for success

by Lisa Mickey

The Theatre Arts Department of High Point College presented "Caligula," a two act play, October 12-15, in the Memorial Auditorium. The drama, described by its author, Albert Camus, is one of "superior suicide", tyranny and finally, conspiracy on the life of Caesar Caligula.

Caligula's sister and mistress, Drusilla, died and Caligula suddenly became eccentric with his desire to obtain the unobtainable. He constantly battled with himself and his council while he terrorized all with his excessive testing and executions. Power and tyranny was Caligula's game and in the course of the play, execution was defined as being "a musician's past time... an emperor's vocation." Such was the case with Caligula.

His madman actions called for a conspiratorial response from his own council, who ruled much in the same way as those in Shakespeare's Julius Caesar.

The drama itself was heavily laden with, first, Caligula's complex personal situation, then the overall philosophical interpretation of Caligula's actions and the council's response to them. His motives were unclear and hard to follow for the average viewer. Another observation to be noted is the constant comparative symbolism to religion and recent history. At one point in the play, one loyal follower swore his devotion to Caligula who in turn, tested the devotee's actual faith and had him executed. Actions of this nature were typical of the crazed young emperor. Albert Camus said of Caligula,"... If his truth is to rebel against fate, his error lies in negating what binds him to mankind. One cannot destroy everything without destroying oneself". This supports his "superior suicide" theory.

The twenty-five cast and crew members of Caligula, under the direction of Lynn Lockrow must be commended for their fine performance of such a difficult drama to enact. The Players effectively conveyed emotions from either end of the spectrum, all the way from wild united outbursts of laughter to the extreme terror of Caligula's next move. Caligula, portrayed by Gene Richardson, was especially outstanding in his powerful monologues and explosions of madness. The entire cast worked together efficiently to build up to the climaxing point of Caligula's murder, where he died before his palace mirror. Perhaps there was always a reflection of death.

Life With A Capital L

"I've a life full of questions"

Every day of my life, I find that I am asking more questions and wondering more and more about life and its mysteries. Through the essential, though often painful, process of growth characteristic of human experience I learn that every day is different.

One day of life may be thoroughly full of frustrations. On days like that, I question my attitude to the situation. Perhaps I got up "on the wrong side of the bed" so to speak or maybe I forgot to enjoy life.

Often I find what I believe and feel are two very different things. What bothers me is the present situation of Christianity. There are so many people parading around saying: "This 'all' Christianity is embodied solely in my interpretation." I have never believed that. No one has a "corner" on the complete knowledge of the existence of God.

The sad fact is that those that claim this "God thing" called Christianity has only one interpretation can cause honest seekers and doubters who are searching for meaning and purpose in life to conclude that either God is dead. He does not care and it's a cruel world of doggy people only concerned for themselves.

Nearly everyone has heard of the quest of the Holy Grail (the legendary cup used by Jesus Christ at the Last Supper). Some time after this, the cup disappeared. In the story of King Arthur, the Knights of the Round Table set out to find the cup. After a long search, the knights finally caught a vision of the holy cup; but each of them saw it differently. To some, the Grail was surrounded by mist and clouds which prevented clear vision. Sir Lancelot saw the Grail covered with fire. To him, it was a vision of God's stern and awful judgment. Sir Galahad saw the Grail as being overlaid with jewels and gold in all their radiance and glory.

I don't have a "corner" on the knowledge of the existence of God and you may see God differently than I do; but in my human experience I have discovered that our Maker loves us, the world we live in is God's world, human life has an intended purpose, and every one of us is a unique person.

I challenge you to not give up on your quest of knowledge concerning the existence of God. One does not discover a new truth unless he examines all the evidence. God may be a cloudy mystery to you at this point in your life, but discovering the added meaning your Maker gives to life can make all the difference in your world.
The issues

Gas deregulation

Among the issues that will effect students in the coming years is that of gas de-regulation, one point of President Carter's Energy plan. The administration says natural gas de-regulation will cost consumers approximately 10 billion dollars, which the Senate says is the price we must pay to provide more of the product. Also the Senate rejected a proposal to charge lower rates during non-peak hours, a proposal that would at least justify "all-nighters" as economical.

Killer Satellite

On the military front, Russia has developed a satellite killer and the U.S. has developed a mobile missile system that would be more lethal than any present system. The Russian satellite killer is supposed to be excellent against lower level orbitals, (Mainly weather satellites?) The new American missile is designed against J.P. Stevens, a southern based manufacturer who is infamous for breaking national labor laws.

Minimum Wage

The new minimum wage law, which would eventually effect nearly five million workers, was agreed upon in House-Senate conferences last Friday.

The wage would increase a total of $1.05 during the next four years: going to $2.65 an hour in January, $2.90 in 1979, $3.10 in 1980, and $3.35 in 1981.

The House-Senate negotiators ended up with a nickel less than the Carter administration's goal of a $3.40 hourly minimum in 1981.

Both legislative bodies had passed their own versions of the minimum wage rates with the House going basically with Carter's proposals and the Senate going about a nickel under that, which in most cases, was a compromise proposal between labor and the Carter administration.

Panama Canal, Middle East.

In world news the Panama Canal and the Middle East hold the main interest. The new Panama Canal treaty, which would turn "the ditch" over to the Panamanians, is in trouble with the conservatives in spite of the Presidents endorsement. In the Middle East, Israel has agreed to discuss problems with a combined Arab delegation including the Palestinians refugees after the formation of the nation of Israel. The agreement is in itself considered a major breakthrough.

College Aid

In college news, the Supreme Court upheld as constitutional the way North Carolina finances aid to private colleges. North Carolinians now receive $500 a year to go to private school while the school receives $200. Separation of Church and State was the main argument for cutting off funds, while the keeping open of schools like HPC was the main defense of such grants.

Labor violation.

Of business interest, the House passed a bill that would stop fines on violators of labor laws and make it easier to recruit union members. (The unionization of college students could mean no weekend homework and stiff fines for guilty professors.) The bill is specifically designed against J.P. Stevens, a southern based manufacturer who is infamous for breaking national labor laws.

Social Security

The Social Security system is going to be bailed out by non other than the tax paying citizens. To keep the Social Security system solvent, the House Ways and Means committee proposed to increase by 298 dollars the cost to an employee. (It definitely pays to be old and but really costs to get that way.)

Opponents, there has been an underlying disadvantage directly linked to the advantages brought up by opponents. Also Governor Jim Hunt has been in and out of the issue where in some instances he campaigns for the issue and in other instances he tries to remain aloof.

The debate is also marked by the basic disagreement between Hunt and his lieutenant governor Jimmy Green who opposes succession.

In addition, there seems to be many personalities speaking out in favor of succession; yet, very few having actively campaigned against succession in fear of political repercussions.

State history seems to be the only opponent of succession to stand out and hold its ground. With Jimmy Green's campaign not going anywhere, the voters will have to decide.

N.C. Wrestles with Succession

One of the hottest items to emerge in the state of North Carolina since liquor-by-the-drink and the Equal Rights Amendment is the question of succession for governor and lieutenant governor.

For out-of-staters, North Carolina is one of the seven states that allows for no gubernatorial succession, with others being Virginia, Tennessee, South Carolina, Kentucky, Mississippi, and New Mexico.

Attempts to allow gubernatorial succession in N.C. have been attempted in the past and failed, however, this time is the first to be brought before a statewide vote.

The statewide vote will be upcoming this November 8, which includes two bond issues and four other constitutional amendments on the ballot.

As it stands now, the succession issue is expected to pass, but the debates have been heated with for every advantage being cited by opponents, namely in stand taken by college republicans in their campaign of "Students Against the Power Grab," led by Doug Markham, chairperson of the N.C. Federation of College Republicans. This group is mainly arguing that the amendment is being drawn up specifically for Gover. Hunt as 24 Democrats who opposed the 1975 version of the bill are now in favor of the 1977 version, which would allow Hunt the possibility of winning another four year term.

Anyway, if the gubernatorial succession amendment is approved by N.C. voters, governors serving consecutive terms will clearly have more political clout with the General Assembly, according to a report recently published by the Institute of Government.

Whether this clout is for better or for worse is what the voters will have to decide.

"With hair like ours why are we playing softball? We should be doing 'Mop 'N Glow' commercials."
Non-apathetic freshmen
elect class officers

Indications are that the Class of 1981 is not following the trends of the previous classes. Former First, it was learned that the recent freshmen class scored higher of their SAT's on the average and now seem to be reversing the trend toward apathy with respect to voter turnout.

Out of the total 229 freshmen students enrolled this year, 131 turned out to vote in the recent freshmen class elections, which registers out exactly 57.2%.

The newly elected freshmen class officers are: Mike Showalter, president; the winning runner of the run-off between Tammy Garrison and Ken Swanson, vice-president; Cyndi Roberts, treasurer; Susan Wall, secretary; and Jacky Hendrix, Keith Chance, and Sharon Billings, legislature representatives.

The duties of the class officers include providing some uniformity among the respective classes; in this case the freshmen class. The president calls meetings of the class and sets up various programs for the class to participate in as a whole. The vice-president is the second in command as he/she would take over in case of an accident to the president. The secretary takes notes at the meetings and distributes the minutes around the campus as well as providing other public relation services. The treasurer is the keeper of the class funds.

As of this year, each class has been allocated $500 each to work with in addition to any fund raising projects the class may undertake.

Another important function of the class officers is being involved with the student legislature of the SGA. The president of the class and the three legislators for each class have one vote each in any matter coming before the legislature.

The 112 lab fee (payable to 20 students. Pre-requisite: English 101 and 102. The 812 lab fee (payable to the second day of class) covers the cost of using equipment, purchasing supplies, and processing of film. No prior knowledge of photography is assumed.

The course examines the structure of a film: concept of frame and shots, editing, sound, camera composition, and theme. After viewing and analyzing some classic films, the primary project in the course if the actual writing, filming, and editing of a short color sound film. The object of the film is entirely up to the student, but more than likely each film will be a group project of 4-5 students.

For further details and information, contact the course instructor, Dr. De Leeuw, in Cooke 25-E.

INTERIM FILM MAKING COURSE
Those students interested in enrolling in English 2201, Film Analysis and Film Making, should sign up early for the course on the day of pre-registration, November 23.

A schedule of the run-off between Tammy Garrison and Ken Swanson, vice-president; Cyndi Roberts, treasurer; Susan Wall, secretary; and Jacky Hendrix, Keith Chance, and Sharon Billings, legislature representatives.

The course examines the structure of a film: concept of frame and shots, editing, sound, camera composition, and theme. After viewing and analyzing some classic films, the primary project in the course if the actual writing, filming, and editing of a short color sound film. The object of the film is entirely up to the student, but more than likely each film will be a group project of 4-5 students.

For further details and information, contact the course instructor, Dr. De Leeuw, in Cooke 25-E.
Panthers Take Second In Volleyball Tournament

By Steven Bliasing
Jan Dunkelberger

Though this is only the second year the UNC-G Invitational Volleyball Tournament has been in existence, it has already established itself as one of the finest and most competitive in the South. Although four of the participating teams were from out-of-state, High Point and Duke, were considered as pre-tournament favorites.

In the qualifying rounds, High Point experienced some unforeseen misfortunes as they were forced to default a match with Louisville Junior College because of seriously under-crewed in Carolina Conference rules prohibiting member schools playing 2 year colleges. Because of this "loss" and 15-13, 15-4, upset at the hands of the University of Maryland, the Lady Panthers were forced into a "do or die" match with Wake Forest. Should HPC lose to Wake they would be eliminated from the tournament. This match was not to become a repeat of the first meeting between these two teams, where High Point won early, instead the Lady Deacons extended a sluggish Panther team 3 games before bowing 15-13, 7-15 and 15-10.

No more than twenty minutes after their poor showing against Wake Forest, the ultimate in North Carolina Women's Volleyball was about to take place. Charlotte's power and national contender Duke University, led by Leslie "The Bionic Arm" Lewis, was High Point's opening round opponent in the Double Elimination Tournament. Thus far, both teams had done little to live up to their tournament reputations and expectations. If the poor performance against Wake Forest hadn't even occurred 20 minutes earlier, the Panthers rose to the occasion as they never had before this season. The Panthers took both games quite easily, as they assumed command and never relented regardless of the score. For this victory, try, attempt by Duke, the Panthers would counter with an explosive jam by Marie Riley or Karen Christofferson.

In the quarterfinals against Maryland, who went undefeated in the qualifying round, High Point again just took control and never allowed the Lady Terps to regain their winning style of play. The first game took exactly 18 minutes as the Panthers dominated total play and took an easy 15-2 victory. The second game was a bit different as Maryland regained their composure and took the game into overtime before succumbing to the Panthers (16-14). The semi-finals against seven time Mississippi state champion, Mississippi University for Women was another fine example of what the Panthers are capable of doing when they have their game together. Though the final score of the first game was numerically close (16-14), this game was never really much of a contest. Time after time, the Panther front line of Marie Riley, White and McAuley on beautiful sets by Kerri Christofferson rose to the net to block potential spikes on defense. Offensive power was generated by Riley, White and McAuley on beautiful sets by Kerri Christofferson rose to the net to block potential spikes on defense. Offensive power was generated by Riley, White and McAuley on beautiful sets by Kerri Christofferson.

Only once did the Panthers falter, which allowed Mississippi to make up a seven point deficit (11-4) but Riley and McLean quickly cut the hopes of the women of Mississippi off by blasting 15 in less than 20 minutes.

"That game was definitely one of the highlights of our season, thus far. Duke was predicted as being the state powerhouse and they had only lost one game before this one."

The entire team was psyched up as the game began and the spirits grew when Sandy Svennick scored the first goal of the game. The half ended with High Point ahead 1-0. This score held until there were only 10 minutes remaining in the game, when Duke tied the score at 1-1. The pace grew and with four minutes left, Alice Wainwright scored to give the Panthers a 2-1 edge. The defense held, giving High Point its 8th consecutive win.

The last home game is on October 19th against Averett College. So get out there and support a winning team... High Point College Hockey.
Panthers Notch Fifth Straight Shutout

by Scott Hance

The Purple Panthers tallied their fifth straight shutout victory Thursday night when they downed Atlantic Christian College 5-0. The win pushed the Panthers’ record above .500 at 6-5 overall and increased their conference record to 3-0, good for a first place tie with Pfieffer. Goalie Todd Miller has recorded four of the shutouts while Mike Angelo turned in the other no-goal performance.

The streak started when the Panthers defeated Catawba College 5-0 on October 3rd at home. Doug Challenger put two penalty kicks past the Catawbas goalie to lead the High Point scoring. Walter Roe also made good on a penalty kick and Jeff Potter and Ronny Clendenin picked up goals to aid in the victory.

Four days later, the Panthers traveled to Belmont Abbey College where they came away with a 2-0 win. After a scoreless first half, Jeff Potter scored with 22:43 remaining in the contest and less than 30 seconds elapsed before John Goehle gave High Point an insurance goal.

The squad then traveled to Elon College on Sunday, the 9th, and exploded for an 8-0 romp over the hosts. Jorge Nobre and Steve Asbury each achieved hat tricks for the Panthers as the visitors took a 4-0 lead at halftime and coasted the rest of the way. The three-goal performances by Nobre and Asbury were the first of the season for the Panthers.

Mike Angelo filled in for injured goalie Todd Miller and also turned in a shutout performance as High Point whipped Lenoir-Rhyne College by an 8-0 margin. Eight differed Panthers cracked the nets as Ken Chartier’s troops jumped to a 4-0 advantage at the half and were never challenged from on high.

Atlantic Christian College visited High Point on a wet night this past Thursday and went home 3-0 losers to the streaking Panthers. Todd Miller was again in the nets but was called upon to block only five shots to preserve his fourth straight shutout. Walter Roe scored in the first half of play to give the Panthers all they really needed for the victory. However, freshman Jorge Nobre scored twice in the second period to give the home team a little breathing room. The two goals gave Nobre a total of six goals in his last three games.

When asked why the Panthers have suddenly turned things around, Assistant Coach Woody Gibson had to say, ‘we have several new players that have finally put things together. The first part of the schedule was kind of tough. There were games we could have won but we just hadn’t gotten things together.’

The first part of the season does look tough when you consider that the team faced opposition like Duke, N.C. State, and nationally ranked Appalachian.

The Panthers will square off against Pembroke State University at home on Tuesday, October 18 at 3:30 and then against Pfieffer on Thursday at 3:30. The final game of the season will be against arch-rival Guilford College at Guilford on the 29th. All 3 of these games are crucial to the Panthers in their quest for the conference title.

Field Hockey: Winning but for Who?

Everyone loves a winner—do or die? From the lack of attendance at High Point field hockey games this statement hardly seems true. Or is it just that most students fail to realize how successful the team actually is?

How many students on this campus know that High Point field hockey was state champions last year and that they went on to represent North Carolina in the IAAW Region II tournament? Well, they did and in the process finished their season with a very fine record of 10-4-1.

This year’s IAAW state tournament will be held at Duke University on November 2nd and once again High Point plans to be right in the thick of things.

However, in a recent article of The Greensboro Daily News, sports writer, Pat Moore, was quoted as saying that Appalachian, Carolina, Duke and UNC-G are the state powerhouses, with High Point (supposedly) in a rebuilding year. This statement seemed to upset the team and Coach Kitty Steele, who said, ‘Last year we beat both Carolina and Duke and this year we’ve beaten 2 so-called “powerhouses”, UNC-G (1-0) and Duke (2-1), not to mention such big name schools as Wake Forest (4-0) and Clemson (4-0).

Despite these outstanding statistics, it seems that High Point must continue to prove themselves. Their stiffest competition remaining is against Carolina on Oct. 31. When asked about this game and the upcoming tournament, Coach Steele said, ‘We are capable of holding our own against any team. The girls are playing together as a team and things have really started to gel.’

Outstanding team play has come from several of the freshmen members as well as some of the more seasoned veterans. Leading the spirit and morale for this years squad are junior tri-captains Linda Easley, Debbie Weber, and Patti Wooten. High scorer for the team thus far is Patti Wooten with 10 goals. Earlier in the season she had a seven game scoring streak.

With four regular season games remaining, it is not too late to ‘get on the bandwagon’ and support a winning team.

Lady Netters Win Big

By Steve Bising

Although the intercollegiate tennis season doesn’t open until this spring the HPC Women’s Tennis Team scored a very big victory by taking first place in the prestigious Eastern Collegiate Invitational Tournament at Fayetteville, N.C.

The Lady Panthers tallied 46 points to easily outdistance tournament host and area rival Methodist College by 10 points. With 8 schools in all entered, each player had to survive 4 rounds to win their individual flight. Individually for the Panthers freshman Vicki Williams won the #1 flight, freshman Kathy Nebilut won the #2 singles, a 3 year veteran Tems Allen took the number 4 spot and freshman Donna Pfister nailed down the number five title. Veteran Sally Teesler and freshman Vicki Williams teamed up to cop the #1 doubles crown.

Coach Kitty Steele was extremely pleased with the over-all performance of the team, especially the play of the new freshman since this was their first taste of collegiate tennis. Also Coach Steele remarked that the Panther victory was especially significant because it was achieved without the services of the Riley sisters, Marie and Roberta, who are playing on the volleyball team. Last year Marie took the #2 singles crown in the convenience while freshman Roberta is considered one of the top ranked players in New York.

Announcements

Effective mid-term, Fall Term 1977-78, students who have attained unsatisfactory grades at mid-term will be notified by course instructors of unsatisfactory grades. Unsatisfactory grades of upper-classmen will be forwarded to the Registrar who, in turn, will notify the student's advisor. An unsatisfactory grade is a "D" or an "F". The Faculty will continue the policy of reporting all grades for freshmen at mid-term, first semester.

On Sept. 28 the following were formally inducted as pledges in Alpha Phi Omega: David Byrd, Kristi Mills, Fred Patterson, Mary Carter, Holly Wates, Donna Eisznaugle, Ed Mullis, Nancy Reichle, Tammy Allen, Kathy Crane, and Bob Eliason. Alpha Phi Omega, a national service fraternity, has become coed this year at High Point. Following completion of the pledgeship period, the above will become brothers on Dec. 7.

**UPCOMING STUDENT UNION MOVIES**

*Thursday, Oct. 27*  "A Man Called Horse"
Richard Harris is a man called "Horse" by his captors in the extraordinary story of an English aristocrat in the 1700's who is captured by the Sioux Indians. His only chance for escape is to prove his manhood in their savage culture, an effort which culminates in the ritual "Vow to the Sun", one of the most brutal events ever filmed.

*Thursday, Nov. 3*  "Other Side of the Mountain"
A tragic love story, this film is the true account of Jill Kinmont, a famous American Olympic ski contender. During training she experiences a devastating fall that crushes five back vertebrae and severs her spinal cord. The irrepressible love of Dick Buek (Beau Bridges) is the only force that gives her shattered meaning and the courage to overcome physical adversity.

*Both movies are to be shown in the Old Student Center at 7:30 and 10 p.m.*

**The Brothers of Alpha Phi Omega are sponsoring a Bloodmobile visit to the campus of High Point College today. All students and faculty members are urged to stop by Harrison Hall between 10:00 and 3:30 to donate a pint of blood. The campus organization which gives the largest number of pints will receive an award. Your support of this service to the High Point College community is greatly appreciated.

**THE RING**

YOU SAVE FOREVER WILL SAVE YOU $10 RIGHT NOW.

GET $10 OFF.

For one week every year, Josten's makes an untraditional offer on the most popular college tradition. Here it is. Get $10 off the purchase price of any Josten's college ring you select by ordering at the same time as students all around the country during Josten's National College Ring Week. October 24-29.

AND MORE RING FOR THE MONEY.

Only Josten's gives you so many deluxe options at no extra charge. Choose white or yellow gold. Ask for full name engraving or a facsimile signature on the inside of the ring. And, where the ring design allows, choose sunburst stones or birthstone-- even enrusting if you want it. No extra charge. You get more ring for the standard purchase price and now a 10% discount, too. See your booktree for details today.

Available at: COLLEGE BOOKSTORE
HPC to be forced into paying music fees beginning Jan. 1

Higher education's free music is about to end and HPC will be in the same boat as all other colleges and universities as a result.

Starting January 1, the federal copyright law will no longer exempt colleges and universities from payment of royalties for music played on their campuses.

In other words, unless HPC pays some kind of licensing fee, any music played at events such as Moose Lodge dances that has not been written by the band that is performing will make the college itself, as well as the organization liable if royalties are not paid.

In this sense, colleges and universities will no longer be able to escape paying royalties on copyrighted music by being a non-profit educational organization; instead, they will be no different than dance-hall businesses as far as copyright law is concerned.

As a result colleges and universities across the nation are hiring lawyers who are experts on copyright law and, along with the higher education groups, they will be negotiating with music licensing agencies this month for a licensing model policy that will cover all types of non-exempt musical performances that occur on campuses.

The outcome of these negotiations will directly affect HPC as they will either have to adopt the nationally negotiated form of agreement or risk the chances of being caught with performances containing copyrighted music.

In explaining the concept of paying royalties, Tom Burke, director of Student Activities, said that the situation is like income taxes: you don't pay unless you're caught; however, if you are caught then it is the facility that is liable and not the performer. Burke said that the only way out seems to be in adopting the licensing fee form that is being negotiated and paying the dues.

Although it is not yet clear what the form or rate of licensing fees will be, it is estimated that in some cases, music licensing fees might be as high as half the total budget of student-activities board.

Higher educational institutions would be limited further in that the new law would even include royalties on music performed on records in addition to live performances—just as long as there is admission being charged to the event. Under this aspect of the law, included would be disco performances on campuses such as the APO Greasers Dance at HPC.

With all taken into consideration, the only beneficiaries of the new law would be the three national copyright agencies—ASCAP, BMI, and SESAC, which handle virtually all the royalty payments for performances of copyrighted music in the United States.

Howard Buten, better known as Buffo the Clown, Singer, Musician, Mime, and Artist will perform at 8:00 p.m., Wednesday, November 9, in Memorial Auditorium. He is a graduate of the Ringling Bros. and Barnum & Bailey Clown College. Buten is one of few performers ever to receive a standing ovation on Merv Griffin's television show.

College income is over 4 million

High Point College received over 4 million dollars in 1976 to spend for the education of its one thousand students. Since the college is a non-profit organization it spent nearly that amount in educating, housing, feeding and providing financial aid for its students.

Half of the over 4 million dollars in income, $2,071,000 came from tuition and general fees of the students. Almost 2,500,000 was spent on operating expenses, the library, maintenance administration and of course teachers' salaries. Salaries range from averages of $300 for instructors to $1300 for assistant professors to $1300 for associate professors. Professors earn $14700 due to their tenure or department position.

President Patton said the college had a moral obligation to raise salaries, to retain good faculty members. Many have received offers from private enterprises for much higher salaries. Although the college is in a buyer's market for teachers, salaries will be raised 25% over the next five years.

Other money comes from "Auxiliary Enterprises' over 900,000 dollars, which included room, board, health fees and the book store. These enterprises made a profit of 7000 dollars which offsets losses of other years. Contrary to rumor the cafeteria belongs to the college.

High Point College is a non-profit seeking food service operation found at most colleges. Income from gifts and grants totalled 770,000 for the 1976 year. Most of this is from federal loans, scholarships and state grants which go directly to the student administered by the college. Endowments, money given to the college for which the college uses the income from, was almost 300,000. The money not going directly to student aid helps raise up the difference in tuition and operating expenses.

Other expense includes mortgage-like debts on Belk and Millis dormitories, the only buildings on campus not continued on page 3.
Student Input on Campus

Why should the student of High Point College take an interest in the basic issues that have cropped up this semester such as declining enrollment, back to basics curriculum, stability of the liberal arts programs, and other related issues. These are the issues that we have tried to headline and work in depth on. They carry with them very practical importance.

For example, declining enrollment often means higher tuition since three-fourths of the college's operating costs come from student payed tuition money. That is not to say that next year's increased increase in tuition is a result of the decline in enrollment this year, but in the long run if it is a definite factor since outside monies such as funds from the United Methodist Church and area businesses are getting harder to come by.

This brings us to the move to back to basics curriculum and major fields of study are major drawing cards on Campus.

Therefore, just as students are turning on to a college education these liberals for the practical purposes of opening up avenues for job employment instead of the pure academic search of knowledge and truth, so do these basic issues carry practical importance to the student.

A student often chooses a college on the basis of its curriculum. The curriculum as it stands now offers great maneuverability for students with its four area divisions. It allows students to bypass a weak area and just because a student has a weak area doesn't mean that he can't college material. So, the question must be asked is this back to basic curriculum and major fields of study as the basis for a well-rounded student?

In only one hundred years minorities have been utilized to the fields of the South and the factories of the North. Freedom is of course, a right and so is equality. Equality just doesn't happen; it is an evolutionary process. Affirmative action is not reverse discrimination but merely a negation of the advantages given the majority that they did not deserve.

The main argument against affirmative is "why should I pay for something that happened a hundred years ago?" The answer is that no one pays and that everyone gains. In the long run society as a whole benefits from the equality that will be obtained from affirmative action.

The case of the student not getting into Medical School because of affirmative action policies presents complex problems. The lowering of standards for minorities [which essentially raises standards for others] is a "damned if you do, damned if you don't" question. The government and the society it protests has decided we will be damned if we don't. "The basic question is that minorities, and the inferior status they have been assigned, have never been given the opportunities to compete equally with the majority. No one is guaranteed success, but everyone, regardless of race should be given an equal chance, a fair education, and opportunity. Then the issue of minorities have not even been given a chance."

Society to gain from Minorities

The ultimate answer is this. You should feel guilty for screaming that the government is giving the minorities an unfair advantage over you, because only 120 years ago that person's great-great-grandfather was in the wrong. So, you must admit minorities or you are subject to the ultimate wrath of the American law.

It's ridiculous. Who else in the world will one fine laws cancelling each other? Distancing. You're damned if you do and damned if you don't! Therefore, just as students are turning on to a college education these liberals for the practical purposes of opening up avenues for job employment instead of the pure academic search of knowledge and truth, so do these basic issues carry practical importance to the student.

For, and or....

Too, believe that education is a comprehensive task of integrating the piecemeal knowledge of the arts and sciences into an overall view of life and the world. When this happens philosophy’s intrinsic excitements are hidden, and the fact that it springs from a human impulse as natural as the impulse to sing or mimic is forgotten. If philosophy appears to be losing ground to science, it is only because it accepts the difficult and precarious task of dealing with problems not yet open to the methods of science—problems such as good and evil, beauty and ugliness, order and freedom, the nature of being, the theory of knowledge; so as soon as a field of inquiry yields knowledge susceptible of exact formulation it is called science. Thus every science begins as philosophy and ends as a specialization. It arises in hypothesis and flows into achievement. Thus philosophy leaves the fruits of victory to its offspring, the sciences, and itself passes on to the uncertain and unexplored.

And what is the impulse that keeps philosophy alive? Philosophy is a unique combination of reason and passion. Philosophers try to be very explicit, to argue everything out, to appeal to logic and evidence thus providing a focus through which we can see our own roles and activities, and determine if they have any significance. We have all acquired much information and many opinions about the natural and human world. But how many of us have ever considered whether these are reliable or important? Are we not usually willing to accept without question reported scientific discoveries, certain traditional beliefs, and various views based upon our personal experiences? Philosophy, however, insists upon subjective all this to intensive critical examination in order to discover if these views and beliefs are based upon adequate evidence, and if a reasonable person may be justified in adhering to them.

Philosophy begins in the impetuous need to know what one thinks when one is in pain, not knowing what one is. It is what happens to a man when his thoughts are confused and his feelings are mixed, when none of the prevailing conventions or accepted authorities will help him, and when he tries to think his way out of this condition instead of falling into madness or apathy. It begins in wonder and grows out of perplexity, out of the consciousness of discordance in the world. It is an effort to defeat this discordance either by finding a deeper order in the world or by achieving greater clarity and surer grounds for conviction of one’s own thinking.

Philosophy, then, is the most general of all forms of human inquiry. Ethics as well as science, logic as well as religion, history as well as art—all are grist to the philosopher’s mill.
Pumpkin."

"There are not any bats in the belfry, only The Great Pumpkin."

Dorm situation reverses trend

Many college campuses across the nation are once again experiencing shortages of dorm rooms for students. To house all the students, colleges have had to triple-up in rooms meant for two and hotel and motel space had to be contracted by some institutions.

Yet, at HPC there has been no shortages of dorm rooms for on-campus students. In fact, the housing facilities at HPC have a total capacity of 814 students, when the actual number of on-campus students being only 700.

With the luxury of having extra rooms available, the Student Personnel Office was able to handle requests for 126 private rooms. Out of these 126 single/private rooms, 51 are in McCulloch. Dean Hanson said that the reason for the extra private rooms in McCulloch is because of the small size of the rooms.

She went on to say that the ideal capacity for McCulloch Dorm considering the small rooms is 124 persons, whereas there are 133 total students living in the dorm this year.

Even so, the high number of private rooms in McCulloch prompted some girls in Yaddkin Dormitory to ask that the male students living in the basement of Yaddkin Dormitory, be moved to McCulloch to allow more private rooms for girls.

Hanson said that they decided to let guys stay in the basement of Yaddkin because for one, they had already moved into their rooms this semester and secondly it was felt that the Yaddkin basement was justified for men even though the girls wanted more private rooms because of the factor of the small rooms in McCulloch Dorm which necessitates a need for private rooms.

As for next year, the Student Personnel Committee will have to make the decision all over again based on the admission enrollment for next year.

The other dorms on campus are almost equally distributed in the number of private rooms except for Belk, which has no private rooms. Likely it will remain the same for next year unless there is a large increase in enrollment.

One possible exception, however, could be the houses such as the Panhellocn College Relations, and Gatehouse. Students in these houses could be moved to dorms next year in order to cut housing and heating expenses. Yet, if the decision is made to close down these houses to students there will be a statement on the contract in dormitory assignments that will say students assigned to rooms in houses will be notified during the summer if the college does decide to close down the houses.

Crackdown on Students Loans

By Robert Gillis

Many students at High Point College are here only because of financial aid. If you are one of those with a student loan Barbara Gilder Quits of Glamour Magazine has some important facts you should know regarding loan payments and bankruptcy.

From 1974 to 1976, 12,300 former students filed bankruptcy claims totaling fifteen million dollars borrowed through various government-funded loan programs. Is bankruptcy a sensible step if you are confronted with heavy college debts that your budget can't accommodate?

If you go through bankruptcy, you should remember that a report of your bankruptcy remains in your credit bureau file for fourteen years. This means that every time you apply for a charge account, bank loan or mortgage, the prospective lender will read about your bankruptcy. Some creditors may take into consideration the special circumstances surrounding your action (and by law you can write your own explanatory statement and have it placed in your credit report), but nevertheless, you may have trouble getting credit for a long time to come.

Bankruptcy is a last resort for those clearly in a position in which they will never be able to repay their debts and carry on with their life: it is not meant for young men and women who find it temporarily inexpedient to meet debt repayments.

All government loan programs encourage former students who are having trouble repaying educational loans to apply to their bank or college lenders for "forbearance"—the term which is used when you ask an institution to change the terms of your loan to make it easier for you to repay. For example, if you are scheduled to repay your loan in ten years with minimum payments of thirty dollars a month, you can ask the bank to reduce your monthly payments to a more manageable level by spreading out payments over a longer period of time. Also note that new 1976 laws specifically provide for deferment of repayments for up to twelve months during any one period when you are unemployed and looking for full-time work.

There are two very popular programs for higher education: the Guaranteed Student Loan Program (GSLP), which lends up to $5000 a year, and the National Direct Student Loan Program (NDSL), which lends up to $5000 a year for undergraduate education and $10,000 for graduate education. A new law, which was enacted last year and went into effect October 1, 1977, prohibits any student with a GSLP loan from having it discharged through bankruptcy until at least five years after the required repayment period begins. Under the NDSL program the school itself makes the loan with some ninety percent of the money coming from the Federal government and ten percent from the school. If the student defaults, the school is out its ten percent. Repayment is required in ten years or less usually beginning within nine months after education is completed. Minimum payments are thirty dollars a month.

Filing for bankruptcy in any time is still a legal alternative for NDSL loan cases. However, a New York State Appeals Court ruled recently that even though a young man had declared bankruptcy, his NDSL loan was exempt—that is, it was not canceled. The ruling so far is applicable only in New York State, but it could have far-reaching effects on potential bankruptcy cases in other states where NDSL loans are involved.
Comm majors seek to be news anchormen

By Robin Henson

"I want Barbara Walters' job—with her pay!"

This rather presumptuous statement was offered by one freshman Communications major when she was asked what she wanted to be doing in twenty years.

A rather high goal to strive for—after all, how many people make over a million dollars a year?—this is nevertheless just the sort of occupation that a Communications major is prepared for.

In this first year of its existence, the Communications curriculum seems to be very popular with its ranks constantly swelling.

Communications is an interdisciplinary major designed by Dr. William B. Leeuw of the English Department and Mr. David Christovich of the Theatre Arts Department.

It combines journalism and writing courses with theatre studies in order to graduate majors with newspapers, magazines, radio, television, and advertising.

Since it is an interdisciplinary major, the Communications enthusiast must put in many hours in search of knowledge outside the classroom. In order to gain a broad spectrum of experience, the major is required to spend time working with the school radio station, theatre productions, and writing for one of the three college publications.

Fifty hours participation is required during the four years of college in order to fulfill the radio requirement. These hours can be spent in programming, production, new writing, interning, or any other radio station activity.

The theatre requirement is one hundred hours to be gained in at least four different productions. Working on any crew—such as sound, stage, lighting, props, makeup, costume, sets, or publicity—will give hours credit, as well scoring.

By busying oneself with the multitude of chores in putting out a newspaper, annual, or magazine—(the school radio station, theatre productions, and writing for one of the three college publications.)

HPC Downs Guilford

Panthers Finish 1st in Conference

by Scott Hance

The High Point Panthers clinched the soccer championship of the Carolinas Conference two Saturdays ago when they ended their season with a 2-1 win over Guilford. After a poor start, the Panthers came back to win their last eight games in a row and take the conference with a 5-0 mark.

Before squaring off against conference foes Pfeiffer and Guilford in the final battles of the regular season, the Panthers faced Pembroke State University and came away with a 5-0 victory. Jeff Potter and Ronny Clendenin put the home team ahead 2-0 at the half which proved to be all they would need. However, Doug Chandler, Walter Roe, and Jorge Nobre each cracked the nets in the second period for a fairly large margin of victory.

Pfeiffer then came to High Point on October 20th and went home loser in a close 1-0 ballgame. After the two teams played to a scoreless tie at halftime, High Point went on top when Jeff Potter broke the scoring ice with eight minutes to go. It proved to be the winning goal and set up the showdown between the Panthers and Guilford on Saturday, the 29th.

With a good crowd of Panther fans on hand at Guilford, Ken Chartier's squad grabbed a 2-1 win and with it came a first place finish in the conference. After the Quakers jumped to a 1-0 lead late in the first half, Doug Chandler tied the game for High Point when he scored after a corner kick. Jeff Potter then booted a penalty kick past the Guilford goalie with just eight and a half minutes expired in the second half. Panther goalie Todd Miller recorded 11 saves as Guilford outshot High Point 15-6.

Spikers Win CC Tourney

By Skip Harris

The Lady Panthers proved the seeding committee correct as they won the Carolina Conference Tournament for the third straight year. Using a new offense, the women downed Guilford, and Elon to reach the finals. Guilford again lost to the Panthers, in straight sets giving the Purple and White an undefeated record for the tournament. Coach Briley singled out Ethel White for her impeccable defense. Other Panthers caught the eye of the conference officials.

Marie Riley, Roberta Riley, and Karen Krissoffson were named to the All Conference Team. Marie also brought home the MVP award for the second straight year.

In regular play, Duke up-set HPC in five games, all of which were close. Marie Riley injured a thumb and Briley cited mental errors for the loss. The Panthers next played Wake and were extended to three games before winning 14-16, 15-12, and 15-9. N.C. State took three straight from the Women two days later. Last Saturday the spikers turned things around dowing Mars Hill 15-2 and 15-7. They then riddled the Guilford team with spikes while cruising to victories of 15-5 and 15-3. The match was in conjunction with the first annual High School Day. The Panthers record is now 30-7, with several big matches coming up including the NCAIAW State Tournament.

Soccer Season-A Miracle Year in CC

by Steve Bising

"Playing rather ragged," "struggling along," "stumbling around like a drunk in a dark alley," these were just a few of the many comments area sports writers and local fans were leveling at the 1977 Panther Soccer team and rightfully so...for a while.

Though summer recruiting wasn't as fruitful as past years, the Panthers still had a potent nucleus of past veterans that would keep them in contention for conference and district honors as of years past. On the 13th of September, High Point College opened with a routine win over UNC-G [2-0], the game was never in doubt and scoring opportunities were plentiful but then the season was just beginning.

The Panthers then proceeded to drop 5 straight contests. In the past, High Point rarely had much difficulty with Duke, N.C. State, and N.C. Wesleyan which were supposed to be even easier, yet the Panthers lost all 3. It seemed that nothing was going right, not only wasn't the ball going in but often the team played lethargically and spiritless. Against the nation's sixteenth ranked team, Appalachian State, High Point probably played the best game of their lives as they continually thwarted the star-studded Apps. In fact, it took an overtime goal before the Panthers bowed [3-2]. Though the ASU game was loss number four in a row, the style of play and enthusiasm generated was definitely encouraging and hopes of renewed conference by the team were raised by many. But it became apparent that the ASU heroes was just a one time fling as Carolina blasted a sloppy and lackluster HPC 6-1 a mere 3 days later.

At this point, High Point's traditionally potent offense had registered a mere 7 goals in 6 games while having 17 for a dismal 1-5 record. Just about the last thing the Panthers die-hard had been silenced and thoughts of another conference title were put aside until next year. For High Point to successfully defend their conference title, they would have to win their remaining 8 games, which included Pfeiffer, #6 in the South and perennial rival Guilford.

Considering the past performances of the Panthers in their last 5 matches, winning the final 8 games would surely take a miracle to achieve. The next game and first conference game against Catawba, seemed to set the stage for what was to be one of the most astounding comebacks in the history of the Conference. In a matter of 17 days, the High Point Soccer team not only took their 3rd title in 4 years, but in the process, outscored their remaining 8 opponents 34 to 1. It wasn't until the final game of the season against Guilford for the Conference Championship that High Point was ever scored upon and then that goal was meaningless as the Panthers won 2-1.

When the smoke had cleared and the regular season had ended, there sat King Charter and his Regal Panthers once again atop the Carolinas.

[Editors note: By virtue of their overall record, [8-5] High Point has again qualified for the district play-off. Time, Date, Place and opening round opponent are not known at this time, but announcements will be made as soon as this information is known... your support has been super, why stop now?]
Hockey Finishes Season 14-2-1

By Colleen Blackney

High Point College field hockey team won 6 out of their last 8 games to establish a new school record of 14-2-1 and end a very fine season.

On their way to this successful season, High Point defeated East Carolina (1-0) on a goal from Sharon Kaler, tied Catawba (1-1) on a goal from Sandy Susnik, and routed Averett (6-0) at home with 2 goals each from Patti Wootten and Alice Wainwright, and 2 goals from Linda Ensey. High Point had a chance to end their opening game winning streak by beating Delaware and Debbie Weber. The goal each from Linda Ensey and Alice Wainwright, and 1 tie at halftime lead. In the second half, both teams were nearly flawless. But with just minutes remaining in the first half the Tar Heels scored 2 quick goals to take a 2-0 halftime lead. In the second half, things still wouldn't "click" for the Panthers and they never recovered their winning ways as the Tar Heels scored once more to win 3-0.

Despite this disappointing loss, HPC field hockey is a power-house in field hockey, during the pre-season girls, with the help of coach Kittie Steele and assistant Leslie Clark -made believers out of alot of teams, as they out-scored their opponent 40-9 coming into the tournament. They proved they could play with the big teams by downing Duke (2-1), UNC-G (2-1), ECU (1-0) and Carolina (1-0) in regular season play.

The Panthers first game of the tournament was against Appalachian State on Nov. 2nd at 10 a.m. The game was a defensive standoff until the last minutes when Sharon Kaler scored on a dribbler. This win advanced High Point to the championship game against Carolina. For the first 20 minutes of play, both teams were nearly flawless. But with just minutes remaining in the first half the Tar Heels scored 2 quick goals to take a 2-0 halftime lead. In the second half, things still wouldn't "click" for the Panthers and they never recovered their winning ways as the Tar Heels scored once more to win 3-0.

Fall Festival of the Humanities

The Fall Festival of the Humanities is an annual event sponsored by the Humanities Division of High Point College and dedicated to the enjoyment and furtherance of the humanities. This year's festival features a musician, a critic, a poet, a philosopher, a choral group, a fiesta, and student plays. The wide range of presentations promises to be both educational and entertaining. All events are open to students at High Point College, prospective students, and the general public.

We hope you will join us at High Point College in this celebration of the humanities.

The Schedule

Wednesday, November 9
Howard Buten, clown, singer, musician, mime, artist
Sponsored by the Student Union
Memorial Auditorium, 8 p.m.

Friday, November 11
Dr. Cratis Williams, retired, Professor of English and head of the Department, Appalachian State University
Phoenix V Literary Festival
Sponsored by the Department of English
Empty Space Theatre, 8 p.m.

Saturday, November 12
Poetry Workshop, Fiction Workshops
Sponsored by the Department of English
Campus Center, 9 a.m. - 3 p.m.

Sunday, November 13
High Point Chorale, Directed by Dr. James Elson
Sponsored by the High Point Arts Council
Chas E. Hayworth Sr. Memorial Chapel, 4 p.m.

Monday, November 14
Dr. Germaine Bree, Kenan Professor of Humanities, Wake Forest University, Lecturer and Panel discussion of Albert Camus' Caligula
Sponsored by the Departments of Religion and Philosophy and Modern Foreign Languages
Conference Room, 'Campus Center, 7:30 p.m.

Wednesday, November 16
Spanish Fiesta
Sponsored by the Department of Modern Foreign Languages

Thursday, Friday, Saturday
November 17, 18, 19
Studio Plays

Unedited Musical, by Nannette Falls
Blood Relations, by Tom Cope
Sponsored by the Department of Fine Arts
Empty Space Theater, 8 p.m.

Williams to Headline Festival

The High Point College Phoenix V Literary Festival will feature a nationally known authority on cultural heritage of Southern Mountaineers, Dr. Cratis Williams. Williams grew up in an isolated valley of Kentucky learning well the songs, hymns, religions attitudes, manners, customs, and speech of his people. When he left Kentucky, he carried this love and knowledge with him in traditional ballads as sung by mountaineers. Williams is known as a popular entertainer and commentator on mountaineers. He has contributed to many publications, and is advising editor to Appalachian Journal. Among his awards and honors include listings in Who's Who In America and 100 American Folk Singers. Until retiring in 1976, Williams served as Professor of English and Dean of the Graduate School at Appalachian State University. Presently, he serves as special assistant to the Chancellor at Appalachian.

The festival will include participation by both college and area high school students. The proposed schedule follows:

Friday, November 11, 8:00 p.m.
Empty Space Theatre
Poetry and Ballads
Cratis Williams Reception
Immediately following

Saturday, November 12 - 8:00 p.m.
Holt McPherson Campus Center
8:30 a.m. Breakfast and Registration.
9:00 a.m. Main Conference Room

Student Union sponsors logo contest

The Student Union will be sponsoring a logo contest in November which is open to the entire High Point College community. A logo is an emblem or symbol which easily identifies a business or organization. This logo will be on the letterhead of Student Union stationery and on all publicity. All entries must be submitted no later than November 25. A panel consisting of the Student Union Chairman, two faculty members, and one staff member will select the best designs of all those submitted. The Student Union as a body will vote on the winning logo. There will be a $25 prize awarded to the person whose logo is selected.

Contest Rules

Logos should be between five inches and eight inches square and limited to two colors.

Guidelines To Be Considered

1. Possibilities for reduction. Designs must maintain appearance when reduced to letterhead size.
2. Graphic quality of the submitted design.
4. Readability. The logo should be catchy and easy to identify at sight.
5. Recognizability. The emblem should be easily recognized as the Student Union logo.
6. Aesthetic value of the design. The logo should be eye-pleasing.

Designs should be turned in to Tom Burke in the Student Activities Office. Immediately following the festival, there will be a $25 prize awarded to the person whose logo is selected.

Student Union Ice-Skating
November 12
2 - 5 P.M.
50 cents
Sign up by November 11 in Student Activities Office
Limit 20 People

Welcome-Augie Marlette
Remarks-Dr. Cratis Williams

Introduction of Workshop Leaders-Cappy Probert
9:30 - 11:00 - Session #1 - Workshops
Poetry Workshop - Dr. Marion Hodge, Conference Room
Poetry Workshop - Emily Wilson, Meeting Room
Fiction Workshop - Dr. Thomas Walters, Meeting Room
Fiction and Folklore - Dr. Cratis Williams, Study Room

YMCA Work

The High Point YMCA is in need of male volunteers age 18 and over to participate in the High Point Brothers program. The purpose of High Point Brothers is to provide adult male relationship to boys age seven and over who do not have a prominent male figure in their life. Big brothers are asked to spend a minimum of two hours per week with their little brother. For an application and more information, please contact the High Point YMCA 882-6854.
College becoming less personal; more vocational stress in future

Gypsies and other fortune tellers have been known to use crystal balls to carry out their professional objective of predicting the future. The college president has a similar role for he too must attempt to predict the future. Unfortunately, there is no crystal ball for the college president.

For nineteen years, President Wendell Patton has tried to predict the future by looking at where the college has been, where it is at, and where it needs to go in order to remain solvent.

In looking back over those nineteen years, Patton said one of the biggest changes that have been in communications between students and administration has been the loss of required formal dances in the student center. Another factor Patton mentioned is the increasing laws regulating colleges, which is making college more impersonal by adding to the complexities of operation such as new computer system requirements.

"We have to find new ways and means to keep students from becoming a number," said Patton. "Otherwise, we (small colleges) lose our advantage."

Patton also agreed that education has gone along with society's permissiveness and lowered its standards. Patton said he believes in equal opportunity, but not every person can handle college education requirements and there is no sense in letting someone in, watch him flunk out, and then keep his money. He went on to say college is defeating its purpose by lowering its standards to a common denominator and this issue has been debated with many of his colleagues.

As far as the future of education standards at HPC, Patton said it is obvious HPC can't become another Davidson College, which is historically a high standard... (continued on page 3)
A New Moral Generation?

Societies morality of the elite has swung the pendulum all the way around. In what could be considered a complete cycle of human expansion, attitudes have changed considerably.

With Greta Garbo in the 20's and Marilyn Monroe in the 50's something within our societies framework was released on page 100 (like Watergate) and swiftly moved to front page coverage. Today's middle aged witnessed it and tried to protect their youth from it, but whoa be unto them. The youth of the day recognized it, accepted it, participated in it, and resigned from it. Which brings us to an uninhibited, realistic age of human awareness.

Todays colleges, working youth, and roving independents are more aware of who they are, where they're going and what they want than any other generation in the history of the world. Their religion is deep, but not hypocritical, they're sexual prowess is one of art to say no to be released for a new awareness. That day is quickly upon us.

Unfortunately, maintaining the status quo is changing times means losing ground. With the new number of students going down, the percentage of quality students will go down, meaning HPC's status quo policy will draw fewer quality students. Therefore to keep a status quo, HPC must improve its programs. In the changing times of technology, the incorporation of such majors as Economics, Physics, and Geology would not require large capital outlays. These programs like the Communications degree, present minimal grade fees, that would attract good students who want a small school and especially a qualitative marketable education.

High Point must remain competitive not only with the Piedmonts but also with the Guilford and Elizas. HPC must offer something to some good students. In order to even maintain a status quo HPC must improve the quality of its programs. It must attract a larger share of the quality students to remain a competitive college. It must be as competitive college to ever remain a college.

In the College moving in the right direction to keep pace with dwindling enrollments and rising prices?

High school enrollments are dwindling meaning less students attending colleges.

Is HPC Competitive?

For and or... Are we going in the right direction?

In order to be competitive, we must compete with our peers. This requires large capital outlays.

HPC.; good for more directly proportionate to the increase in comfort, advancements, and aid on the students.

As for our pride and standards, our reputations that of a good school. As one recent alumnus remarked "A tough little school, and good one.'

Are we going in the right direction? On the right track? I honestly believe no, the future of the 'tough little school' is dependent on the students today and their beliefs. Belief can keep a lot of things alive--even the weak belief can make the strong last forever.

Getting the tuition lowered

"We have to come up with a good case, a set of requirements to be met before the money could be released. It ain't enough just to say we don't want to pay more and taxpayers are rising for everything from pencils to buildings. Society has placed the emphasis on need of technologic specialization.

High Point with its liberal arts based education is certainly in a predicament. I must compete with many other schools almost exactly like itself. It must also compete with larger more specialized universities. High Point has taken a middle of the road stance. Quality without sacrificing smallness. High Point's liberal education plans to maintain the status quo.
New Assistance To Day Students

Scholarships have been established for graduating high school seniors and community college graduates who commute to High Point College. The scholarships, in the amount of $300, will be available for the 1978-79 school year. Recipients of the new scholarship may also apply for additional aid from the College.

Awards of the scholarships will be based on academic standing participation in extra-curricular activities and leadership potential.

This program is our turn to do something for people in the community," admissions director A.E. Von Cannon said. "We feel that High Point College has been a vital part of this broad community of Guilford county and the surrounding counties. This is our effort to be of maximum assistance to our friends in the area," he said.

Applicants for the scholarships will be invited to the campus for a weekend of interviews and an in-depth look at the total College program.

All commuting students are invited to join the Day Students Organization, a group which assists day students in a variety of ways.

All full-time North Carolina students also qualify for a grant of $300. The new program is in addition to all other existing aid.

Winter Heat

The students complained about this and most of the plugs were taken out. High Point College can use all the gimmicks and gadgets that it can find, but the rising costs cannot be cut without the cooperation of the students. Mr. Dalbey emphasized that each of us must conscientiously strive to do his share, turn off the lights in rooms that aren’t occupied. Turn off electrical appliances that aren’t being used. Remember, only we, the students, through our cooperation, can help High Point College cut its electric and heating bills.
Staring!

Staring is a common practice on most college campuses and HPC is no exception. Yet a recent incident at the U. of Colorado-Boulder indicated that staring is a dangerous habit. It could get you barred from campus or even tossed in jail.

Several women in CU's Law School recently complained that a man was making them uncomfortable by paying them a little too much attention. They told the dean and the starrer—a former student—was asked to leave.

However, six weeks later he was back again, still staring at women, this time in the Student Union. The campus police barred him from campus for one year due to complaints, but he returned and was given a citation for failing to obey the ban. The next day— you guessed it—he was back again with his active eyes and was again cited by the police.

The former student has retained an attorney, who claims that the state statute used to bar his client from campus violates his First Amendment rights. "Staring is constitutional," said the lawyer.

World Talking More, Congress Saying Less

One of the most interesting developments in modern history came about last week as President Anwar Sadat of Egypt up and decided to travel to Israel. For two countries that do not even recognize the existence of each other, the trip and ensuing talks represent an attempt at a Middle East solution.

Israel's Prime Minister Menahem Begin chauffeured the Egyptian President to the Muslim Mosque and the Israeli legislature where he prayed and spoke of a settlement without war.

Other Arab nations are extremely upset at Sadat for even talking with Israeli leaders.

SALT talks continuing

In other efforts at good relations, the USSR purchased American grain to supplement their own crops. The Russians purchased wheat from grain agents at higher prices than farmers received for the crop, making farmers scream of another "Russian Wheat Deal".

Soviet President Brezhnev stated that relations between the USSR and US are turning for the better. The leaders of both sides sensed the urgency of completing new agreements on arms limitations (SALT).

The Canal in Congress

With relations around the world improving, the US Congress determined to make the front page by being different. President Carter's comprehensive overall plans to deal with the energy problem, unemployment and taxes have been untracked by the Congress.

The full employment bill (Humphrey-Hawkins) was passed after numerous compromises leaving many doubts about its effectiveness.

T.V. Baby Boom is Coming

In other miscellaneous news, the birth rate in America is rising again and prominent economists see a baby boom in the next decade. Possibly one reason is future parents going to bed early because of disgust with TV violence. Nationwide PTA's are organizing to boycott industries who advertise during high crime and violent shows. PTA leaders say their letters to the companies are and will have an effect on the crime of TV.

In summation, it seems Americans are spending time creating barriers between themselves, while abroad opposites are seeming to attract.
Students Teachers in Field

by Nancy Reichle

Education majors who have recently completed their block courses in their respective areas of education are presently student teaching in 17 elementary and secondary schools in the area. The 39 students began teaching on Oct. 26 and will continue until Dec. 16.

Teaching in secondary are the following: Tony Alonso in Spanish; Randy Bledsoe, Susan Galup, Mark Middleton, and Joe Ramsdham in Physical Education; Cynthia Burns, Sandra Hunsick, and Elizabeth Fowesome in Art; Jill Dorsett, Angelyn Marlette, Betty Pennington, Pat Niven, Gerald Plota, and Caryl Nick in English; Van Flowers and Charles Hatley in history; and Sylvia Petreski of Rick Hines in Theatre Arts.

Student teachers in the elementary schools are: Suehano and Susan Cooper at Airview Street Elementary School; Susan Perkins, same Kidd, and Kim Free

man at Tomlinson Elementary School; Patti Rusekko, Lynnea Riddick, Kathy Creed, Sharon Stanback, Cathy Shaw and Lynn Mas-

sie at Montiello Elementary School; Pam Callahan, Debbie Burrows, and Stephanie Hill at Fair Grove Elementary School; Joel Swope at Millia Road Elementary School; Beth Holt and Katherine Purce at Shady Brook Elementary School; Lynn Krause and Lisa Boyles at Jamestown Elementary School, and Susan Woods and Beth Cartwright at Florence Elementary School.

To qualify for teacher certification by the state, the student teacher must demonstrate competence in all phases of teaching. The clearest determination is by consensus of the college supervisor, the public school principal, and the cooperating teacher.

Following completion of student teaching, the majors will start the process of applying for certification and a teaching position. Each will prepare a resume and a letter of application as well as a portfolio of teaching materials for job interviews if necessary.

Concerning job opportunities for these education majors, Dr. Thacker head of the Education Department, states, "There are still jobs available." He explains that of the 69 graduates in education last spring, 39 are teaching in North Carolina; 29 accepted other employment; 4 attend graduate school, 1 is seeking employment, and there is no information available about one. Dr. Thacker assures that a large number of those not teaching didn't actually look for teaching jobs. "Opportunities are still quite good for our graduates to find a teaching position," he stated. "Many, however, find more attractive employment."

Finally, Dr. Thacker reports that "we are still getting requests we can't fill." He cites the areas of Science, Mathematics and Special Education as having many openings.

Dr. Bree discusses Camus

By Art Helieusch

Monday, November 14, a personal friend of Albert Camus, the French writer, discussed his life.

Dr. Germaine Bree, professor of Humanities at Wake Forest University, was on campus to participate in a Festival of the Humanities. She is internationally recognized as a humanist, educator and writer.

Her main purpose of being at the college was to speak about Albert Camus' play "Caligula." Dr. Bree discussed the play, appearing to present a critical review of it.

Before the lecture began Dr. Bree discussed herself, the novelist and philosopher Albert Camus, and her relationship with him.

She began by discussing her participation in World War II which earned her the Bronze Star medal for her efforts in the United States Army as a member of a rescue squad.

Next Dr. Bree was asked to give her personal definition of Existentialism, she said, "It is an attitude out of which different philosophies develop, facing existence from experience."

She was then asked what influenced Camus towards existentialism? and she quickly said "Camus said he was not an Existentialist." She said Camus starts to rethink man's situation out of his own experiences rejecting Christianity.

When Dr. Bree was asked how much did Camus influence her, she said that their relationship was a "friendly exchange of thoughts." She then gave an example, and she recalled discussing happiness with Camus, stating that Camus believed it was terrible for a man to die unhappy or live a life of unhappiness.

Then Dr. Bree was asked if Camus died happy? She replied, "Yes."

Dr. Bree described how Camus' family affected his philosophy. His father was killed in World War I and his dead mother worked as a cleaning lady. His mother never knew happiness according to Dr. Bree. She said Camus once wrote in his notebook, that "she never caressed her son."

At 17, Camus contracted tuberculosis and was told he would die soon. Dr. Bree said, this is where Camus' thought of a condemned man developed as portrayed in The Stranger.

Camus lived his entire life under the shadow of impending death," said Dr. Bree.

Students Named To Who's Who of America

Nine High Point College students have been named to Who's Who Among Students in American Universities and Colleges. They are Judy Lynn Ashe, Randy James Callahan, Christie Lynn Carroll, Sandra Sue Grim, Caryn Marie Reinhardt, Sybil Kay Richardson, Donna Mary Welsh, Lawrence Dale Williams, and Andrew Michael Wubenhorst.

In selecting nominees for Who's Who, each faculty member submitted names of juniors and seniors who met the qualifications, which include scholarship ability, participation and leadership in academic and extracurricular activities, citizenship and service to High Point College, and potential for future achievement.

The Student Personnel Committee, composed of five faculty members, three administrators, and four students, make additional nominations. Each nominee was asked to submit information on extracurricular activities and grade point average. The Student Personnel Committee then selected the names of the candidates to be sent to the national headquarters of Who's Who for final certification.

Present seniors who were named to Who's Who last year are James Van Horn and Milton Auman.

Theater Arts in the news at the Point

by Lisa D. Mickey

The Tower Players' Studio Theatre presentations were performed November 17-19, in the Empty Space Theatre. Relatively good size audiences gathered to watch the work of High Point College's own playwrights, Nanette Falls and Tom Cope. These students' original scripts were quite impressive and were very entertaining.

The first show was "The Flight to the Top", written, choreographed and directed by Nanette Falls. The show was a lively, colorful, musical based on a young girl's desire to to New York, against her parents' will, and become a prima ballerina under the instruction of the great Denillian. She goes and meets a young journalist with whom she must divide her love between dance or romance. In the latter part of the show, her dancing career was peaking and she received the opportunity to dance abroad for two years. This, of course, was much to her new love's dismay. The play ended with the girl questioning her priorities.

"The Flight to the Top" was a good display of writing talent by Ms. Falls, who hopes to teach dance in Elkin, North Carolina after she graduates this year. She stated, "I always wanted to direct a musical an choreograph it myself." She added that she'd like to someday conquer a mainstage production-a full length show.

Not to be overlooked was the quickness of costume and set changes in this presentation. The cast and crew did an excellent job of producing a smooth show by their deftness and unified efforts.

The second and final presentation was "Blood Relations": written and directed by senior Tom Cope. It involved a terminally ill, whiskey-drinking patient who was once a Pulitzer Prize winner. The patient, Michael Baxter, played by Rich Moore, had to deal with his illness, his downhill spill from the top of the journalism world, and with his incredibly "impulsive, neurotic" wife.

The play was both funny and extremely deep at times. Its subject matter was meant for adult audiences in that sexual freedom was a major element of the play. The patient, Michael, held a rather sexually liberated relationship with his male nurse, Josy. Laughingly, they deemed themselves "talk of the terminal ward!" This, along with the sexual freedom of Mona, Michael's wife, made the drama a ping pong game of emotions and occurrences.

Tom Cope did an excellent job in writing and directing "Blood Relations". Although there were some confusing incidents in the play and a bit too much profanity, the work was unusually good for a novice writer. The five actors and actresses played their parts superbly and were largely responsible for making the presentation the success that it was.

He continued, "The thing that disturbs me is the audience is rarely ever moved anything. I want to achieve any sort of reaction. I want the audience to feel like after they saw the play that the two hours they spent watching the play was worth it."

The general consensus of those that saw both productions was that of amazement, in that students wrote and directed the plays. Both of the dramas demonstrated great talent and much hard work. The writers, cast and crews are to be commended for making the Tower Players' Studio Season a success.

Ghost? What ghost?

Sure it's a little late for Halloween, but ghosts are around at other times of the year too. They just have their fling on Halloween.

Take Herschel, for instance, he's around all year long and is seldom silent. Herschel is the ghost that belongs to the Tower Players. Or maybe it would be closer to say the Tower Players belong to Herschel.

He is known as the "silent assistant director" to any HPC production. He is the hardest critic and most jealous cast member of any show.

Herschel's approval is always sought after because strange things always happen to shows he disapproves of.

When Herschel disapproves, glass has been known to fall out of stage lights, cast members have become ill, and the general luck of certain shows has been bad.

More recently, during the production of "Caligula", three long handled paint brushes which had been sitting on top of the tool cabinet for days suddenly decided to fall on assistant director Myra Williams. This evidently was only a warning. Whatever Herschel didn't like must have been corrected as he was not heard from again during "Caligula".

Whether you believe in ghosts or not, the next time you walk through the auditorium try to convince yourself Herschel isn't watching you from his perch in the projection booth.

Herschel: Is that you?

Theatre Reviews
Henry Steele has received a scholarship after having proven he can make the team. As Rocky went the years answer to Rocky, the film of clearly shows that Rocky trained so hard and worked just as hard, if not harder, than the big man over the little man. Henry Steele, freshman, and smallest team member is determined that nobody, especially an over-bearing coach is going to put him under. By accepting the pressure he knows he has to face, Henry is coming closer to meeting his goal. The scene where Henry goes to the gymnasium, the lights turned on, and the music begins, prepares the viewer for the intense determination that Henry is going to make the team at any price. Just as Rocky trained so hard and finally met his goal, Henry works just as hard, if not harder.

The most dramatic moment in the film comes after a game where Henry has been pushed about by the other players, as a result, he suffers from a bloody nose and skinned legs. After the game is over, the coach tells Henry that he wants him to give up the scholarship because he is not better than he is. Henry stands up for his rights, and tells the coach he could tear him apart, but that he is not going to give up. This scene seems to set the pace for the scene as a whole.

The pressures of academics are a big worry in Henry's life. His tutor is an upperclass girl who treats him like a nobody. Yet, when her beau says one thing too many, she breaks up and starts dating Henry. Once again, age plays a big difference in Henry's choice. The girl, why not overly attractive, represents a stepping stone in Henry's life.

Determined to make the team, Henry continues. Just as Rocky had his chance to fight, Henry gets the chance to prove himself and does. The overpowering feeling of achievement is reached as Henry is called in within the last few minutes of the game and wins for his team. The next day, the coach tells Henry he was wrong, and offers him back the scholarship. Yet, Steele surprises the coach when he tells him what he can do. Like so many heroes in the movie, Henry refuses his reward, Steele decides to give up his scholarship after having proven he could make the team.

Rocky has always been a character determined to make it himself, but that he is not going to give up. This scene seems to set the pace for the scene as a whole. The pressures of academics are a big worry in Henry's life. His tutor is an upperclass girl who treats him like a nobody. Yet, when her beau says one thing too many, she breaks up and starts dating Henry. Once again, age plays a big difference in Henry's choice. The girl, why not overly attractive, represents a stepping stone in Henry's life.

Determined to make the team, Henry continues. Just as Rocky had his chance to fight, Henry gets the chance to prove himself and does. The overpowering feeling of achievement is reached as Henry is called in within the last few minutes of the game and wins for his team. The next day, the coach tells Henry he was wrong, and offers him back the scholarship. Yet, Steele surprises the coach when he tells him what he can do. Like so many heroes in the movie, Henry refuses his reward, Steele decides to give up his scholarship after having proven he could make the team.

The film is as effective and representative of the entire film as the pressure of Henry's life. For we leave its audience with an air of self-confidence. For we leave its audience with an air of self-confidence.
Living together not all moonlight and roses

From
Elon College's Pendulum

In 1968, a Barnard College sophomore publicly stated that she was living with a man she wasn't married to. She proudly wished she hadn't said that. She was nearly expelled.

Today an announcement of "living together" would scarcely raise a ripple on any campus. Unmarried student couples make up a large percentage of the nation's nearly one million cohabiting couples, and few colleges still retain rules forbidding "living in sin."

But whereas your college may not care if you're married, to some it will make a lot of difference. You may not be able to rent or buy a house as easily as married couples. Your joint auto, homeowners' or renters' insurance may be higher. In case of a split-up, state property rights laws don't cover the unmarried couple.

On top of that, you might be a criminal. Although rarely enforced, laws forbidding cohabitation (sharing a residence and having sexual relations with a person of the opposite sex) exist in 20 states and could carry a fine as high as $500 and a year in jail, as well.

In some states, all sexual activity, gay or straight, between consenting adults is legal. In other states where cohabitation has been repealed, sodomy and adultery laws can still affect unmarried couples. There have been convictions under all these statutes in the last five years.

Most likely, though, no one will arrest you for not having a marriage certificate. But you can anticipate extra hassles and planning in such areas as renting a house or apartment. Not so long ago, two names on the marriage license automatically evicted. New evictions are more the exception than the rule, although there are few states specifically forbidding discrimination, and sign a separate voted down as soon as they are introduced (remember Dade County) so there may be no official channels to pursue in event of discrimination, short of court action.

Buying a house. Banks often refuse to allow unmarried to combine their incomes when making a credit application for the purchase of a house, judging their relationship to be less stable. You might have to sign the loan in one person's name. But it is a recent California decision involving actor Lee Marvin and his roommate of many years. Upon the couple's separation, the court held not only that written contracts between unmarried couples are legal, but also that oral agreements and even agreements "implied" from the conduct of the parties are enforceable, if they can be proven. Contracts should also be written to delineate the process of paying rent, utilities, property payments, or any common liability.

Getting and keeping a job. Discrimination may occur here if you are in a job that may be terminated at the boss's discretion, or if the company policy has an "immorality" clause in the causes for termination. "Immorality" has no reliable definition and courts are now compelling employers to prove that it adversely affects performance on the job. But it can still keep an applicant from being hired in the first place, being promoted, or keeping a job.

The mood is romantic for "Shifting gears" from a lazy summer to a "back-to-school" fall can be a bittersweet change if you don't want to grow up. Parents, tucked into tiered grounds prevail. Flounced, again—they're "Shifting Gears" In Styles. Your joint auto, skirts. Colors are pale blue, waist. Pastel colors, paisleys do for you during the winter authentic blanket plaids. Shawls are fringed and in big sweaters and dresses. Everything—blazers, jackets, should be a big shawl—a few "Heaven Sent" fashions. Have you had time to get your wardrobe together? Here are a few "Heaven Sent" fashion forecasts from Helena Rubinstein for Fashion Spotter:

»Big Tops

Costs are longer, hooded, unconstructed. Ponchos are in" as well as wrap-around styles in coats and jackets. Some jackets are big and boxy. If your hair is short, there should be a big shawl—shawls are being worn over everything—blazers, jackets, big sweaters and dresses. Shawls are fringed and in authentic blanket plaids. Think of what a shawl will do for you during the winter in those drafty over-sized lecture halls!

»Separates

The mood is romantic for day or night. Blouses and skirts make up a very practical and very pretty wardrobe. Even if you haven't had time to get your wardrobe together. Here are a few "Heaven Sent" fashion forecasts from Helena Rubinstein for Fashion Spotter:

**Players of the Week**

**Patti Wooten**

By Colleen Blackney

Senior Jeff Potter just completed his fourth full season as a Panther soccer standout and finished strong offensively after starting the season as a defensive back. In his last nine contests, Potter notched seven goals to go with seven assists and was instrumental in the Panther turn around.

"It was a team effort," he stressed. "We got off to a sloppy start but then we put things together and everyone played to win."

Potter, after being placed at sweeper to start the season, was moved to striker where he and Walter Roe started putting things together. "Walter and I played together this year on a lot to the depth of the Panthers. Also a part of a very strong bench will be senior Germaine McAuley, juniors Denise Washington and Jody Westmoreland, and sophomores Sylvia Chambers and Roxanne Crouse.

Because of a lack of height compared to other teams, the Panthers will rely on speed and quickness as a basic part of their game. "I just hope we are able to put the pieces in place early in the season," said Briley. Compiling a record of 53-3 over the past two seasons, the High Point women have not lost a regular season contest and have put together winning streaks of 23 and 28 straight games. The first three games of the season will be against Pfeiffer (Dec. 1st), Wake Forest (the 3rd), and Elon (the 10th). All three games are at home.

**Tough Schedule Ahead**

**Panther Women to Defend National Ranking**

By Scott Hance

First-year head coach Wanda Briley and the women's basketball squad will try to defend their seventh place national ranking in their upcoming season and will probably face their toughest schedule in the school's history. Two tournaments plus the NCAAIAW and the conference tournaments at the end of the season will definitely test the Panther's abilities.

"We'll really have our work cut out for us this year," commented Briley. "After three home games early in December, we go to the Carolinas Classic to defend our championship and then go to Raleigh to play N.C. State."

The Panthers will face several ACC schools in the classic. After the N.C. State game, High Point then travels to Norfolk, Va. for the prestigious Optimist Classic. Here they will square off against nationally ranked Division I teams Old Dominion (14th), Montclair State (8th), and Wayland Baptist (7th). Junior All-American Ethel White leads a returning cast that includes 11 letter winners from last year's team that finished with a 29-2 record. Along with White, a guard, center Gracie Simmons and forward Robyn Cooper also return for the Panthers.

The point guard position is expected to be filled by either Connie Dickins or Vickie McLean. The fifth starter will most likely be sophomore Marie Riley. Riley served as the sixth player last year and her all-around capabilities are certain to help the High Point women.

Freshman Roberta Riley, sister of Marie, will see much action and will add a Carrico and Jay Gammon before losing in the finals.

round by a 3-0 score. He then took 3-1 wins over Gary

**Gross Wins Pool Tourney**

By Scott Hance

Two freshmen from Maryland took the top spots in the recent Billiard Tournament sponsored by the Student Union. Charlie Gross of Chesapeake Beach, Md. defeated Mike Lertora of Potomac in the finals by a 4-0 tally to take first place honors while Lertora settled for a second place finish. Third and fourth place will be determined in another round of play.

With a total of 18 entrants, Gross and Lertora each had to win three contests to get to the finals. The first three rounds were set up on a best of five system while the finals was best 4 of 7.

Gross defeated Steve Bising 3-2 in the first round and then downed Mike Morris 3-0 in the quarterfinals. He then won 3-1 over Dave McDonald to get to the finals. Lertora was victorious over Tom Gray in the first round by a 3-0 score. He then took 3-1 wins over Gary

"It's hard to choose one player when you have such a good all-around team, but Patti Wooten was a tri-captain and our high scorer this year. She is an extremely fine example of a good, all-around, enthusiastic hockey player."

This is what Field Hockey Coach, Kitty Steele, said when asked who she felt was the most outstanding hockey player this season. And just about anyone would have to agree as Wooten, a junior, scored 14 out of the 40 goals High Point accumulated this season.

Wooten, a Physical Education major from Laurel, Delaware, has played center-forward for the Pantherettes for the last three years. Before coming to High Point, Wooten played hockey, basketball, and softball at Laurel High School, where she was voted "Best Girl Athlete" in her senior year.

Even though field hockey gets little recognition or support at High Point, Wooten plays because she enjoys athletics and she finds the competition against big colleges and universities a challenge.
Ladies Grab State Volleyball Title

By Skip Harris

On the strength of their seasonal and tournament play, the Lady Panthers took to the volleyball courts in the NCAAIAW State Tournament at Duke on the weekend of the twelfth. With a season record of 30-8 and the Carolinas Conference title, the Panthers sought to defend their title as State Champs and justify their number one seeding. They did just that and captured their second straight NCAAIAW tourney.

The Briley women had a first round bye and then unleashed the potent Panther attack on N.C. Central who fell by the scores of 15-3, 15-5, and 15-6. Wake Forest was next and 15-3, 15-5, and 15-7. Western Carolina, who lost to the purple spikers earlier in the year, did so again 15-3, 15-5, and 15-6. Wake Forest was next to challenge the Briley-led squad for the right to play in the finals. High Point held a 2-0 seasonal record over the Lady Deacons and, in the toughest match of the tournament, were extended to four games before winning 15-8, 16-18, 15-2, and 16-11. Wake managed to battle into the finals and again pushed the Panthers before succumbing to the HPC team 15-2, 16-18, 15-8, and 15-11. That was the third tournament win over the Deacons this year.

The show of skill and power impressed the tournament officials as much as it depressed the opponents. After the dust settled over the fallen opposition, the officials were polled and named High Point players to each of the six positions on the All-Tournament team. This was unprecedented in the history of the tournament, as was what followed. Due to a combination of pressure and guilt, a new mentality was echoed by the tournament officials as much as the selectors.

The Panthers then played the Regionals, which were contested this past weekend.

Wanda Briley was especially impressed with freshman Ana Gonzalez whom she singled out as the best player in the State Tournament. This sentiment was echoed by the other girls on the squad. Gonzalez is the setter for the team and is a leader on the court. It should be noted that she was one of the High Point players removed from the All Tournament squad, an honor she well deserved.

Men Remain Tip-Off Champs

By Kathy Covert

The High Point College men's basketball team opened its season two weekends ago by taking the F.I.T. Tip-Off Tournament for the second consecutive year.

In the opening round game against Flagler, center John O'Brien led the Panthers to a 73-60 victory with 20 points and nine rebounds. Dennis West also contributed 20 points to the opening victory. West's jump shot from the corner early in the first half put High Point out in front to stay. After that, the Panthers had no problem in maintaining a substantial lead.

The Panthers then played for the championship against hot F.I.T. and came out on top by an 87-67 margin. O'Brien once again led the Panther's way by chipping in 23 points and coming away with 11 rebounds. Danny Anderson also hit double figures with 22 as did Bob Hovey who hit fourteen points. Also contributing to the victory were reserve guard Johnny McQueen with nine points and the Yow brothers, Joey with ten and Jay with four points.

Coach Jerry Steele was very much impressed with the team's efforts, especially with the strong support provided by the bench.

Two Panthers, O'Brien and Anderson were named to the All-Tournament Team, while O'Brien was selected as the Most Valuable Player of the tournament for his outstanding contributions to High Point's winning efforts.

The Panthers first home game of the season will be on December 3rd against Elon College.

B-ball Team Wins

The Panthers first home game of the season will be on December 3rd against Elon College.
Intramural program improves

by Jan Dunkelberger
The High Point college Intramural Program has come a long way since its beginning several years ago. There are not only more sports offered, but also the number of students involved has increased tremendously. The sports are competitive, but are also a lot of fun because the students make it that way.

Thus far this semester one sport has been completed, Men's winter softball. Out of the 12 teams in competition, the Annihilators took the championship by defeating the Lambda Chi-B team, while the Lambda Chi-A team took third place by defeating Alpha Phi Omega in the consolation game.

On November 7th, the men's intramural track and field meet was held. Out of the 81 points awarded, the Gas House Gang took first place with 43 points. The Lambda Chialfa-C captured second with 21 points. The Pika's tallied 13 points for third and the Delta Sigs trailed the leaders with 4 points for fourth place.

Men's intramural tennis, which began in October has not yet been completed due to court conflicts with the men's varsity tennis team practices and poor weather conditions during the past two months. The results thus far in the singles quarterfinals round have D. Pinol (Independent) pitted against Andy Wubbenhurst (Independent) with the winner playing Wayne Schneider in the semifinals. The winner of that round will then play Brad Beauty (Lambda Chi) in the finals.

The doubles competition, Steve Moss and Dave Horton (representing Lambda Chi) will meet Mitch Sears and Wayne Schneider, of the Gas House Gang in the finals. The consolation game for third and fourth place will be between Steve Biebing and Doug Sink (American Humanics), against Arning and Shelton of Pi Kappa Alpha.

In the past, probably the most popular sport in the entire intramural program is men's basketball and this year's competition is no different. Over 10 teams are entered in the A league bracket alone, with a record number of players involved. With the first half of the season already completed, the Oreo, a perennial powerhouse and the defending "A" league champions for the past 4 years, have once again established themselves as the team to beat, as they lead the competition with a 5-0 record.

The 81 points awarded, the Gas House Gang took first place with 43 points. The Lambda Chialfa-C captured second with 21 points. The Pika's tallied 13 points for third and the Delta Sigs trailed the leaders with 4 points for fourth place.

Security Tips

The Campus Police Department offers the following as helpful hints to students in the interest of personal safety on the campus:
1. When leaving your room, don't broadcast your leaving or returning hours.
2. Don't lend your door key to friends for any reason.
3. Don't leave personal belongings or keys in plain sight.
4. If taking a short nap, see that your door is locked.
5. Report any strangers on or about the campus to House Mother, Counselors, Campus Police, etc.
6. If in doubt alone, take a few seconds to look around the surroundings before leaving your car.
7. Walk on well-lighted paths. Avoid dark or isolated spots.
8. If walking, go with a friend. Buddy up.
9. At night have your dorm key ready before you get to your door.
10. If you're followed or attacked, SCREAM. It's your No. 1 defense.

Finally, always be security conscious. Remember that crime is an ever-present danger on the campus as well as anywhere else. Learn how to protect yourself, your belongings, and college property.

Cash for Writing

New York City, September 28, 1977... A $500 cash prize is to be awarded by the American Health Foundation's quarterly journal, PREVENTIVE MEDICINE, to the student author of the best original paper on the subject of preventive medicine. A runner-up prize of $200 is also being awarded. Winning papers will be published in the Journal.

The deadline for receipt of papers is January 31, 1977, and the contest is open to any student (except postdoctoral students) currently enrolled in undergraduate or graduate courses in medicine, dentistry, public health, epidemiology, pharmacy, life sciences, nutrition, the social and behavioral sciences, economics, law or business. Entry forms and information should be sent to: Administrator, PREVENTIVE MEDICINE, American Health Foundation, 1370 Avenue of the Americas, New York, New York 10019.

Cruise on Campus

The head of the Army ROTC program at Wake Forest University will meet with students at 11 a.m. November 30 in Room 1 of the Campus Center.

Lt. Col. William A. Scott will explain the ROTC two-year program and discuss the availability of the program to students. Those interested are urged to meet with Colonel Scott.

Brochures concerning the Army ROTC two-year program are on the information table outside the Registrar's Office, Roberts Hall.

Panthers Ousted By Pfeiffer

By Scott Hance

The Pfeiffer Falcons visited High Point two Thursdays ago for the first round of the District 26 soccer playoffs and eliminated the Panthers by a 5-2 score. The third seeded Falcons jumped out to a 2-0 lead and never trailed as High Point narrowed the gap but could not overcome this deficit as the Pfeiffer defense held off numerous Panther scoring threats in the first half.

Doug Challenger cracked the nets first for High Point to close the margin to 2-1 in a windy first half of play. Pfeiffer then scored again to pull ahead by two and force the Panthers to continue to play catch up ball. Jeff Potter tallied on a booming 25 foot kick for High Point to again bring the Panthers close but the Falcons penetrated the Panther defense once again for a 4-2 halftime lead.

A breakaway resulted in another Pfeiffer tally early in the second period and the two defenses controlled the remainder of the contest. Pfeiffer will advance to the finals of District 26 while the Panthers look ahead to next year and hopefully another conference championship.

Student Union Co-sponsors Cruise

The Student Union and C.C.I. Travel Agency are co-sponsoring a 4-night cruise from Miami to Nassau and the out-islands aboard the Norwegian Caribbean Liner's newest, most superior ship, M/S Seaward II during Spring break. The price, based on four per room, is $350. This price includes the cruise, tips, port tax, meals and charter bus transportation. The only other expenses will be whatever souvenirs and drinks that are purchased. The bus will depart from High Point College and will deliver you to the cruise ship and back to your original location.

It is necessary that every person carry proof of citizenship. Any one of the following documents is acceptable: voter's registration card, birth certificate or passport. A $50 deposit is due by December 1 and the remaining $300 is due by February 8. If someone is seriously interested in this trip, please leave your name, address and phone number with Tom Burke in the Student Activities Office.

**What has your SGA done this year?**

A random sampling of the activities of the Student Government Associations led to some startling facts. Some students were questioned, "What has your SGA done this year?"

One good sign is that all but one student knew what SGA is. That student answered the question with "You." That was the end of the conversation.

Ten students were involved with the building of a new library and the proposed basic requirements for graduation.

One student had the idea that the SGA was involved with the parking problem on campus. Another said they were planning to build a needed staircase at the back of the Student Union building.

Finally one student summed up the question of "What has your SGA done this year?" with this answer. "I haven't seen anything from the Hi-Po this year."

---

**Ten Year Report on HPC**

DIS -- Dr. Wendell M. Patton, president of High Point College, recently released a report which compares the school at present to ten years ago, 1976.

During this time the college's endowment, plant book value, and income from student fee have doubled. Gifts and grants have more than doubled and income from the endowment has quadrupled.

Dr. Patton said that 1967 was chosen as the comparison year because it was the first year the college budget exceeded two million dollars.

The book value of the campus and buildings has increased from $4.7 million to $8.3 million. Facilities constructed or improved include Haworth Hall, 1967; Belk Dormitory, 1968; the renovation of Cooke and Roberts Hall, 1969; a maintenance building, 1976; and Campus Center and Haworth Memorial Chapel, 1972.

Two tennis courts have been added, a new science wing built; several parking lots paved; various equipment has been purchased.

The major purchases of the last ten years have been the Eastgate Shopping Center and the property occupied by Sears, Roebuck and Co. in downtown High Point.

The cost of providing classroom contacts between students and professors; the college's primary activity, has doubled, from just over one million to over two million. The largest amount of the educational and general expense is salaries for faculty members.

The most significant increase, according to the report, is the amount of funds in the endowment. This increase is the support given by friends, alumni, corporations, foundations, and other benefactors. The endowment funds are invested and the College receives the income while keeping the endowment intact.

By 1977 the endowment fund had grown from just over two million dollars to over five million dollars. Much of the increase is due to the success of the Golden Decade fund, a long-term capital expansion campaign completed in 1974.

Income from student fees has doubled over the past ten years and traditionally professors on campus. Some tried to attribute the rising of tuition rates to the SGA. Some said that they are involved with the building of a new library and the proposed basic requirements for graduation.

One student had the idea that the SGA was involved with the parking problem on campus. Another said they were planning to build a needed staircase at the back of the Student Union building.

Finally one student summed up the question of "What has your SGA done this year?" with this answer. "I haven't seen anything from the SGA on the front page of the Hi-Po this year."
No initiative in SGA

The eighth and last issue of the Hi-Po for the fall semester should be a chance to reflect upon events which have or have not occurred this semester.

For example, one event which has not occurred in SGA reaching its full potential. It’s maybe true they have improved communications, but they’ve really had very little to communicate.

The legislature has only acted upon three major bills this semester. They’ve passed and approved the Run For Fun Club and have extended dorm hours thanks to the courtesy of President Patton, who chose not to veto it. Then, there has been considerable work on property fines, which is a good step forward for the SGA in its role as a bargaining agent for students with the administration and faculty.

However, after the above mentioned, very little has occurred. The bills committee hasn’t been handed anything to act upon because of the lack of initiative. And if the student legislature has done little, the SGA Executive Council has done even less. Their initial effort to start a paper drive to help raise money for a staircase behind the Campus Center is their only claim to fame. The need for convenience sake of a staircase behind the Campus Center is great and we hope their paper drive works, but very little else has been initiated.

There is no one person to blame and we’re not looking for anyone to blame. The leaders of the SGA–Allen Carter, Jim Van Horn, and Norris Woody all have good qualities which enabled them to get elected. Yet, one quality they lack is aggressiveness in the search for new areas to improve student life.

We understand the need for cooperation on this campus to achieve goals whether it be with/among administration, faculty, or student groups. Yet, cooperation shouldn’t be an excuse for lack of initiative. From an outsider’s point of view, very little has been accomplished, or bargained for.

A sense of responsibility seems to have been lost on the part of those who were elected to their positions. For if the elected don’t know what students need or want themselves, then it’s their responsibility to find out.

For and or...

55 mph; make it or "brake it"

Fifty five miles an hour is not only a good idea—it’s the law. A recent survey indicated that over 60% of the drivers in 22 states (NC was a participant) are ignoring the 55 mph speed limit. The result of the survey was a letter from the President of the USA himself directed to governors urging state presidents to put a stop to those of us edging over the magical number, 55.

Congress is considering making it a misdemeanor to speed and since Congress has never acted fast, let alone speed, I’m sure they will take it personally. 57 mph is not breaking the law—it is paying more attention to the speedometer. It’s probably that the president’s urging for a crackdown on speeders between 55 and 60 mph has made some "speedometer watching fools" out of a lot of us.

Mr. Carter, sir, when was the last time you got behind the wheel of YOUR car and drove 3-4 hours on a national highway and didn’t exceed beyond the speed limit of 55? Driving 60 mph in a car saves more energy than flying a one-man jet—wouldn’t you agree? Governor Hunt—your succession vote was a success, but do you realize that 64% of North Carolinians evidently don’t want to drive 55? And that’s a lot more than needed to put anyone in office.

New energy resources, middle east talks, and the national budget would be worth more of our politicians time. 55 isn’t only a good idea, it’s the law, but don’t give me a summons for driving 56, 57, 58, 59 or even 60 mph. I like to watch the road while I’m driving, not the dashboard.

The same old arguments have been brought up time and again and, sooner or later, the American people are bound to get tired of hearing about new speed limits, energy decreases, and energy saving tires.

I once had a professor that stated that the most wrecks on the highway were caused by people who wear hats. Yes he was relating to the elderly, but not to all senior citizens, only those who refused to change. Those who refuse to accept a minimum safe speed limit, a two lane highway, and a cloverleaf entrance. He was referring to those who are radically conservative in their thinking. I have to agree with him. Those who refuse to modify for lack of knowledge or personal gain do cause problems for our changing society. But I refuse to regress. Today’s super highways are built better and safer than most professional speedways. Slowing down the nation’s wheels will only get us there slower. Americans have been fed so much B.S. about shortages, depletions, and increased prices in finding fuel that we no longer care. The world could run out of petroleum today, and all the cars in the world could stop by Friday and the largest and significant result would be a complete turn-over in the next political election. The present hierarchy of political leaders would be blamed for trying to make a little last, instead of finding more fuel and it wouldn’t matter whether a governor could succeed himself or not—he still has to be elected. It might not be so bad though (if we ran out of gas), before Ford invented the car the U.S. didn’t have a un-payable national debt and we kept to our own business without sticking our nose in every halffare, backward country in the world. We didn’t have to worry about illegal immigrants or adopting every refugee who showed up.

I don’t want to regress. Let us progress to an independence of foreign fuel; to a safe country for drivers and pedestrians. Fifty-five is a good idea, but let’s not get carried away with it. It could become just a game.

55 mph is the law

The 55 mile an hour speed limit is a national law. The law was made during the time of the energy crisis and has not been lifted. The energy crisis has not lifted. The United States is expending more energy than during the crisis.

The 55 mile an hour speed limit can cut down on the injuries on the highways. Statistics show that immediately after the law went into effect, deaths and accidents dropped to new lows. The introduction of smaller

Many long hours and much hard work go into each issue of the Hi-Po. The Editors would like to take this opportunity to thank each member of the staff: Roger Robertson, Robin Hessin, Nancy Reichle, Colleen Blackney, Skip Harris, Debbi Johnson, Debbie Dorland, Mike Wallace, Ed Grandpre, Scott Hance, Phyllis Griffin, Lisa Mickey, Robert Gillis, Robert Hoke, Susan (Gina) Gaines, Tamara Faison, Kathy Covert, Michelle Bayes, Nan Lytton, Linda Thompson, Jan Dunshieberger, and our advisor Pete Petrie.

We wish each of you a very Merry Christmas and hope to see you Friday! The next staff meeting will be January 16, 1978. Each staff member is asked to see one of the Editors before this Friday.
Freshman Election dominate student legislature meeting

The November sessions of student legislature were dominated by the Freshman class run-off election, and by the fire extinguisher problem.

Ellen Carmine, legislature elections chairperson, allowed Ken Swanson and a small group of Freshmen to present a petition to the legislature, claiming that they felt the vice-presidential run-offs for the Freshmen class were held unfairly. "The group admitted that the Executive Committee study, which was also presented at the Nov. 15 session, was correct in saying that no formal procedures were broken, but they insisted that the "unnounced time changes, and short-notice date change of the election" did not allow all the Freshmen who desired a chance to vote that opportunity. The legislature, later in the Nov. 15 meeting, approved a resolution, made by day student Rep. Tommy Gray, which gave support to the petition and asked the executive council to re-study the appeal and if it was voted to forward the appeal to the Student Court.

Norris Woody, speaker of this legislature, announced at the Nov. 29 meeting that the Executive Council had agreed with the legislature and that the appeal would go to the Student Court for a special hearing.

Student legislature also worked in the fire extinguisher problem, and the legislature committee, chaired by Andy Wubbonhurst, presented a new bill to amend the ethics code. The committee's bill made special penalties for discharging or damaging fire extinguishers unless a fire was in progress. The penalties range from a $25 fine, plus damage fees, for a first conviction, to a stiff suspension from the school for the third conviction. The penalties, according to the legislation chairperson, are to act more as a deterrent, then as a punishment, since catching students will not be easy. He did stress, however, that the school will, if trends continue, be paying $85 per student just to repair fire extinguishers! And with that big a bill, some form of enforcement will be needed to show students this problem must be solved.

The bill, which was presented on Nov. 15, passed easily at the Nov. 29 meeting.

One other minor item was the resignation of Pete Migliorini as NCSL chair person. Mr. Migliorini stated that "there is not enough student desire to have a North Carolina student legislature delegation, so we might as well drop out.

SGA finds communications easier

Student legislature speaker, Norris Woody, in an interview held on Nov. 15, said that the best accomplishment the SGA could work for was inform the students better, and to seek their involvement more.

Woody, when talking about legislation said that the body has improved since last year, with better and harder working committees chairmen and members.

The SGA's biggest accomplishment, this year, has been its current project to raise money for a student center staircase, with the next biggest being the proposed ethics code amendments about his charging fire extinguishers.

When asked about the Executive Council, Woody pointed again to the staircase project, and also remarked that the Council is trying to keep a close watch on the spending of SGA funds by organizations to whom the SGA gives money.

The cheerleaders, for example, have already spent the entire budget for both semesters, and therefore, they are being investigated by the Council. The Council has, also hailed the squad's last expenditure until the study is finished.

Recent tests showed that the junior and senior classes are going strong, as was shown by the school-wide field party, and the senior class goal of having graduation at High Point Theatre.

A wish for Christmas

By Malon Baucom

The mysteries of God have attracted mankind through the ages. It seems, however, that as the celebration of Christmas takes place in every corner of the world, the entire human race is focused on one idea—Christmas is here! Traditions of decorating a Christmas tree, hanging the stockings on the mantle of the fireplace, waiting for Santa Claus to come down the chimney on Christmas Eve to deliver the presents, and waking up to a beautiful Christmas Day with your family is very memorable in all of our minds.

Despite all these traditions we participate in and share memories through Christmas as a holiday has been taken advantage of with American commercialization in our society. What is the real meaning of Christmas? Surely it means more than "getting"; the true meaning of Christmas is in "giving" rather than "getting." It involves more than receiving presents. Giving of one's life to make other happy means more than all the Christmas presents one could buy. Christmas is a time when some of your dreams come true.

What do you hope for or wish for this Christmas? I wish for the power to return some of the love given me by others in accepting me as a person. I wish for more days to spend time with children sharing with them some of the beauty of this planet Earth—a father's love, a mother's love, a bright sunrise, an indescribable sunset, an entire year's food supply, a drop of water to quench thirst—all of these given with an act of love and a touch of kindness from the hearts of those who care.

Some of us grow cautious; we feel vulnerable because we open our hearts to show love. There are lots of takers in the world who argue over this planet's nature resources instead of enjoying life and sharing these resources with others as a blessing from our Maker. I pray that you will become a giver in life rather than a taker. Give yourself in service for God and your fellow man instead of taking advantage of so many people and oppressing them for their economic status or social status. Look past the color of someone's skin and see into the heart of that human being; and, you will discover that there is a person who is just as unique and special as you are yourself. He also has as many fears and failures as you do, but he needs you to love that person and care. Of course, there will be just as many this year as last year who will say that Christmas is humbug and not worth celebrating.

Charles Dickens has the nephew of Scrooge say in The Christmas Carol to Scrooge's response of Christmas being humbug: "I have always thought of Christmas time, when it has come round, as a good time; a kind, forgiving, charitable, pleasant time; and only time I know of in the long calendar of the year when men and women seem by one consent to open their shut-up hearts freely and to think of people below them as if they really were fellow-passengers to the grave and not another race of creatures bound on other journeys. And, therefore, Uncle, though it never has put a scrap of gold or silver in my pocket, I believe that it has done me good, and will do me good; and I say, God bless it." My prayer is that this Christmas season will truly be the beginning of a new era of peace and love for all men everywhere. Shalom, my friend!

Ten years ago

[continued from page one]

provides an average of seventy-five percent of the operational and educational costs of the College.

In looking to the future, Dr. Patton said that the college is making plans to provide a new learning resource facility. "Wrenn Memorial Library has served us well," he said. "Now we must look to additional services, programs, and space."

The board of trustees, headed by Charles E. Hayworth, is considering plans for a new library facility.
Dog Gone!
(or are they?)

National News

In this week's major news are several items that deal with colleges. One is Wake Forest and the Baptists who founded and control the school. The Baptists are upset that Wake accepted federal grants without going through the channels of the Baptist-controlled trustees. The school's administration said they will keep the money and take their chances with the more conservative Baptist leaders.

Med Schools say NO

The Federal Government offered to increase medical school enrollments, requiring they take American students studying abroad. Several prestigious medical schools, including Duke, Stanford and Yale have said they will not let the federal government meddle in their admission policies. They are willing to risk $11 million dollars in federal money already given in order to control themselves in the university's best interest.

Who's Who in Government

Representative Richardson Freyer of NC has written a government publication of how citizens can find out what the federal government knows about them. The Freedom of Information and Privacy Acts state that citizens have that right. Those who have been arrested, served in the military and received student loans are on file with Big Brother.

In the U.N.

In other news, Egypt's President Sadat has courageously stated he will meet with Israel, without the support of Syria, Jordan or the PLO. These Arabs are being adamant and are not talking to either Israel or Egypt. The US has said it will attend while the Russians have replied they will side with the non peace talkers.

Tax cut for Christmas

The Carter Administration is working on lower income taxes for next year for low and middle income tax groups. This stroke of luck for the citizens will total at least $20 billion. This tax break is possible because of the easing of the Social Security problem by raising FICA deductions.

War!! Here??

The news capsule looks more peace at home, and less peace in the Middle East. As everyone knows, there has never been and never will be peace on college campuses.

UNC and HEW fight over desegregation proposals

In looking over the news content of the daily newspapers in the past couple of weeks, the controversial issue of desegregation in the University of North Carolina system has received considerable print space and has the potential of producing bitterness for all concerned.

Much of the controversy centers over the seemingly two-sided mandate of the U.S. Department of Health, Education, and Welfare (HEW) of drastically increasing the number of black student enrollment in the traditionally white universities and at the same time preserve the traditionally black campuses.

At the moment, the Board of Governors of the UNC system hasn't come up with a proposal to satisfy HEW and HEW's proposal is being considered as totally unrealistic by the Board of Governors.

HEW's original document proposed a goal of 50% increase in black freshman enrollment over a period of five years for the predominately white institutions in the UNC system.

Board officials in viewing the proposal as totally unrealistic proposed an increase from 25% to 30% over the next five years. The board feels their proposal is a more realistic and possible one to achieve after taking into account the population which they have to work.

The board further argues the number of high school graduates in the next five years will be fairly stable, so an increase in black enrollment would require vigorous recruitment and increased financial aid, which are factors the HEW plan does not include. Also, the board argues the predominately white institutions could not increase their black enrollment by recruiting.

HEW's response to the Board of Governor's proposal for desegregation has contained several criticisms including: not providing enough specific new steps to further enhance the traditionally black campuses in the system, not making the required commitment to give priority consideration to placing new programs at the traditionally black institutions, deleting a goal of UNC system to increase white enrollment at traditionally black institutions because such goals are inappropriate and insufficient, not including the N.C. School of the Arts in the desegregation plan, seeking redistribution of black students within the UNC system.

Board officials in viewing the proposal as totally unrealistic proposed an increase from 25% to 30% over the next five years. The board feels their proposal is a more realistic and possible one to achieve after taking into account the population which they have to work.

The board further argues the number of high school graduates in the next five years will be fairly stable, so an increase in black enrollment would require vigorous recruitment and increased financial aid, which are factors the HEW plan does not include. Also, the board argues the predominately white institutions could not increase their black enrollment by recruiting.

HEW's response to the Board of Governor's proposal for desegregation has contained several criticisms including: not providing enough specific new steps to further enhance the traditionally black campuses in the system, not making the required commitment to give priority consideration to placing new programs at the traditionally black institutions, deleting a goal of UNC system to increase white enrollment at traditionally black institutions because such goals are inappropriate and insufficient, not including the N.C. School of the Arts in the desegregation plan, seeking redistribution of black students within the state at traditionally white institutions instead of proportion, and increasing black freshmen and transfer student enrollment to traditionally white institutions to only a projected 33% instead of the HEW required 50%.

The letter from HEW to the UNC Board of Governors containing the criticism also carried a few positive notes including: recognizing UNC as having taken some positive steps to enhance traditionally black school, recognizing UNC has complied with a commitment to provide equal educational opportunities that are open and accessible to all students, and HEW has accepted UNC's goal to eliminate racial duality as a vestige of past discrimination.

A late December deadline has been set for HEW's acceptance or rejection of UNC's revised plan. HEW could seek extension of the deadline; however, if no extension is sought and HEW rejects the plan, the result might be the loss of approximately $100 million in federal funds to the system; or it might mean the U.S. Attorney General would bring suit against UNC.

As it has been said, "this is a very touchy issue" and it is a dispute which began in 1971 when the Legal Defense and Educational Fund of the National Association for the Advancement of Colored People (NAACP) sued HEW. The suit charged HEW did not adequately enforce a federal law prohibiting federal funding of institutions which discriminate on the basis of race. Named in the suit were ten university systems, including UNC.

The result could be a long drawn out court battle in the upcoming months as William Friday, UNC President has said, "the issue is over the control the educational future of all the institutions."
Weeps,” by George Harrison.

Ipanema,” “Blackbird,” “While My Guitar Gently Strings,” and was of the soft, easy-listening type. However, the two would lend their talents to produce an interesting evening of music. The two exhibited fine vocal ranges. Orlando accompanying on the Spanish acoustic guitar and Patty playing percussion. "You have three basic options for a class you have a big potential problem you will give some thought to a change to help students get a better deal of obtaining a license to operate. However, along came the Communications Major (designed for broadcasting), the Brake from the SGA, and last July the FCC license. At least $7,000 has been invested for equipment including transmitter, control board, turntables, speakers, antennae, air conditioning, construction and so on. Much of the equipment was bought with funds from the SGA, yet donations from businesses in the High Point area proved invaluable. Radio equipment from Gene Bobi of Channel 8 TV and electrical supplies from Womack's headed the list of donations.

Bill Carry, business manager for the radio station, said the station would also like to sincerely thank E.E. Younts Inc., for their advice and service throughout the last semester and also for the use of the broadcasting equipment. Carry also said special thanks to Edith Mentessana and Chris Larson students at HPC, for their hard work in helping construct and paint the station.

Officers include: Jeff Nesbitt, general manager; Bill Carry, business manager; Mary Wyatt, production manager; and Karen Green, programming manager. At the moment, programming hasn't been set, but it will include adult contemporary music (utilizing mainly album cuts and little top 40) along with various educational, public service, and news programs throughout the broadcast period.

WWIH is an educational station (which basically means no advertising accepted) and its control room and antennae are located at the top of Robert's Hall.

A.P.O. Book Exchange Offers Alternatives

The A.P.O. Book Exchange will be open the week of final exams, Dec. 12-15TH 12:00-4:00.

Finally, the semester is about over. You might have given some thought to a potential problem you will soon be experiencing. Did you realize that when you turn in your final examinations for a class you have a big decision to make, i.e., "What do I do with all these useless texts?" You have three basic alternatives; keep them, sell them at the Campus Book Store, or place them in the APO Book Exchange.

Let's look at the last alternative. Alpha Phi Omega, the service fraternity, operates a used book exchange to help students get a higher price for their used books and at the same time offers used texts at a reduced price. Here's how it works. You the student bring in your books to the Book Exchange located in Harrison Hall facing the Old Student Center (same place you get new I.D.'s made). Then you set your price that you want for the books. We then put your books on our shelves. At the beginning of each semester we open the Book Exchange so students can come and buy used books. If we sell your book we write a check and send it to you less 10% to cover costs of banking, postage, and materials.

There are advantages and disadvantages to using the Book Exchange. First the positive side:

1. The student sets his own price, so there's a better return.

2. APO will accept Foreign Language texts which the Book Store can't.

3. Since there is no profit motive in this service students can buy used texts for the same price the owner wants for it.

There are some drawbacks however:

1. The Book Exchange offers no cash for books, we simply accept books on consignment and try to sell them.

2. Since some courses are only offered once a year it might take a year to sell your book.

3. During this time the book may go out of date or the edition changes.

4. Once the book has been stamped by the APO Book Exchange it can't be taken to the Book Store.
Pantherettes Split First Two Contests

By Scott Hance

The women's volleyball team opened its season last week as they lost to Pfeiffer by a 90-81 margin and then recored a team high 18 point lead. Linda Cottrell came off the bench to score twelve points and kept High Point close in the final minutes of the game. Gracie Simmons led High Point as she hit for 15 points and chipped in six rebounds while Andrea Blanchard and Marie Riley contributed 12 points each and Ethel White connected for ten. Blanchard pulled down ten rebounds while White completed six steals. Connie Dickens managed six points and contributed seven assists before fouling out.

"I'm not worried at all," commented Coach Wanda Briley, "we've had only four days of practice together and Pfeiffer has been practicing since September." The reason for the lack of practice is, of course, volleyball. Many of the baskettballers are also on the Volleyball team that will travel to Illinois to compete for the National Championship. "We did not play well," said Briley, "but I think many of the girls had their minds in Illinois." She also commented that she was very pleased with the play of freshman Blanchard in her first varsity contest. The outside shooting of Cottrell also pleased Briley.

Wake Forest then visited the Alumni Gym to face the Lady Panthers and did not fare as well as Pfeiffer as they were soundly defeated 75-53. High Point jumped out to a quick 21-8 advantage and the women went on to take a 36-27 lead at the half. Fast breaks and steals helped High Point to move out to a 20 point bulge at one point. Ethel White led the scoring with 15 points and Marie Riley came in with 13. Andreia Blanchard hit for 11 and Gracie Simmons and Connie Dickens each contributed ten points to the winning effort.

The Lady Panthers now post a 1-1 record on the season and face Elon College in their next contest on December 10 at home.
High Point College

Definitely First Rate in '78

If the pre-season is any indication of what to expect in the fall, High Point should not be overlooked by anyone. Coach Woody Gibson, in the past couple years, has done a commendable job in building a fine but often overlooked and under-rated golf program. Last year's 17-8 record is hardly anything to be ashamed of, but when one has two nationally ranked teams in the same district as you're in, it is an easy thing to overlook. This year may be a little different for the Panthers.

Solid recruiting over the summer, backed by an excellent corps of seasoned veterans may prove to be the necessary ingredients to put High Point in contention for the district title and a trip to Nationals instead of their usual third or fourth finish. Already, the HPC golfers have turned a few heads as they have finished no less than fourth in 3 pre-season tournaments during the Fall.

In the Collegiate Invitational (Oct. 10-11), the Panthers, lead by tournament medalist Bill Wall, finished third behind N.C. State and UNC-Charlotte. District and Conference rival, Elon College, was over 40 strokes behind High Point. In the Elon Invitational with over 16 teams entered, the Panthers again placed high in the team standings as they finished 4th a mere 10 strokes off the lead. In the last and definitely best tournament of the pre-season, the Methodist Invitational, High Point saved their best for last as they narrowly missed capturing the team championship by 3 strokes. Led by freshman Tony Flippin's fine two under par 140, the Panthers took third place behind the Tar Heels of Carolina, Duke, and Elon. Flippin's 140 earned him second place in the individual competition.

If the Panthers can stay healthy, and keep their game sharp over the winter and into the spring, when it really counts, a trip to Nationals is a very real possibility!

After a successful pre-season, the Panther golf squad looks forward to the spring and another successful year. The team is composed of: Front row (left to right) Paul Rapley, Tony Flippin, Scott Teddar, Jeff Hall, Tony Piper; and back row [1 to r] Frecb Bolen, Bob Aydelette, Ray Jones, Tony Byrne, Leon Minka, and Coach Woody Gibson.

Oreo's Continue Domination

With the regular season play now over and the playoffs beginning this week, the Oreos are once again leading the league with an unblemished 10-0 record. For the last 4 years, the Oreo's lead by senior veteran Sam Dalton, have successfully defended their intramural basketball title and looks like they may do it again. But as in past years, they will definitely be hard pressed by several outstanding teams. Hot on the leader's heels are the Theta Chi's (6-1), then the Sig "A" team (7-2), Gas House Gang (5-3) and 3 time runners-up and the Choppers (7-3). Though the Oreos are undefeated thus far, any of the next four teams are very capable of winning the crown.

In the "B" league competition, the Tennis Elbows are proving that tennis isn't the only game that they can win at as they sport an undefeated record (5-0). They are closely followed by the Rebels (5-1), Sig "C" and Gold (both at 2-3).

Though the regular season schedule was completed last Friday, several teams have make-up games to play before the playoffs (Tues., Dec. 6). For some teams a victory or two during the make-up games may mean the right to qualify for the playoffs which will begin Tues. and conclude on Thursday. In the "A" league, 8 of the 10 teams will go into a single elimination tournament as will the top 4 teams in the "B" league.

Intramural Soccer and Volleyball Meeting—Wednesday, Dec. 7-7:30 p.m. Please meet in the Intramural Office. Competition for both will be held over Interim.
Announcements

STUDENTS!!!! Auditions for entertaining this summer at Busch Gardens, Williamsburg, Virginia will be conducted Tuesday, January 24, 1978 from 1:00-5:00 at UNCG, Elliott University Center - Cone Ballroom. Over 150 singers, dancers, mime artists, etc., will be sought. For more information see Student Personnel or Write: Busch Gardens Live Entertainment Dept. P.O. Drawer F.C. Contact: Betty Hoote, First Citizens Bank, 885-8001.

Work through Christmas at ABC Specialties, dealing with the public. Thursday, Fridays: 5 or 6 till 9 p.m. Saturdays: 10 till 6

Contact: Betty Dickerson, ABC Specialties, 885-2445

Person needed for handling of photo store - hours to be scheduled. $2.30 per hour.

Contact: Jim Gerlack, Beacon Foto Express, 886-2616 or 288-4924

Part-time work with 1st Citizens Bank. Salary: $2.75 to $3.00 per hour.

Contact: Bill McQuinn, 885-8001

Bong Show

A reminder to all students and organizations the second annual/Theta Chi Bong Show will be this spring semester. Saturday March 4th. The Bong Show last year was a great success and with your help and support it can be an even greater success this year. Further information about this event will be circulated and posted during January, so begin to think about your acts. If there are any questions contact Bob O'Brien at 887-1623 or Ray Hall, Theta Chi Secretary, Box 3066.

Interim Trips

While there is still space on the bus...NEW YORK FINANCIAL TOUR for students and friends of High Point College. Dates: Mon. Jan. 16 to Sat. Jan. 21, 1978. Costs: $160 in advance covers round-trip by chartered bus and five days at Hotel Edison (double occupancy, meals not included). Visit the secret places of the city New York and American Stock Exchanges, New York Federal Reserve Bank, Commodity Exchange and major investment firms. Tour conducted by Richard A. Stimson, Assistant Professor of Business Administration and Economics at the College, includes a sightseeing trip up the Hudson Valley (West Point, Hyde Park, Roosevelt & Vanderbilt mansions), and one free day for sightseeing in New York City. Tickets must be reserved and purchased in advance.

Students: Register for BA 3531 by bringing Drop/Add form to Mr. Rogers or Mr. Stimson in Cooke Hall.

Others: Contact either: Mr. Wilson Rogers or Mr. Richard A. Stimson, Earl N. Phillips School of Business, High Point College, High Point, N.C. 27262

NEWSOAPER INTERNS

The Journal and Sentinel newspapers in Winston-Salem, N.C. are accepting applications for their 1978 Summer Internship Program.

All students who have good school records and who are seriously considering newspaper journalism as a possible career are invited to apply. The editors' selection will be announced in late winter.

The Journal and Sentinel newspapers have had a formal intern program since 1959 and during this period has filled 213 intern positions in its news, editorial and advertising offices.

If you wish further information and an application, write to:

W.F. Clingman, Jr. Personnel Director Journal and Sentinel Newspapers Post Office Box 2509 Winston-Salem, N.C. 27102

Bakke Discussions

The Black Ideas Forum of Guilford College presents a program on the issues surrounding the case of Allen Bakke vs. The University of California-Davis. The issues concerning the Bakke case and their implications for affirmative action programs will be discussed by Dr. Albert Spruill, Dean of Graduate School, A&T State University and Attorney James Ferguson from Charlotte, North Carolina.

The program is scheduled for Wednesday, December 7, 1977 at 8:00 p.m. in the Boren Lounge of Founders Hall. The public is invited to come and participate.

Further inquiries should be directed to Frederick L. Hunt, Guilford College in Minority Student Relations, 229-5511, extension 143.
